East Main Station Area Plan

Relationship to draft Comprehensive Plan amendments and the Comprehensive Plan

Proposed draft East Main Comprehensive Plan amendments are shown in the left-hand column of this table. Related Comprehensive Plan policies and East Main Station Area Plan recommended code and policy amendments are shown to the right.

Draft	Adopted	East Main Station A
Comprehensive Plan Policies	Comprehensive Plan Policies	character code and
Definitions and Land Use Element		
 Definitions and Land Use Element Definitions Transit-oriented development (TOD) Development that is within one-half mile from and oriented toward a transit station that provides frequent, reliable service. TOD optimizes transit use through a compact mix of housing, retail and office uses and a walkable pedestrian-oriented character. East Main – Transit Oriented Development (EM-TOD) A land use designation in the Southwest Bellevue (West Bellevue) subarea designed to provide for a mix of office, housing, retail, and services. Multiple uses and appropriate densities are encouraged to create a concentration of activity that supports transit service. Land Use Element A Provide for a mix of housing, office, service and retail uses in a compact walkable development pattern that optimizes the benefits of transit investment in Bellevue's transit-oriented development areas. B Provide walking and bicycle routes in the station area that are accessible, safe and convenient, and that connect to destinations, transit and surrounding bicycle and pedestrian networks. C Ensure that transit-oriented land use and development is responsive to the type of transit facilities and services provided and the context of surrounding area. D Consider a land use incentive system that offers additional floor area available in exchange for infrastructure and amenities that contribute to the public good. 	 LU-3 Promote a land use pattern and an integrated multimodal transportation system. LU-18 Encourage new neighborhood retail and personal services in locations that are compatible with the surrounding neighborhood, allow for ease of pedestrian access, and enhance neighborhood character and identity. HO-2 Promote quality, community-friendly single family, multifamily and mixed use development, through features such as enhanced open space and pedestrian connectivity. HO-7 Encourage the development of affordable housing through incentives and other tools consistent with state-enabling legislation. HO-11 Encourage housing opportunities in mixed residential/ commercial settings throughout the city. HO-12 Provide incentives to encourage residential development for a range of household types and income levels in multifamily and mixed use commercial zones. HO-13 Ensure that mixed-use development complements and enhances the character of the surrounding residential and commercial areas. HO-23 Encourage the development of affordable housing through incentives and other tools consistent with state-enabling legislation. UD-48 Link increased intensity of development with increased pedestrian amenities, pedestrian-oriented building design, through-block connections, public spaces, activities, openness, sunlight and view preservation. TR-7 Ensure that land use changes near high capacity transit stations are consistent with the Comprehensive Plan, recognizing that: Transit may support more intense development around some stations; 	 Land Use 2 Apply a new zone between Main Street SE and that includes, at a A mix of uses (e.g. restindividual building Housing for a variety of quality of the community be achieved to quality development Establish a minimum be the kind of vibrant, plarecommended visions Allow additional FAR of feet of the Main Street only through a develop provides greater quality architectural design, excommunity benefits, provides greater quality development Limit building height the dividing design that street within 50 feet of the Main Street of the Main Street only through a develop provides greater quality architectural design, excommunity benefits, provides greater quality development Limit building height the street of the Main Street of the Main Street of the Main Street only through a develop provides greater quality architectural design, excommunity benefits, provides greater quality architectural design, excompt architectural design, excompt architec

¹ CAC Land Use recommendation 2, listed in full on this page, includes a list of bulleted concepts that relate to number of different draft and adopted comprehensive plan policies. For the convenience of the reader, where land use recommendation 2 is listed in other parts of this document, only the bullets relevant to the corresponding policy are shown.

22 Provide abundant landscaping and amenities along 112 th Avenue SE to enhance its pedestrian character.	UD-4 Create a safe, engaging and attractive pedestrian environment throughout the city using appropriate urban design features.	Character 3 Develop Main Street to SE 8th Str look and feel and create bicyclists.
	UD-47 Mitigate potential impacts to surrounding neighborhoods using landscaping, greenspace and other urban design elements.	
	UD-63 Ensure continuous and safe sidewalks wide enough to serve current and planned uses along arterials that are integrated with abutting land uses.	
	UD-66 Design streets to be visually appealing connections between different parts of the city for motorists, bicyclists and pedestrians.	
	UD-67 Give identity and continuity to street corridors by using a comprehensive street tree plan and other landscaping to enhance circulation routes, soften the appearance of pavement and separate pedestrians from traffic.	
	UD-68 Design key city boulevards to be distinctive from other streets and to reinforce the image of Bellevue as a "City in a Park." Use features such as gateways, street trees, median plantings, special lighting, separated and wider sidewalks, crosswalks, seating, special signs, street names, landscaping, decorative paving patterns and public art both within the right-of-way and on adjacent private development. (See Map UD-1 ⁶)	
	UD-73 Design enhanced streetscapes at designated intersections and key entry points into the city and into smaller districts. (See Map UD-1)	
	UD-75 Minimize the removal of existing vegetation when improving streets to preserve the natural character of Bellevue.	
	S-SW-19 Provide for the aesthetic development of Bellevue Way S.E. and 112th Avenue S.E. including the provision of sidewalks and bicycle lanes on both sides of the street and landscaping along the entire street so as to provide the feeling of a continuous boulevard and a gateway for Bellevue. ⁴	
	S-SW-25 Provide for pedestrian and bicycle facilities along Bellevue Way S.E. and 112th Avenue S.E. to enhance nonmotorized access from residential streets\to Downtown. ⁴

24 Preserve sunlight and air circulation through thoughtful siting and spacing of towers.	UD-22 Employ design guidelines to affect building placement and design in order to promote solar access in public spaces and a sense of openness.	No specific recommendation and site planning that co
	UD-33 Encourage public and private development to incorporate access to sunlight.	
	UD-59 Ensure public places give access to sunlight, a sense of security, seating, landscaping, accessibility and connections to surrounding uses and activities.	
25 Include landscaping treatment, building modulation, and other architectural measures in high-rise development to create interest, texture and a sense of human scale.	UD-23 Encourage excellence in architecture, site design and workmanship, and durability in building materials to enrich the appearance of a development's surroundings.	Land Use 2 Apply a r zone between Main Stre SE and that includes, at • Use landscaping and the "wall effect" (i.e. SE. (abbreviated, see Not
Open Space		1
 26 Establish an open space system in the station area that incorporates: a) abundant landscaping in both public and private areas b) Well-integrated publicly accessible plazas, paths, open spaces and other gathering places c) A clearly-defined pathway system that is connected to destinations within and surrounding the station area. 	LU-33 Preserve open space and key natural features through a variety of techniques, such as sensitive site planning, conservation easements, transferring density, land use incentives and open space taxation.	No specific recommendat throughout the redevelo passive (e.g. seating) and interesting and appealin interact in a community
	PA-1 Establish a coordinated and connected system of open space and greenways throughout the city that provide multiple benefits including preserving natural systems, protecting wildlife habitat and corridors, and providing land for recreation.	
	PA-12 Develop pedestrian and bicycle linkages between neighborhoods and major natural areas, recreation facilities, schools and commercial centers.	
	PA-14 Encourage the linkage and access of private facilities with those in the public system.	
	UD-27 Integrate high quality and inviting public and semi-public open spaces into major development.
