Description and Scope

This project provides funding for initial site selection, design, and construction of Fire Station 6, which was constructed in 1983. Due to limited capacity, this rebuild will incorporate current best practices to improve firefighter safety and the operational work efficiency of the department by including a dedicated bunker gear storage room, a dedicated medical clean-up and medical supply storage room, individual sleeping quarters and unisex restroom facilities, an appropriately sized fitness room, and a dedicated in-house training space. Additionally, establishing a new site will improve the department's ability to establish an effective firefighting force for larger incidents in areas that have the highest projected growth and density.

Rationale

Maintaining emergency response capabilities, providing a healthy and safe working environment for fire personnel, and providing adequate training facilities for firefighters is directly related to the Key Community Indicator described as a community that is prepared for and responds to emergencies.

Environmental Impacts

Operating Budget Impacts

This program will have no impact on operating expenditures.

Project Map

Schedule of Activities

Project Activities	From - To	Amount
Project Costs	2025 - 2027	16,181,504

Total Budgetary Cost Estimate: 16,181,504

Means of Financing

Funding Source	Amount
Fire Levy Revenue	16,181,504

Total Programmed Funding: 16,181,504
Future Funding Requirements: 0
