Crossroads Public Art by Anna Mlasowsky

Update: *River*, by Anna Mlasowsky, has been installed in Crossroads Park. There are three installations that comprise the artwork. The steel and dichroic glass artwork features three distinct palettes of colored glass that change color depending on the user's vantage point and the available light.

Additionally, the artwork has a different impact when illuminated by the light from the poles at night. The installations are all installed on existing light poles at the following locations:

1. Light pole adjacent to the outdoor amphitheater on the back side of the Bellevue Youth Theatre.

2. Light pole adjacent to the tennis courts.

3. Light pole adjacent to the pea patch at the north end of the park. Note the change in color and appearance following the lifting morning fog in the image below on the right.
