

This project will perform conceptual design work, evaluate design alternatives and develop funding and implementation strategies for NE Spring Boulevard between 124th Avenue NE and 130th Avenue NE. This proposed segment of NE Spring Boulevard is a high priority east-west multi-modal connection that will improve access, circulation, and mobility options for passenger cars, transit, freight, pedestrians, and bicycles to and between the new Bel-Red transit-oriented-development nodes and the larger city and region. This future connection will support the area’s redevelopment, attracting private investment in commercial and residential uses to create entirely new neighborhoods.
