

CAPITAL FACILITIES POLICY MOVES QUESTIONNAIRE RESPONSES

Planning Commission | April 10, 2024

Response ID	Q5 (Which of these policy moves sound good to you, and what makes you say that?)	Q6 (Are there any policy ideas or considerations you think are missing?)	Q7 (What do you want the Planning Commissioners and the members of other boards and commissions to know as they discuss these policy moves and make their recommendations?)
1471634	Sustainability, because it is the only way to be in the future. Also new policy to preserve places of cultural, historical significance, because we most honor the past and the place to balance our lives.	Preservation must also include natural spaces as valuable. Perhaps place natural components within new facilities when possible to let nature in as well as adjacent, for human health.	Sustainable facilities for sure. Watch for places to preserve. Build access to nature within as well as around facilities.
1471772	NO INTEREST	PEOPLE PROBLEMS	PEOPLE PROBLEMS
1473389	These are all good. Actions and policies that reduce GHG emissions, and mitigate effects of global warming, are good.		
1476341	Yes, to all of the above. Conservation and green use of energy expenditures. Renewal able energy is necessary to fight Global Heating. Do not provide plastic bottled water and drinks at all City of Bellevue events and City Council and committee meetings. Lake to Lake Bike ride was passing out single use plastic bottled water! What the heck! Not a good example of reduce, reuse and recycle...Stop this.	Add more solar collection systems on City of Bellevue buildings and require them on new private construction of buildings.	Excell and exceed the best prevailing science of use of energy inside and outside buildings.
1476382		Create policies that center transit users who want to access these new facilities, allowing equal or better convenience for people arriving by transit as by personal vehicle.	
1478551			There should be a backup plan if in case our energy grid is not working. Having only one source of energy will leave our city vulnerable.
1495878			

**Which of these moves sound good and why?**

- Great direction.
- Love: New emphasis on sustainability
- The intention for the EV Road Map to be integrated with public/private sectors is a great idea. It's nice to see the city considering equitable amenities across the city.

**Are there any policy ideas missing?**

- Establish a new requirement for the city to use lifecycle cost estimating procedures in conjunction with CIP/planning and preparation
- Need for a multicultural center. A place where diverse cultures can get to know each other.
- Need additional community gathering areas and community centers, especially with property development.
- Would like to see a plan for developing a Performance Arts Center in Bellevue

**What do you want Planning Commissioners to know? (no responses)**
