

Budget to Complete

\$16.7M

Total Projected Cost

\$16.7M

This program funds community outreach, design, and construction of sidewalk projects in neighborhoods throughout the City that fill a gap or create a new connection. Neighborhood sidewalks are pedestrian facilities connecting neighborhood residents to neighborhood destinations including housing, parks, schools, shopping and services, employment, and the transit and school bus systems. Individual projects are selected in part based on strong and sustained community support demonstrated through other programs and public processes. Project costs, typically in the range between \$750,000 and \$3,500,000, exceed the financial capacity of ongoing minor capital programs like Pedestrian and Bicycle Access and Connections to Transit Stations (CIP Plan No. PW-W/B-56), but the projects often do not compete well for stand-alone CIP project funding.
