

## Attachment D. Progress on Updates to Comprehensive Plan Elements

The Planning Commission has been directed by Council to make recommendations on policies and to hold a public hearing because both the Comprehensive Plan Periodic Update and Wilburton Vision Implementation are legislative decisions. The following summary of the progress toward updating the Elements of the Comprehensive Plan was provided to Planning Commission at their meeting February 22.

The City's code directs some of the boards and commissions to be involved in the update, however, not all elements are related to the expertise of a board or commission. Therefore, the Planning Commission will be the only commission reviewing those elements. Staff have also engaged with other boards and commissions about the plan as a whole, not focused on specific elements. This includes Youth Link (4/6/2022), Bellevue Network on Aging (5/5/2022, 2/2/2023).
