Description and Scope

The Transportation Department has a backlog of neighborhood safety, connectivity, sidewalk, bicycle, technology, and maintenance needs. The Neighborhood Safety and Connectivity Levy funding—approved by voters in 2016—helps the city to deliver more safety projects while being more responsive to community transportation improvement. Projects funded by the Levy include pedestrian crossing projects, sidewalk, traffic calming projects, school traffic improvement projects, new and upgraded bicycle facilities, sidewalk and other maintenance needs, and traffic technology projects. Projects are located in every neighborhood in the city. Through the first five years (2017-2021) of the Levy, 60 projects have been completed.

Rationale

In November 2016, the residents of Bellevue approved (by 54% of voters) Proposition 2 which assessed a \$0.15 per \$1,000 levy to fund Neighborhood Safety, Connectivity, and Congestion Management projects for 20 years, from 2017-2036. This project addresses Council's desire to provide approximately \$2 million per year for design analysis work on intersection and roadway projects that would improve neighborhood access/egress. At Council direction, funds may be used to leverage other funding sources, or as a contribution to levy-backed construction.

The Neighborhood Congestion Reduction program, also funded by Proposition, allots \$2,000,000 per year to develop projects that ease traffic congestion within, near and between neighborhoods, making it easier for people to get to homes, jobs, schools, and shopping. This work is funded by another proposal (130.124A).

Environmental Impacts

Project-specific environmental studies may be required and will be addressed on a per-project basis

Operating Budget Impacts

Operating costs for this program will be determined on a project specific basis as required.

Project Map

Schedule of Activities

<u>Project Activities</u>	<u>From - To</u>	<u>Amount</u>
