

## Future Land Use Designation Crosswalk

February 14, 2024

The Future Land Use Designation categories proposed are broader than the categories currently used or the categories used in the EIS. This means that while many current Future Land Use Designations are equivalent to one or two zones, a proposed Future Land Use Designation might relate to many more zones. This is because the Future Land Use Map is meant to give general direction for the character of areas of the city while the code is meant to spell out the specifics of what is allowed on each individual parcel.

Below is a description of the proposed Future Land Use Designations and their relationship to existing zones and Future Land Use Designations studied in the EIS. Zoning designations will be formalized with the Land Use Code update following the adoption of the Comprehensive Plan Update. This process may be phased and will include a public process.
