

**Changes since Planning Commission Recommendation:**

Parking Flexibility Incorporated in 20.25A.080.H

Pedestrian Corridor DT-O1, nonresidential, trigger for additional height and base height increased.

Floor plates in DT-OLB Central may be increased by 25% between 80 feet and 150 feet through an administrative departure with criteria. 20.25A.060, Footnote 16.

Floor plate reductions over 80 feet for nonresidential buildings exceeding 100 feet in the DT O-1 and DT O-2 for exceeding the trigger height were set at 15 percent.

Affordable housing provisions were inserted, including the ratio of market rate units to affordable units, the FAR exemption, and flexibility provisions.

In-lieu fees for parks were allowed to be spent on open spaces within, adjacent to and connected to Downtown.

Small sites may obtain amenity points for providing an outdoor plaza that is a minimum of 1,500 square feet in size.

**Part 20.25A Downtown****20.25A.010 General****A. Applicability of Part 20.25A**

1. General. This Part 20.25A, Downtown (DNTN), contains requirements, standards, criteria and guidelines that apply to development and activity within Downtown Land Use Districts as they are described in paragraph B of this section. Except to the extent expressly provided in this Part 20.25A and as referenced in subsection A of this section, the provisions of the Land Use Code, other development codes, the City development standards, and all other applicable codes and ordinances shall apply to development and activities in Downtown.
2. Relationship to Other Regulations. Where there is a conflict between the Downtown Part 20.25A LUC, other provisions of the Land Use Code or the Bellevue City Code, and other City ordinances, the Downtown regulations shall govern.
3. Land Use Code sections not applicable in Downtown. The following sections of the Land Use Code, Title 20 Bellevue City Code (BCC) now or as hereafter amended, do not apply in Downtown. Unless specifically listed below, all other sections apply.
  - a. 20.10.400
  - b. 20.10.440
  - c. 20.20.005 through 20.20.025
  - d. 20.20.030

- e. 20.20.060 and 20.20.070
- f. 20.20.120 and 20.20.125
- g. 20.20.128
- h. 20.20.135 and 20.20.140
- i. 20.20.190 and 20.20.192
- j. 20.20.250
- k. 20.20.400
- l. 20.20.520
- m. 20.20.525
- n. 20.20.560
- o. 20.20.700 and 20.20.720
- p. 20.20.750 through 20.20.800
- q. 20.20.890 and 20.20.900

**B. Organization of Part 20.25A.** Organization of Part 20.25A is composed of several regulatory layers that inform development in Downtown.

1. General

a. Purpose. Downtown Bellevue is the symbolic as well as functional heart of the Eastside. It is to be developed as an aesthetically attractive area of intense use. Toward this end, the City shall encourage the development of cultural, entertainment, residential, and regional uses located in distinct, mixed-use neighborhoods connected by a variety of unique public places and great public infrastructure. Development should enhance people orientation and facilitate pedestrian circulation, and provide for the needs, activities, and interests of people. The City should encourage land uses that emphasize variety, mixed uses, and unity of form within buildings or complexes. Specific Land Use Districts have been established within Downtown to permit variation in use and development standards in order to implement the objectives of the Downtown Subarea Plan.

b. Location. Downtown refers to the area of the City located generally from I-405 on the east to 100th Avenue NE on the west and from NE 12th Street on the north to approximately Main Street on the south, specifically within the boundaries described as follows:

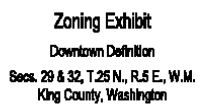

Beginning at the Northwest corner of the Northwest quarter of Section 32, Township 25 North, Range 5 East, W.M., also being the centerline intersection of NE 8th Street and 100th Avenue NE; thence south along the west line of said Northwest quarter and along the centerline of 100th Avenue

NE to the Northwest corner of the Southwest quarter of said Section 32 and the intersection of Main Street; thence south along the west line of said Southwest quarter and the centerline of 100th Avenue SE to a point being 200 feet south of, as measured at right angles to, the north line of said Southwest quarter of Section 32; thence easterly parallel with said north line 215 feet; thence southerly parallel with the west line of said Southwest quarter 90 feet to a point on the north line of Lot 82 of Bellevue Acre and Half Acre Tracts; thence easterly along the north line of Lot 82 to the centerline of Meydenbauer Way SE; thence southwesterly along the arc of the centerline of Meydenbauer Way SE and diverging southerly along the centerline of 101st Avenue SE to a point being the intersection of the centerline with the westerly projection of the south line of Lot 50 of Bellevue Acre and Half Acre Tracts as shown on that certain Condominium (THE FORUM) recorded under V.13, P.47-48 and Amended under V.18, P.8; thence easterly along the south line of Lot 50 to the centerline of 102nd Avenue SE; thence continuing easterly along the south lines of Lots 49 and 14 of Bellevue Acre and Half Acre Tracts to the centerline of 104th Avenue SE; thence northerly along said centerline to a point being the intersection of the centerline with the westerly projection of the south line of Lot 14 of Maxwellton Braes; thence easterly along the south line of Lot 14 to the Southeast corner thereof; thence northerly along the east line of Lot 14 to the Southwest corner of Lot 57 of Maxwellton Braes; thence easterly along the south line of Lot 57 to the centerline of 105th Avenue SE; thence continuing easterly along the south lines of Lots 58 and 101 of Maxwellton Braes to the centerline of 106th Avenue SE, and also being 15 feet westerly of the west line of Lot 2 of Trinwith Addition; thence continuing easterly along the prolongation of the south lines of Lots 58 and 101 of Maxwellton Braes to the centerline of 107th Avenue SE; thence northerly along said centerline to a point being the intersection of the centerline with the westerly projection of the south line of Lot 15 of Trinwith Addition; thence easterly along the south line of Lot 15 to the Southeast thereof; thence southerly to the south line of the North 227.07 feet of the Southwest quarter of said Section 32; thence easterly along said south line to the west line of the East 230 feet of said Southwest quarter; thence northerly along said west line to the south line of the North 176.42 feet of said Southwest quarter; thence easterly along said south line to the east line of the Southwest quarter of said Section 32 also being the centerline of 108th Avenue SE; thence northerly along said centerline to the intersection of 108th Avenue SE and Main Street; thence easterly along the centerline of Main Street to its intersection with the westerly right of way margin of SR 405 as shown on WSDOT Right of Way plan set titled SR 405 S.E. 30TH ST. VIC. TO N.E. 40TH ST. VIC., Sheets 17 through 24, approved and adopted February 11, 2005; thence northerly along said westerly margin to its intersection with the easterly right of way margin of 112th Avenue NE; thence northerly along said easterly right of way margin to its intersection with the westerly right of way margin of SR 405; thence northerly along said westerly margin to its intersection with the centerline intersection of NE 12th Street; thence westerly along the centerline of NE 12th Street to its projected intersection with the west line of the Southwest quarter of Section 29 Township 25 North, Range 5 East, W.M., also being the centerline intersection of 100th Avenue NE; thence south

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

along the west line of said Southwest quarter and along the centerline of 100th Avenue NE to the Point of Beginning, and there ending, all in King County, Washington.

DRAFT

2. Land Use Districts. Each parcel of land in Downtown is classified to determine uses, dimensional requirements (including Floor Area Ratio), and requirements for participation in the Amenity Incentive System. Specific sections of the Downtown code, Part 20.25A LUC, apply to the following Land Use Districts. See Figure 20.25A.060.A.2 for a map of the Downtown Land Use Districts.

- a. Downtown-Office 1 (DNTN-O-1). The purpose of the Downtown-O-1 District is to provide an area for the most intensive business, financial, specialized retail, hotel, entertainment, and urban residential uses. This district is limited in extent in order to provide the level of intensity needed to encourage and facilitate a significant level of transit service. Day and nighttime uses that attract pedestrians are encouraged. All transportation travel modes are encouraged to create links between activities and uses.
- b. Downtown-Office 2 (DNTN-O-2). The purpose of the Downtown-O-2 District is to provide an area for intensive business, financial, retail, hotel, entertainment, institutional, and urban residential uses and to serve as a transition between the more intensive Downtown-O-1 District and the less intensive Downtown-Mixed Use District. The Downtown-O-2 District includes different maximum building heights for areas north of NE 8th Street, east of 110th Avenue NE, and south of NE 4th Street based on proximity to the Downtown Core and access to the regional freeway system and transit, creating the Downtown O-2 Districts North, East, and South (DNTN-O-2 North, DNTN-O-2 East, and DNTN-O-2 South).
- c. Downtown-Mixed Use (DNTN-MU). The purpose of the Downtown-MU District is to provide an area for a wide range of retail, office, residential, and support uses. Multiple uses are encouraged on individual sites, and in individual buildings, as well as broadly in the district as a whole. The Downtown-MU District allows for taller buildings and additional density in the Civic Center portion of the district east of 111th Avenue NE between NE 4th and NE 8th Street based on its proximity to the Downtown Core and convenient access to the regional freeway system and transit. This area is called the Downtown Mixed Use District–Civic Center (DNTN-MU Civic Center) while the rest of the district is called the Downtown-Mixed Use District (DNTN-MU).
- d. Downtown-Residential (DNTN-R). The purpose of the Downtown-R District is to provide an area for predominantly urban residential uses. Limited office and retail uses are permitted as secondary to residential use, in order to provide the amenity of shopping and services within easy walking distance of residential structures.
- e. Downtown-Old Bellevue (DNTN-OB). The purpose of the Downtown-OB District is to reinforce the character of the Old Bellevue area and assure compatibility of new development with the scale and intensity of the area. The social and historic qualities of this area are to be preserved.
- f. Downtown-Office and Limited Business (DNTN-OLB). The purpose of the Downtown-OLB District is to provide an area for integrated complexes made up of office, residential, and hotel uses, with eating establishments and retail sales secondary to these primary uses. The district abuts and has access to both I-405 and light rail transit service. The Downtown-OLB District differentiates maximum building heights and allowed density for areas north of NE 8th Street, between NE 4th and NE 8th Street, and south of NE 4th Street based on proximity to the Downtown Core and convenient access to the regional freeway system and transit. This creates

three districts Downtown-OLB North, Downtown-OLB Central and Downtown-OLB South (DNTN-OLB North, DNTN-OLB Central, and DNTN-OLB South).

3. Perimeter Overlays may impose dimensional requirements that differ from the underlying Land Use District regulations to provide an area for lower intensity development that provides a buffer between less intense uses outside Downtown and more intensively developed properties in Downtown. Specific sections of the Downtown code, Part 20.25A LUC, apply to the following Perimeter Overlays. See Figure 20.25A.060.A.3 for a map of the Downtown Perimeter Overlays.

a. Perimeter Overlay A

A-1

A-2

A-3

b. Perimeter Overlay B

B-1

B-2

B-3

4. Neighborhoods are a key organizing principle to implement the Great Place Strategy of the Downtown Subarea Plan. Neighborhoods create a series of distinct, mixed-use areas within Downtown that reinforce their locational assets and unique identities. More information can be found in the Downtown Subarea Plan of the Comprehensive Plan.

a. Northwest Village

b. City Center North

c. Ashwood

d. Eastside Center (including Bellevue Square, City Center, and Convention Civic)

e. Old Bellevue

f. City Center South

g. East Main

5. Right-of-Way Designations. The right-of-way designations provide design guidelines for Downtown streets that are organized by streetscape type. These designations are a representation of the Downtown vision for the future, rather than what currently exists. The designations create a hierarchy of rights-of-way reflecting the intensity of pedestrian activity. The “A” Rights-of-Way are those streets that have the highest amount of pedestrian activity, while the “D” Rights-of Way would

have a smaller amount of pedestrian activity. These guidelines are intended to provide activity, enclosure, and protection on the sidewalk for the pedestrian. See Figure 20.25A.170.B for a map of the Right-of-Way Designations.

- a. "A" Rights-of-Way- Pedestrian Corridor / High Streets
  - b. "B" Rights-of Way- Commercial Streets
  - c. "C" Rights-of-Way- Mixed Streets
  - d. "D" Rights-of-Way- Neighborhood Streets
  - e. "E" Rights-of-Way- Perimeter Streets
6. Major Pedestrian Corridor. An alignment that is generally for exclusive pedestrian use providing a reasonably direct but interesting pedestrian route in the immediate vicinity of NE 6th Street between Bellevue Way and the east side of 112th Avenue NE.

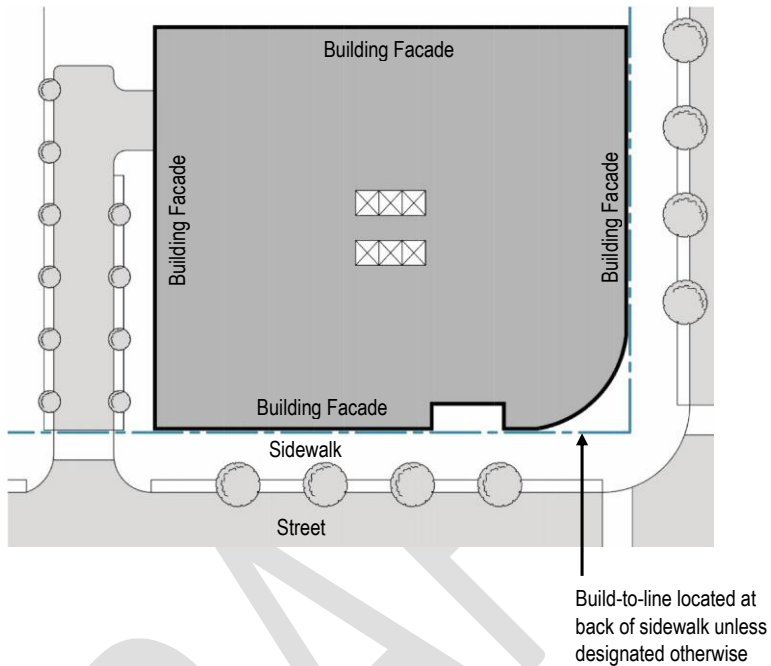

## 20.25A.020 Definitions

### A. Definitions Specific to Downtown

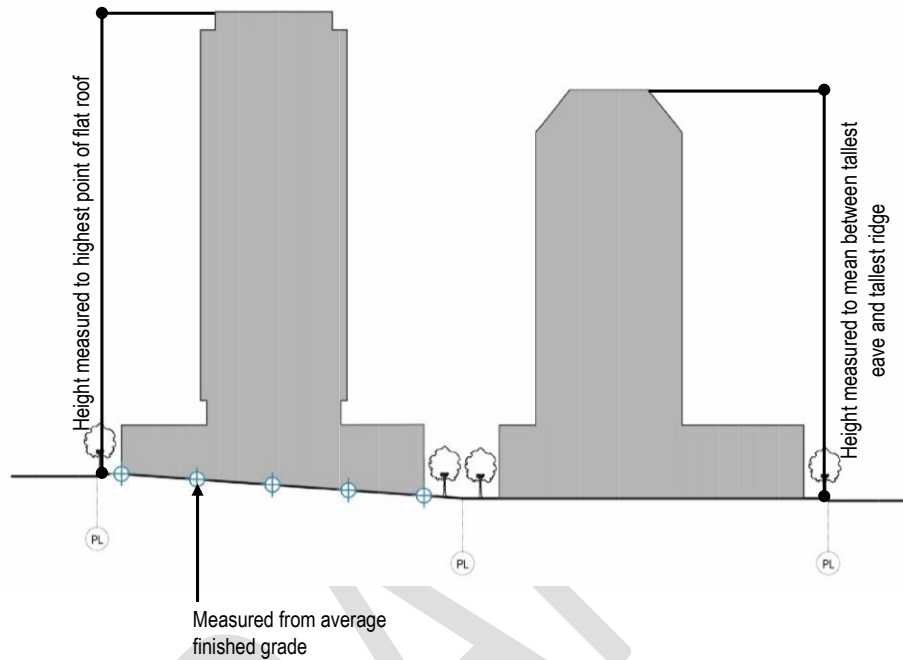

**DT - Active Uses:** Those uses listed in LUC 20.25A.050 under “Cultural, Entertainment and Recreation”, “Wholesale and Retail” (with the exception of recycling centers and gas stations), and “Service Uses” (limited to finance, insurance, real estate services; barber and beauty shops; photography studios; shoe repair; and travel agencies). Those uses listed in LUC 20.25A.050 under “Residential” (including entrance lobbies and private indoor amenity space), “Service Uses” (except those uses listed above), “Transportation and Utilities”, and “Resources” are not considered Active Uses, but may be determined to meet the definition for an Active Use through an administrative departure pursuant LUC 20.25A.030.D.1 and 20.25A.070.C.4. An Active Use shall meet the design criteria in the FAR Exemption for Ground Level and Upper Level Active Uses in LUC 20.25A.070.C.1 and the design guidelines for the applicable right-of-way designation in LUC 20.25A.170.B.

**DT-Alleys with Addresses:** Pedestrian oriented ways off the main vehicular street grid that provide an intimate pedestrian experience through a combination of residential, small retail, restaurant, and other commercial entries with meaningful transparency along the frontage building walls. This area does not have a “back of house” feel.

**DT - Build-To Line:** A location along a designated block or right-of-way where a building shall be constructed. The build-to line is the back of the required sidewalk unless, upon the request of the applicant, it is designated otherwise by the Director through an administrative departure pursuant to LUC 20.25A.030.D.1 to accommodate plaza space, building modulation or other ground-level open space that retains the intended connection between the publicly accessible pedestrian realm and ground-level internal portions of the building.

**DT - Building Height:** The vertical distance measured from average of finished ground level adjoining the building at exterior walls to the highest point of a flat roof, or to the mean height between the tallest eave and tallest ridge of a pitched roof. Where finished ground level slopes away from the exterior walls, reference planes shall be established by the lowest points within the area between the building and the lot line, or back of sidewalk where back of sidewalk is the setback line. If the lot line or back of sidewalk is more than 6 feet from the building, the reference line shall be established by using the lowest points between the building and a point 6 feet from the building.

**DT-Caliper:** The diameter measurement of the stem or trunk of nursery stock. Caliper measurement should be taken six inches above the ground level for field grown stock and from the soil line for container grown stock, which should be at or near the top of the root flare, and six inches above the root flare for bare root plants, up to and including the four-inch caliper size interval. If the caliper measured at six inches is four and one-half inches or more, the caliper shall be measured at 12 inches above the ground level, soil line, or root flare, as appropriate.

**DT-Downtown Core:** Describes the area bounded by the extension of the centerlines of 102nd Avenue NE on the west, NE 9th Street on the north, 112th Avenue NE on the east and NE 3rd Street on the south plus any area within the Downtown-O-2 District not described above.

**DT-Diameter at Breast Height: Diameter at Breast Height (D.B.H.):** The diameter of the tree trunk at four and one-half feet (or 54 inches) above natural grade level. The diameter may be calculated by using the following formula:  $D.B.H. = \text{circumference at 4.5 feet} \div 3.14$  (which is the numerical representation of Pi). To determine the D.B.H. of multi-trunk trees or measuring trees on slopes, consult the current *Guide for Plant Appraisal*, published by the Council of Tree and Landscape Appraisers.

**DT - Floor Area Ratio (FAR):** A measure of development intensity equal to the gross floor area, excluding parking and mechanical floors or areas, divided by the net on-site land area in square feet.

Net on-site area land includes the area of an easement and public right-of-way as provided in LUC 20.25A.070C.

**DT - Floor Plate:** Floor area in square feet within the surrounding exterior walls, measured from the interior wall surface and including all openings in the floor plate.

**DT – Interior Property Line:** A property line other than the build-to line. Where the project limit encompasses more than one lot, interior property line refers to the perimeter boundaries of the project limit other than the build-to line.

**DT-Open Space:** Landscaped areas, walkways, gardens, courtyards and lawns; excluding areas devoted to buildings, traffic circulation roads, or parking areas. Outdoor plazas, Major Pedestrian Open Space and Minor Publicly Accessible Spaces are a kind of open space.

**DT - Pedestrian Scale:** The quality of the physical environment that reflects a proportional relationship to human dimensions and that contributes to a person's comprehension of buildings or other features in the built environment.

**DT- Point of Interest:** Elements of a building's façade at the street level or in the streetscape that contribute to the active enrichment of the pedestrian realm and design character of a building. Some examples include permanent public artwork, architectural elements, landscape features, special walkway treatments (e.g. pavement mosaic, inlaid art) and seating areas.

**DT - Project Limit:** A lot, portion of a lot, combination of lots, or portions of combined lots treated as a single development parcel for purposes of the Land Use Code.

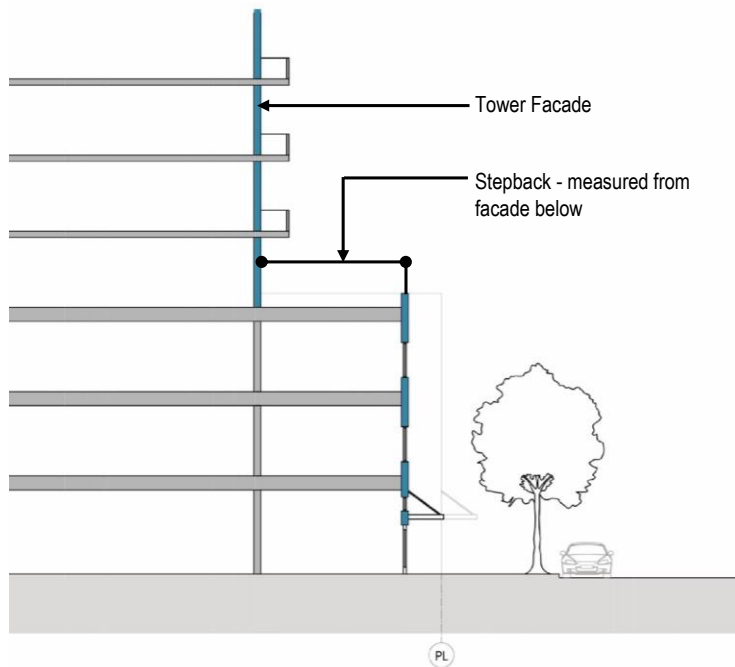

**DT -Public Realm:** Streets, parks and other open spaces and the publicly accessible parts of private buildings.

**DT-Setback:** A space unoccupied by structures except where intrusions are specifically permitted by Part 20.25A. Front setbacks are measured from the back of the required sidewalk to face of the building. All other setbacks are measured from the property line.\

**DT-Site:** Refers to the total land area (measured in square feet or acres), within the project limit.

**DT-Small Site:** A lot in existence prior to [EFFECTIVE DATE OF THIS ORDINANCE] that is less than or equal to 40,000 square feet in area and corresponds to the project limit within which the small site is located. This definition does not apply to lots less than 40,000 square feet in area that are aggregated into a project limit that is greater than 40,000 square feet.

**DT – Stepback:** A building stepback of a specified distance, measured from the façade below that occurs at a defined height above the average finished grade. No portion of the building envelope can intrude into the required stepback above the defined height, except where intrusions are specifically permitted by this code.

**DT-Street Wall:** A street wall is a building wall that generally abuts the sidewalk although there may be occasional setbacks and recesses for the purpose of plazas and open space. The street wall helps define and enclose the street corridor, creating a sense of activity, intensity, and spatial containment. Street walls can incorporate arcades at the sidewalk level with habitable space above.

**DT-Transparency:** Ability to see through a window or door at the pedestrian eye level. The pedestrian eye level is 30 inches to 8 feet up from the sidewalk, following the adjacent sidewalk slope.

**DT-Tower:** Any building with a minimum height of 100 feet or greater.

**DT-Tower Separation:** The horizontal space between the closest exterior points of two or more towers located within a single project limit.

**DT-Tower Setback:** A building setback of a specified distance, measured from the interior property line that occurs at a defined height above average finished grade, when the building exceeds a specified height. No portion of the building envelope can intrude into the required setback above the defined height, except where specifically permitted by code or administrative departure.

**DT-Trigger for Additional Height:** A threshold height above which a proposed building must include reduced floor plates and a percentage of open space at the ground level. See LUC 20.25A.075.

**DT-Weather Protection** – A continuously covered area projecting from a building that functions as weather protection or a canopy projecting from the elevation of the building that is designed to provide pedestrians protection from the elements. Weather protection includes but is not limited to marquees and awnings that are made with durable materials.

**B. General Definitions not applicable to Downtown.** The general definitions contained in Chapter 20.50 LUC apply unless specifically listed below as inapplicable to Downtown.

**Alley.** LUC 20.50.010

**Active Recreation Area.** LUC 20.50.010

**Building Height.** LUC 20.50.012

**Building Height – Transition Area Design Districts.** LUC 20.50.012

**Caliper.** LUC 20.50.014

**Floor Area Ratio. (FAR).** LUC 20.50.020

**Open Space.** LUC 20.50.038

**Setback.** LUC 20.50.046

**Setback, Front.** LUC 20.50.046

**Setback, Rear.** LUC 20.50.046

**Setback, Side.** LUC 20.50.046

**Stepback.** LUC 20.50.046

**Tree-Large Diameter.** LUC 20.50.048

**Tree-Small Diameter.** LUC 20.50.048

### **20.25A.030 Review Required**

#### **A. Applicable Review**

1. Review is Required. All development in Downtown shall be reviewed by the Director consistent with the terms of this Part 20.25A through the administration of Part 20.30V LUC (Master Development Plan), Part 20.30F LUC (Design Review) and Part 20.30L (Development Agreement) using the applicable procedures of Chapter 20.35 LUC. A Master Development Plan is required where there is more than one building or where development of a project is proposed to be phased. Design Review is required on all Downtown projects. A Development Agreement is required for departures from Part 20.25A LUC that are not permitted to be granted through an administrative process.
2. Effect of Approval. Approval of the Design Review, and the Master Development Plan and any Development Agreement where required, shall constitute the regulations governing development and operation of an approved development for the life of the project. Such approval shall be contingent upon compliance with the conditions specified in the approval, conformance with all applicable development standards, the payment of all fees, and the submittal of assurance devices as may be required. The approval shall expire as provided pursuant to LUC 20.40.500, unless otherwise provided for in this Part 20.25A LUC.

#### **B. Master Development Plan**

1. Scope of Approval. Master Development Plan review (Part 20.30V LUC) is a mechanism by which the City shall ensure that the site development components of a multiple building or phased single building proposal are consistent with the Comprehensive Plan and meet all applicable development standards and guidelines. Design, character, architecture and amenity standards and guidelines shall be met as a component of the Design Review (Part 20.30F LUC). Master Development Plan approvals required pursuant to subsection B.2 of this section shall identify proposed building placement within the project limit and demonstrate compliance with the following development requirements, standards, and guidelines:
  - a. Dimensional requirements pursuant to LUC 20.25A.060 as listed below:
    - i. Setbacks;
    - ii. Lot coverage;
    - iii. Building height for each building identified in subsection B.1 of this section;
    - iv. Floor area ratio for each building; and
    - v. Outdoor plaza space required to achieve maximum building heights above the trigger for additional height identified in LUC 20.25A.075.A, or the variable heights allowed by LUC 20.25A.060.A Note 13.
  - b. Areas identified to accommodate required parking with entrance and exit points and required loading shown in relationship to the right-of-way as required pursuant to LUC 20.25A.090.

- c. Areas identified to accommodate street and pedestrian circulation pursuant to LUC 20.25A.090, including the anticipated location of any pedestrian corridor construction, and pedestrian bridges pursuant to LUC 20.25A.100.
  - d. Areas identified to accommodate Major Public Open Spaces and Minor Publicly Accessible Spaces pursuant to LUC 20.25A.090.
  - e. Areas identified to accommodate landscape development pursuant to LUC 20.25A.110.
2. When Required. An applicant for a project with multiple buildings located within a single project limit shall submit a Master Development Plan for approval by the Director pursuant to Part 20.30V LUC. An applicant for a single building project shall submit a Master Development Plan for approval by the Director pursuant to Part 20.30V LUC when building construction is proposed to be phased.
  3. For the purposes of this section, the project limit may be drawn to encompass a right-of-way that bisects a site, provided the Director finds that the following connectivity criteria can be met:
    - a. A system of corner and mid-block crossings shall be provided to functionally connect on-site pedestrian paths across the bisecting right-of-way within the project limit;
    - b. Pedestrian paths shall be provided to connect all buildings and right-of-way crossings located within the proposed project limit;
    - c. Visual connections shall be provided between all buildings located within the project limit by minimizing topographic variation and through use of vegetation and outdoor spaces; and
    - d. Only a right-of-way meeting the requirements of LUC 20.25A.070.C.2 may be included in the land area located within the project limit for the purpose of computing maximum FAR.

#### **C. Design Review**

1. Scope of Approval. Design review is a mechanism by which the City shall ensure that the design, character, architecture and amenity components of a proposal are consistent with the Comprehensive Plan and any previously approved Master Development Plan, and meet all applicable standards and guidelines contained in City Codes including the terms of any departure granted pursuant to paragraph D of this section. Design review is a mechanism by which the City shall ensure that the site development components of a proposal are consistent with the Comprehensive Plan and meet all applicable standards and guidelines contained in City Codes when site development components were not approved as part of a Master Development Plan.
2. When Required. A Design Review is required on all Downtown projects. An applicant shall submit a Design Review application for approval by the Director pursuant to Part 20.30F LUC.
3. Compliance with an applicable Master Development Plan or Departure. In addition to the decision criteria in LUC 20.30F.145, each structure and all proposed development shall comply with any approved Master Development Plan applicable to the project limit described in a Design Review application. If the application for Design Review contains elements inconsistent with an applicable Master Development Plan, the Director shall not approve the design review unless the Master Development Plan is amended to include those elements.

#### **D. Departures**

1. Administrative Departures by the Director. Due to the varied nature of architectural design and the unlimited opportunities available to enhance the relationship that occurs between the built environment and the pedestrians, residents and commercial tenants that use built spaces, strict application of the Land Use Code may not always result in the Downtown livability outcomes envisioned by the Comprehensive Plan. The purpose of this subsection is to provide an administrative departure process to modify provisions of the Land Use Code when strict application would result in a Downtown development that does not fully achieve the policy vision as it is articulated in the general sections of the Comprehensive Plan and the Downtown Subarea Plan.

- a. Applicability. The Director may, through the Master Development Plan or Design Review processes, approve a proposal that departs from specific numeric standards contained in LUC 20.25A.090, LUC 20.25A.110 and LUC 20.25A.140 through LUC 20.25A.180, or that departs from Land Use Code requirements that specifically provide an opportunity for the Director to approve a departure subject to the provisions of this paragraph. For example, specific administrative departures are allowed from the dimensional requirements pursuant to the terms of LUC 20.25A.060.B, that describes a range of exceptions and intrusions that can be approved as part of a permit review process.
- b. Decision Criteria. The Director may approve or approve with conditions a departure from applicable provisions of the Land Use Code if the applicant demonstrates that the following criteria have been met:
  - i. The resulting design will advance a Comprehensive Plan goal or policy objective that is not adequately accommodated by a strict application of the Land Use Code; and
  - ii. The resulting design will be more consistent with the purpose and intent of the Land Use Code; and
  - iii. The modification is the minimum reasonably necessary to achieve the Comprehensive Plan objective or Land Use Code intent; and
  - iv. Any administrative departure criteria required by the specific terms of the Land Use Code have been met; or
  - v. The modification is reasonably necessary to implement or ensure consistency with a departure allowed through a Development Agreement approved pursuant to LUC 20.25A.030.D.2.
- c. Limitation on Authority. Administrative departures may only be approved consistent with the limitations contained in the Land Use Code section that authorizes the departure, or through a variance granted under the terms of Part 20.30G LUC. This paragraph does not limit the ability of an applicant to pursue legislative departures that are authorized through a Development Agreement (Part 20.30L) pursuant to the terms of LUC 20.25A.030.D.2.

2. City Council Departures. There are many opportunities for creativity and innovation in the design of Downtown projects that advance the vision and policy goals articulated in the Comprehensive Plan. The accommodation of iconic opportunities can be constrained by the code, the amenity list and associated Amenity Design Criteria that were drafted to foster development of a livable Downtown while ensuring timely, predictable and consistent administration of regulations that are drafted to be applicable to a widely variable range of projects. The purpose of this subsection is to provide a

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

departure process to create a Flexible Amenity as envisioned in LUC 20.25A.070.D.18, and to approve final construction design for privately developed spaces that function as part of the public realm.

- a. Applicability. The City Council may, through a Development Agreement processed in accordance with Part 20.30L LUC:
  - i. Award FAR Amenity Incentive points for a Flexible Amenity subject to the terms of LUC 20.25A.070.D.18; or
  - ii. Approve the final construction design for the following features that function as part of the public realm:
    - (1) Pedestrian Bridges identified in LUC 20.25A.100;
    - (2) Pedestrian Corridor Design Development Plans that depart from the conceptual designs contained in the Pedestrian Corridor Design Guidelines; and
    - (3) Major Public Open Space Design Development Plans that depart from the conceptual designs contained in the Major Public Open Space Design Guidelines.
- b. Decision Criteria. The City Council may approve or approve with conditions a Legislative Departure from strict application of the Land Use Code consistent with the requirements of Part 20.30L LUC (Development Agreements).

c. Limitations on Modification.

- i. Development Agreements are an exception, and not the rule and shall not be used to vary provisions of the Land Use Code which, by the terms of that Code, are not identified as appropriate for modification through Part 20.30L LUC (Development Agreements).
- ii. Development Agreements shall not be used to depart from the FAR bonus values adopted for the amenities specifically identified in LUC 20.25A.070.D.
- iii. Development Agreements shall not be used for proposals that are capable of being approved through administration of the Master Development Plan or Design Review processes using the flexibility tools such as administrative departures and variances that currently exist in the code.
- iv. Development Agreements shall not be used to vary the procedural provisions contained in Chapters 20.30 or 20.35 LUC.

**E. Procedural Merger**

Within a Downtown Land Use District, any administrative decision required by this Part 20.25A or by the Land Use Code, including but not limited to the following, may be applied for and reviewed as a single Process II Administrative Decision, pursuant to LUC 20.35.200 through 20.35.250:

1. Master Development Plan, Part 20.30V LUC;
2. Administrative Conditional Use Permit, Part 20.30E LUC;
3. Design Review, Part 20.30F LUC; and
4. Variance, Part 20.30G LUC.

**20.25A.040 Nonconforming uses, structures and sites.**

**A. Nonconforming Uses.**

1. A nonconforming use may be continued by successive owners or tenants, except where the use has been abandoned. No change to a different use classification shall be made unless that change conforms to the regulations of this Land Use Code.
2. If a nonconforming use of a structure or land is discontinued for a period of 12 months with the intention of abandoning that use, any subsequent use shall thereafter conform to the regulations of the Land Use District in which it is located. Discontinuance of a nonconforming use for a period of 12 months or greater constitutes prima facie evidence of an intention to abandon.
3. A nonconforming use may be expanded pursuant to an Administrative Conditional Use Permit.

**B. Nonconforming Structures.**

1. A nonconforming structure may be repaired or remodeled, provided there is no expansion of the building, and provided further, that the remodel or repair shall not increase the existing nonconforming condition of the structure.
2. A nonconforming structure may be expanded; provided, that the expansion conforms to the provisions of the Land Use Code, except that the requirements of LUC 20.25A.140 through 20.25A.180 shall be applied as described in paragraphs B.3 and B.4 of this section.
3. For expansions made within any three-year period, which together do not exceed 50 percent of the floor area of the previously existing structure, the following shall apply:
  - a. Where the property abuts a street classified as a 'D' or 'E' right-of-way, the expansion is not required to comply with LUC 20.25A.140 through 20.25A.180.
  - b. Where the property abuts a street classified as an 'A', 'B' or 'C' right-of-way the expansion shall be in the direction of the classified street so as to reduce the nonconformity of the structure, except that an expansion, which is no greater than 300 square feet in floor area and which is for the purpose of loading or storage, is exempted from this requirement.
4. For expansions made within any three-year period, which together exceed 50 percent of the floor area of the previously existing structure, the structure shall be brought into conformance with LUC 20.25A.140 through 20.25A.180.
5. If a nonconforming structure is destroyed by fire, explosion, or other unforeseen circumstances to the extent of 100 percent or less of its replacement value, it may be reconstructed consistent with its previous nonconformity. Provided that, the reconstruction may not result in an expansion of the building, nor an increase in the preexisting nonconforming condition of the structure.

**C. Nonconforming Sites.**

1. A nonconforming site may not be changed unless the change conforms to the requirements of this Code, except that parking lots may be reconfigured within the existing paved surface. This paragraph shall not be construed to allow any parking lot reconfiguration that would result in a parking supply that does not conform to the minimum/maximum parking requirements for the Downtown, LUC 20.25A.080.
2. A structure located on a nonconforming site may be repaired or remodeled, provided there is no expansion of the building, and provided further, that the remodel or repair shall not increase the existing nonconforming condition of the site.
3. For expansions of a structure on a nonconforming site made within any three-year period, which together exceed 20 percent of the replacement value of the previously existing structure:
  - a. Easements for public sidewalks shall be provided, unless the Director of the Department of Transportation determines such easements are not needed; and
  - b. A six-foot-wide walkway shall be provided from the public sidewalk or street right-of-way to the main building entrance, unless the Director determines the walkway is not needed to provide safe pedestrian access to the building. The Director may allow modification to the width of walkways so long as safe pedestrian access to the building is still achieved.
4. Expansions of a structure located on a nonconforming site, made within any three-year period, which together do not exceed 50 percent of the previously existing floor area, do not require any increase in conformance with the site development provisions of this Code, except as otherwise provided in B.3 of this section.
5. Expansion of a structure located on a nonconforming site made within any three-year period, which together exceed 50 percent of the floor area of the previously existing structure, shall require compliance with the site development provisions of this Code.

## **20.25A.050 Downtown Land Use Charts**

### **A. Permitted Uses.**

Specific categories of uses are listed in Chart 20.25A.050.D. Paragraph C of this section explains Chart 20.25A.050.D, and describes the applicable review procedures. The use chart description and interpretation provisions of LUC 20.10.400 do not apply in Downtown.

### **B. Prohibited Uses.**

The manufacturing use table has been removed from Downtown because there are no manufacturing uses that are generally permitted in any Downtown Land Use District unless they have been specifically added to another chart such as wholesale and retail.

### **C. Use Chart Description and Interpretation.**

1. Description. In Chart 20.25A.050.D, land use classifications and standard Land Use Code reference numbers are listed on the vertical axis. Downtown Land Use Districts are shown on the horizontal axis.
  - a. If no symbol appears in the box at the intersection of the column and the row, the use is not allowed in that Land Use District, except for short-term uses, which are regulated under Part 20.30M LUC (Temporary Use Permits), and subordinate uses which are regulated under LUC 20.20.840.
  - b. If the symbol “P” appears in the box at the intersection of the column and row, the use is permitted subject to applicable general requirements of Chapter 20.20 LUC for the use and the Land Use District-specific requirements of this Part 20.25A LUC.
  - c. If the symbol “C” appears in the box at the intersection of the column and the row, the use is permitted subject to the Conditional Use provisions specified in Part 20.30B in addition to any applicable general requirements for the use and the Land Use District.
  - d. If the symbol “A” appears in the box at the intersection of the column and the row, the use is permitted subject to the Administrative Conditional Use provisions as specified in Part 20.30E LUC in addition to any applicable general requirements for the use and the Land Use District.
  - e. If a number appears in the box at the intersection of the column and the row, the use is permitted through the applicable review process and subject to the special limitations indicated in the corresponding Notes.
2. Interpretation of the Land Use Code Charts by the Director. In the case of a question as to the inclusion or exclusion of a particular proposed use in a particular use category, the Director shall have the authority to make the final determination per LUC 20.10.420.

**D. Use Charts.**

The following charts apply to Downtown. The use charts contained in LUC 20.10.440 do not apply within the Downtown Land Use Districts.

Notes: Uses in Downtown Land Use Districts – Services

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- (1) Refer to Chapter 20.50 LUC for definitions of child care service, family child care home, and child day care center.
- (2) A child care service may be located in a community facility in any Land Use District pursuant to LUC 20.20.170.E.
- (3) Auto repair and washing services are permitted only if washing services are a subordinate use pursuant to LUC 20.20.840. All auto repair shall be performed in a structure.
- (4) Limited to a maximum of 2,000 gross square feet per establishment.
- (5) Nonresidential uses are permitted in the Downtown-R District only if developed in a building that contains residential uses.
- (6) Uses are limited to 1,000 square feet, except for protective functions that are limited to community police stations of 1,500 square feet or less.
- (7) Primary and secondary educational facilities are an administrative conditional use in all Land Use Districts; provided, that in the DNTN-R District a Conditional Use Permit is required for:
  - (a) The siting of such educational facility on a site not previously developed with an educational facility; or
  - (b) The addition to or modification of a site previously developed with an educational facility where that addition or modification involves:
    - (i) An increase of 20 percent or more in the number of students occupying the school. The increase shall be measured against the number of students for which the school was designed prior to the addition or modification, without regard to temporary structures that may have been added to the site over time. If there is no information establishing the number of students for which the school was originally designed, then the increase shall be measured against the average number of students occupying the school in the three academic years immediately preceding the proposed addition or modification; or
    - (ii) A change in the age group of students occupying the school, or the addition of an age group where such age group was not previously served at the school, except that the addition of students younger than kindergarten age consistent with the definition of school in LUC 20.50.046 shall not be considered a change in the age group of students or an addition of an age group for purposes of this subsection. For purposes of this subsection, age group refers to elementary, middle, junior or high school, as defined and used by the school district operating the school; or
    - (iii) The addition of facilities or programs that may result in impacts not anticipated at the time the original school was developed, including, for example: development of lighted ballfields or the addition of lighting to existing ballfields; development of an exterior sound amplification system; development of fixed outdoor seating; or a proposal to increase the height of the facility pursuant to LUC 20.20.740.A.3.b.
- (8) Battery exchange stations are ancillary to auto repair and washing services, and are permitted through the applicable review process as a component of that use. Operators of battery exchange stations shall comply with federal and state law regulating the handling, storage, and disposal of batteries.
- (9) Boarding and commercial kennels are permitted as a subordinate use to a pet grooming or pet day care meeting the criteria of LUC 20.20.130.

## Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

(10) Drive-in and drive-through facilities are permitted as a subordinate use pursuant to LUC 20.20.840 only if located within a structured parking area and not adjacent to any publicly accessible space. Parking shall comply with LUC 20.25A.080.A.

(11) When the use occupies less than or equal to 2,000 square feet, the use is permitted outright. When the use occupies more than 2,000 square feet, an Administrative Conditional Use Permit is required.

(12) Stand-alone emergency rooms shall only be allowed when affiliated with a hospital.

	Electrical Utility Facility (11)	A/C	A/C	A/C	A/C	A/C	A/C

**Notes: Uses in Downtown Land Use Districts – Transportation and Utilities**

- (1) The location of an off-site parking facility requires Director approval. See LUC 20.25A.080.D.
- (2) Accessory parking requires approval through the review process required for the primary land use that it serves pursuant to this section.
- (3) Aircraft transportation is limited in these Land Use Districts to government heliports used exclusively for emergency purposes and regulated pursuant to the terms of LUC 20.20.450.
- (4) Aircraft transportation is limited in these Land Use Districts to government and hospital heliports used exclusively for emergency purposes and regulated pursuant to the terms of LUC 20.20.450.
- (5) Design Review approval, Part 20.30F LUC, is required to establish a commercial parking facility. Refer to LUC 20.25A.080.E for additional development requirements.
- (6) Wireless communication facilities (WCFs) are not permitted on any residential structure, undeveloped site located in a residential land use district, or site that is developed with a residential use; except WCFs are allowed on mixed-use buildings that include residential uses. This note does not prohibit locating WCF: on any nonresidential structure (i.e., churches, schools, public facility structures, utility poles, etc.) or in public rights-of-way in any residential land use district.

## Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

(7) Refer to LUC 20.20.195 for general requirements applicable to wireless communication facilities and other communication, broadcast and relay facilities.

(8) Refer to LUC 20.20.730 for general requirements applicable to large satellite dishes.

(9) Refer to LUC 20.20.350 for general requirements applicable to essential public facilities (EPF).

(10) Antenna and associated equipment used to transmit or receive fixed wireless signals when located at a fixed customer location are permitted in all Downtown Land Use Districts and are exempt from the requirements of LUC 20.20.010, 20.20.195 and 20.20.525 so long as the antenna and equipment comply with 47 C.F.R. 1.400, now or as hereafter amended. A building permit may be required to ensure safe installation of the antenna and equipment.

(11) For the definition of electrical utility facility, see LUC 20.50.018, and for reference to applicable development regulations relating to electrical utility facilities, see LUC 20.20.255. For new or expanding electrical utility facilities proposed on sensitive sites as described by Map UT-7 of the Utilities Element of the Comprehensive Plan, the applicant shall obtain Conditional Use Permit approval under Part 20.30B LUC, complete an alternative siting analysis as described in LUC 20.20.255.D and comply with decision criteria and design standards set forth in LUC 20.20.255. For expansions of electrical utility facilities not proposed on sensitive sites as described by Map UT-7, the applicant shall obtain Administrative Conditional Use Permit approval under Part 20.30E LUC and comply with decision criteria and design standards set forth in LUC 20.20.255.

(12) Electric vehicle infrastructure, excluding battery exchange stations, is ancillary to motor vehicle parking and highways and rights-of-way, and is permitted through the applicable review process as a component of that use.

(13) Refer to Part 20.25M LUC, Light Rail Overlay District, for specific requirements applicable to EPF defined as a regional light rail transit facility or regional light rail transit system pursuant to LUC 20.25M.020. A Conditional Use Permit is not required when the City Council has approved a regional light rail transit facility or regional light rail transit system by resolution or ordinance, or by a development agreement authorized by Chapter 36.70B RCW and consistent with LUC 20.25M.030.B.1.

(14) Accessory parking is not permitted in residential land use districts as accessory to uses that are not permitted in these districts.

**Notes: Uses in Downtown Land Use Districts – Wholesale and Retail**

- (1) Nonresidential uses are permitted in Downtown-R Districts only when developed within the same project limit and simultaneously with an equal or greater amount of floor area devoted to residential uses.
- (2) No on-site outdoor display or inventory storage. Loading and unloading shall not be permitted in the right-of-way.
- (3) Food and convenience stores (retail) shall contain at least 75 percent square footage of retail food sales not for consumption on premises.
- (4) Drive-in windows and drive-throughs are not permitted.
- (5) Limited to a maximum of 15,000 gross square feet per establishment or up to 25,000 gross square feet through a conditional use.
- (6) Adult retail establishments are subject to the regulations for adult entertainment uses in LUC 20.20.127.
- (7) Microbrewery manufacturing is permitted when combined with an eating and drinking establishment.
- (8) All wholesale and retail uses, which offer shopping carts to customers, shall (a) designate a shopping cart containment area as defined in BCC 9.10.010; (b) display signage around shopping cart corrals and at the perimeter of the shopping cart containment area that provides notice that unauthorized removal of a shopping cart from the premises constitutes theft under RCW

## Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

9A.56.270 and unauthorized abandonment of a shopping cart more than 100 feet away from the parking area of a retail establishment or shopping cart containment area is a Class 3 civil infraction as defined in RCW 7.80.120; and (c) display information on each shopping cart that is consistent with the labeling requirements of RCW 9A.56.270 and includes a 24-hour toll-free phone number to report abandoned shopping carts. Abandoned shopping carts or shopping carts located outside of a shopping cart containment area constitute a public nuisance under BCC 9.10.030(H) and may be abated through the provisions of Chapter 1.18 BCC.

(9) Battery exchange stations are ancillary to gasoline service stations, and are permitted through the applicable review process as a component of that use. Operators of battery exchange stations shall comply with federal and state law regulating the handling, storage, and disposal of batteries.

(10) See LUC 20.20.535 for general development requirements for marijuana uses.

(11) Handcrafted product manufacturing is permitted subordinate to a retail establishment selling that product; provided, that the manufacturing use occupies not more than 50 percent of the total square footage of the combined establishment.

(12) Drive-in and drive-through pharmacies are permitted as a subordinate use pursuant to LUC 20.20.840 only if located within a structured parking area and not adjacent to any publicly accessible space.

(13) Garden supplies excludes items such as large trees, rock and bulk supplies that require special handling equipment.

(14) No unreasonable threat to human health and the environment shall be caused by flammable, dangerous or explosive materials associated with this use.

(15) A recycling center is allowed as a subordinate use if it is consistent with LUC 20.20.725.

**Notes: Uses in Downtown Land Use Districts – Resources**

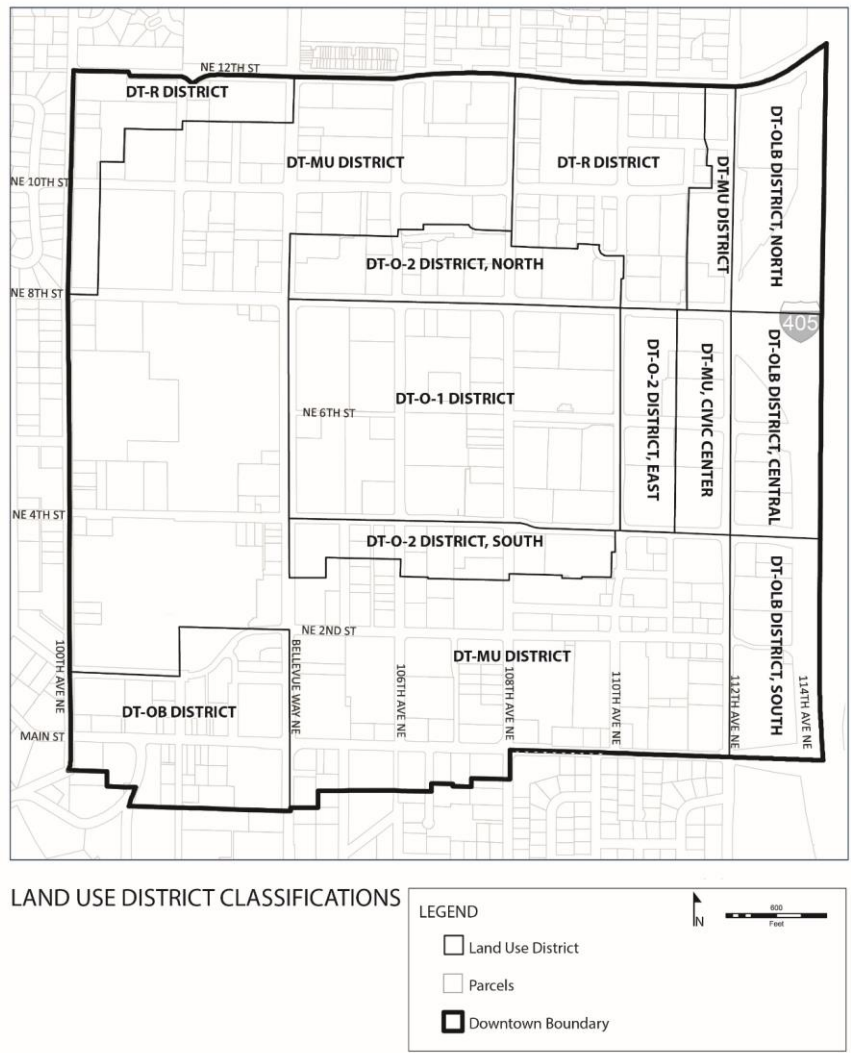

- (1) See LUC 20.20.130 for general requirements applicable to this use.
- (2) When the veterinary clinic and animal hospital occupies less than or equal to 2,000 square feet, the use is permitted outright. When the veterinary clinic and hospital occupies more than 2,000 square feet, an Administrative Conditional Use Permit is required.
- (3) Boarding, commercial kennels, pet grooming, and pet daycare are permitted as a subordinate use to a veterinary clinic or animal hospital meeting the criteria of LUC 20.20.130.
- (4) Medical cannabis collective gardens are prohibited in Bellevue.

## **20.25A.060 Dimensional Charts**

### **A. Dimensional Requirements in Downtown Land Use Districts.**

1. General. The provisions of this section set forth the dimensional requirements for each Land Use District and Perimeter Overlays in Downtown as depicted in LUC Figures 20.25A.060.A.2 and 3. Each structure, development, or activity in a Downtown Land Use District shall comply with these requirements except as otherwise provided in this Part. In Downtown, front setbacks rarely apply. Buildings are built to the “build-to” line, which is either the property line or the right-of-way line, except where a plaza, building modulation or other ground-level open space is proposed.
2. Land Use District Map. Figure 20.25A.060.A.2 illustrates the locations of the Downtown Land Use Districts. The Land Use District Map should be viewed together with the Perimeter Overlay Map below for a complete overview of the zoning applicable on any specific site.

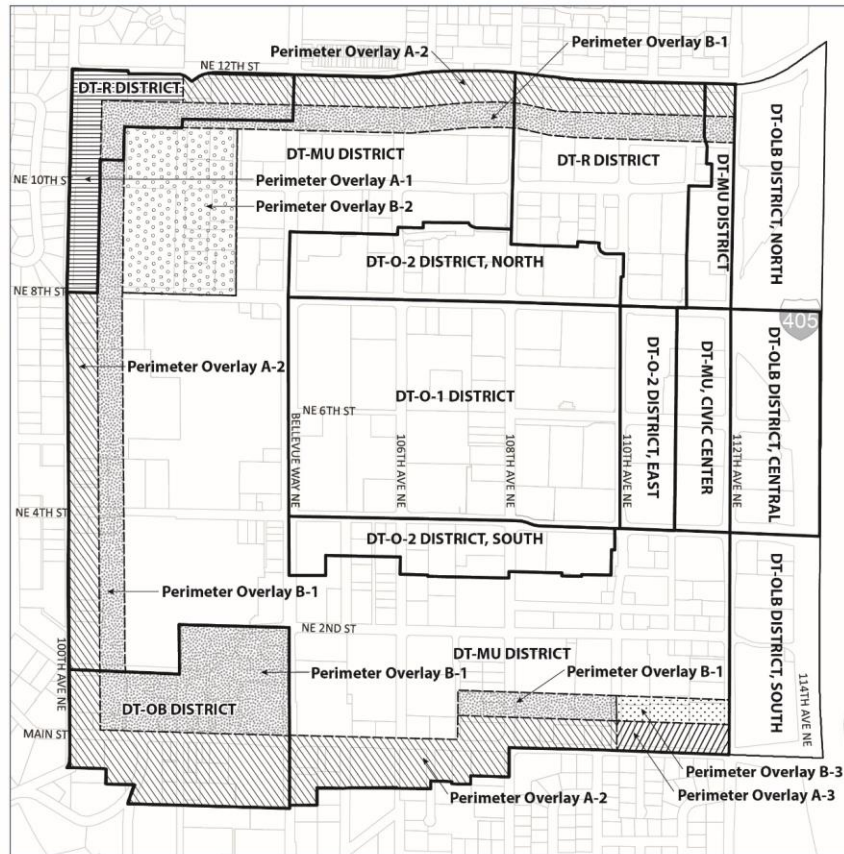

Figure 20.25A.060.A.2

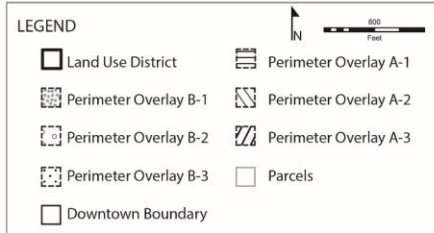

3. Perimeter Overlay Map. Figure 20.25A.060.A.3 illustrates the locations of the Downtown Perimeter Overlays in relationship to the Downtown Land Use Districts. The Perimeter Overlay Map should be viewed together with the Land Use District Map above for a complete overview of the zoning applicable on a site. In addition to the applicable Land Use District, a site may be governed partially or entirely by a Perimeter Overlay.

**Figure 20.25A.060.A.3**

DRAFT

LAND USE DISTRICT CLASSIFICATIONS  
AND PERIMETER OVERLAYS

Attachment C

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

4. Dimensional Chart. Chart 20.25A.060.A.4 sets forth the dimensional requirements applicable to each Land Use District and Perimeter Overlay that are mapped in Figures 20.25A.060.A.2 and 3 above.

Note: For the purposes of this dimensional chart, the DT-O-2, DT-MU, and DT-OLB are divided into smaller areas. The rest of this Part 20.25A does not divide these districts into smaller areas.

**20.25A.060**

**Notes: Dimensional requirements in Downtown Land Use Districts and Perimeter Overlays**

(1) Minimum setbacks from Downtown boundary are subject to required landscape development. See LUC 20.25A.110.

Attachment C

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- (2) A single building is considered residential if more than 50 percent of the gross floor area is devoted to residential uses. See LUC 20.50.020 for the definition of “floor area, gross.”
- (3) The maximum permitted FAR may only be achieved by participation in the FAR Amenity Incentive System, LUC 20.25A.070. Where residential and nonresidential uses occur in the same building, the FAR is limited to the maximum FAR for the building type as determined in accordance with Note (2).
- (4) See paragraph B of this section for exceptions to the minimum setback and maximum building floor plate requirements.
- (5) Hotels and motels shall be considered as residential structures for all dimensional standards except for maximum floor plate where they shall be considered nonresidential.
- (6) On lots that are bisected by the Downtown boundary, the Director may allow the minimum setback from the Downtown boundary to be measured from the perimeter property lines abutting other lots located outside the Downtown boundary. The modification shall be consistent with the Perimeter Overlay purpose statement contained in 20.25A.010.B. This provision may be used to modify only the setback location and not the minimum setback size.
- (7) Refer to LUC 20.25A.075.A for additional requirements when exceeding the trigger for additional height.
- (8) No additional building height allowed.
- (9) No additional height allowed for parking garages. Any mechanical equipment shall be placed inside the structure.
- (10) No additional building height above the maximum shall be permitted through the administrative departure process.
- (11) The DT-OB district has no maximum heights or floor area ratios that are independent of the Perimeter Overlays because the entire district is covered by overlays. The applicable maximum heights and floor area ratios in the DT-OB district shall be controlled by the applicable perimeter overlay provisions.
- (12) Within Perimeter Overlay B-2, multiple tower projects are allowed variable tower heights of 176 feet to 264 feet with an average of no more than 220 feet. Master Development Plan approval is required. Multiple tower projects that straddle the Perimeter Overlay B-2 and DT-MU Districts in the Northwest Village Neighborhood of Downtown are allowed to locate a single tower within the Perimeter Overlay B-2 that does not exceed a maximum height of 264 feet. Single tower projects within the Perimeter Overlay B-2 shall be limited to 220 feet unless the Director approves an Administrative Departure pursuant to LUC 20.25A.030.D.
- (13) Underground buildings as defined in LUC 20.50.050 are not structures for the purpose of calculating lot coverage.
- (14) The tower setback shall be applied from interior property lines only. Refer to LUC 20.25A.075 for Downtown Tower Requirements, which also includes an exception for small sites and opportunities to depart from dimensional requirements applicable to towers located in Downtown.
- (15) Towers in the Perimeter Overlay B-2 shall be subject to the 60-foot tower separation above 80 feet if the building exceeds 100 feet.
- (16) ~~Modification with Criteria for Buildings between 80 and 150 feet in the DT-OLB South District.~~ The maximum floor plate between 80 and 150 feet may be increased through an administrative departure pursuant to 20.25A.030.D.1 if the following criteria are met:
- a. The maximum allowed floorplates above 80 feet are increased by no more than 25 percent;

**Commented [BT(3)]:** Deleted so that footnote could be applied to DT-OLB Central as well as DT-OLB South, per Council direction on September 5, 2017.

Attachment C

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- b. All buildings or portions of buildings located above 40 feet shall include a minimum building separation of 40 feet. The required separation shall provide for a continuous building separation corridor that extends between I-405 and 112<sup>th</sup> Ave NE;
- c. The applicant demonstrates that the increased floorplate size does not affect the light, air or privacy for pedestrians or adjacent properties, and any publicly accessible space that is located in the vicinity; and
- d. Complies with all other dimensional standards of 20.25A.060.

(17) The additional 20 feet allowed for mechanical equipment is uninhabitable space.

(18) The area west of 106<sup>th</sup> Avenue NE in the DT-O-2 South District shall be limited to 288 feet with 20 feet additional height available for mechanical equipment.

(19) Measured from inside edge of required sidewalk, if applicable. If existing utilities which cannot reasonably be relocated result in the planting of street trees on the property side of a sidewalk as provided for in LUC 20.25A.090, five feet are added to the required setback.

(20) On the Major Pedestrian Corridor, the trigger for additional height in the DT-O1 for nonresidential shall be 450 feet.

(21) On the Major Pedestrian Corridor, the base height in the DT-O1 for nonresidential shall be 450 feet.

**Commented [BT(4)]:** Errata. Left out footnote in previous versions. 8.16.17

**Commented [BT(5)]:** Council direction 7.17.17

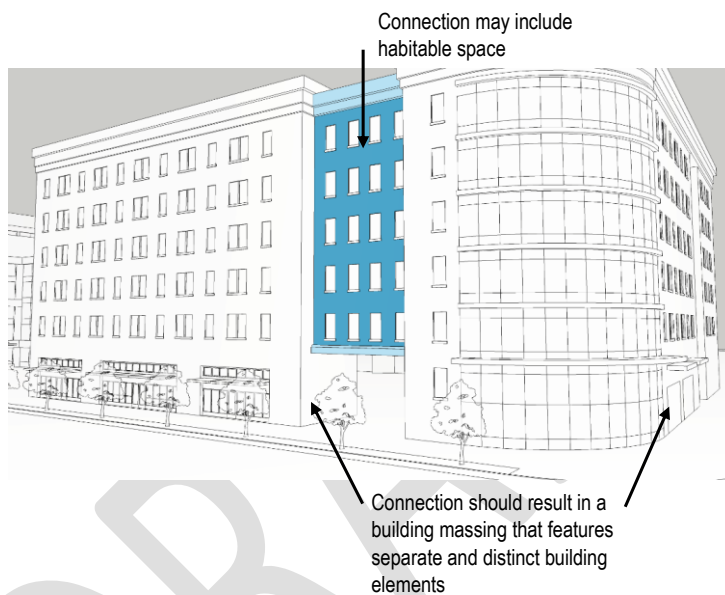

**Commented [BT(6)]:** Council direction 7.17.17

#### B. Exceptions to Dimensional Requirements.

Exceptions authorized pursuant to this paragraph shall be reviewed as administrative departures subject to the terms of LUC 20.25A.030.D.1.

##### 1. Floor Plate Exceptions.

- a. Connecting Floor Plates. For structures that do not exceed 70 feet in height (as defined by the International Building Code, as adopted and amended by the City of Bellevue), the Director may approve the connection of floor plates above 40 feet such that those floor plates exceed the "Maximum Building Floor Area per Floor Above 40 Feet;" provided, that:
  - i. The connection is to allow for safe and efficient building exiting patterns;
  - ii. The connecting floor area shall include required corridor areas, but may include habitable space;
  - iii. The alternative design results in a building mass that features separate and distinct building elements;
  - iv. The connection shall act as a dividing point between two floor plates, neither of which exceed the maximum floor plate size; and
  - v. The connecting floor area shall comply with the design guidelines for Connecting Floor Plates in LUC 20.25A.180.C.

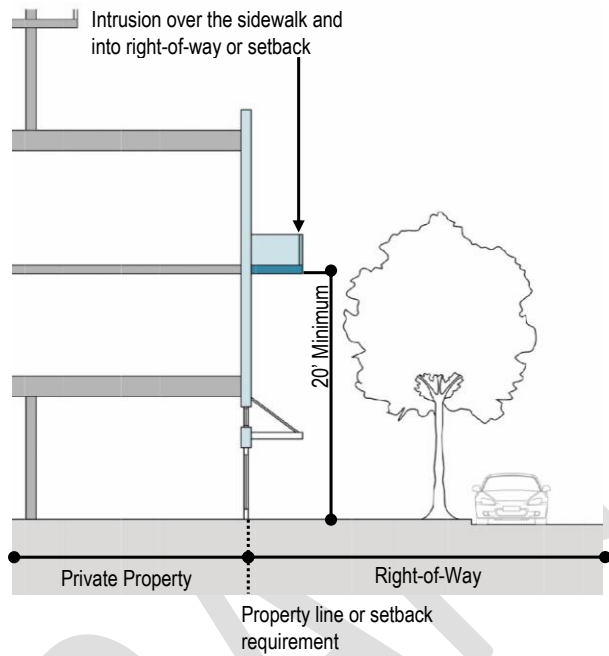

b. Performing Arts Centers may have unlimited floorplates up to 100 feet in height, measured from average finished grade, provided that:

- i. The floor plate exception applies only to that portion of the building that contains the performing arts use;
- ii. The area is the minimum area necessary to accommodate the performing arts use;
- iii. Subordinate uses do not exceed 25 percent of the total area; and
- iv. The ground floor design is consistent with the design guidelines for “A” rights-of-way, excluding the arcade provision.

2. Intrusions into Required Dimensional Standards.

- a. Intrusions over the Sidewalk

- i. Marquees, awnings, or other kinds of weather protection that comply with the requirements of 20.25A.170.A.2.b are permitted to extend over the public right-of-way upon approval of the Director of the Transportation Department and the Director notwithstanding the provisions of the Sign Code, Chapter 22B.10 BCC, or any other City Code.
- ii. External decks and balconies are permitted to extend over the right-of-way upon approval of the Director or the Transportation Department and the Director and shall be a minimum clearance of 20 feet above the right-of-way, and no greater in depth than 50 percent of the width of the required sidewalk.
- iii. On Mixed Streets and Neighborhood Streets, as defined by LUC 20.25A.010.B.2.5.c and d, building structure, external decks, and balconies are permitted to extend over the sidewalk and enhanced streetscape area to the property line above a minimum clearance of 20 feet above the right-of-way, except when a setback or stepback precludes such extension.
- b. Intrusions into Setbacks
  - i. Architectural elements such as louvers and fins may intrude into the setback upon approval of the Director.
  - ii. External decks and balconies that intrude into the tower setback are permitted upon approval of the Director.
- c. Intrusions into Stepbacks
  - i. The Director may approve modifications to the minimum required stepback if:
    - (1) The applicant can demonstrate that the resulting design will be more consistent with the Design Guidelines of 20.25A.140 through 20.25A.180; and
    - (2) The intrusions for building modulation or weather protection features shall be a maximum of 20 percent of the length of the whole façade, 25 percent of the depth of the required stepback, and a maximum of 10 feet in length per intrusion.
  - ii. The Director may approve modifications to the stepback requirements for performing arts centers if:
    - (1) Interesting roof forms, significant floor plate modulation, significant façade modulation, or other such unique architectural features are provided to minimize impacts to abutting structures.

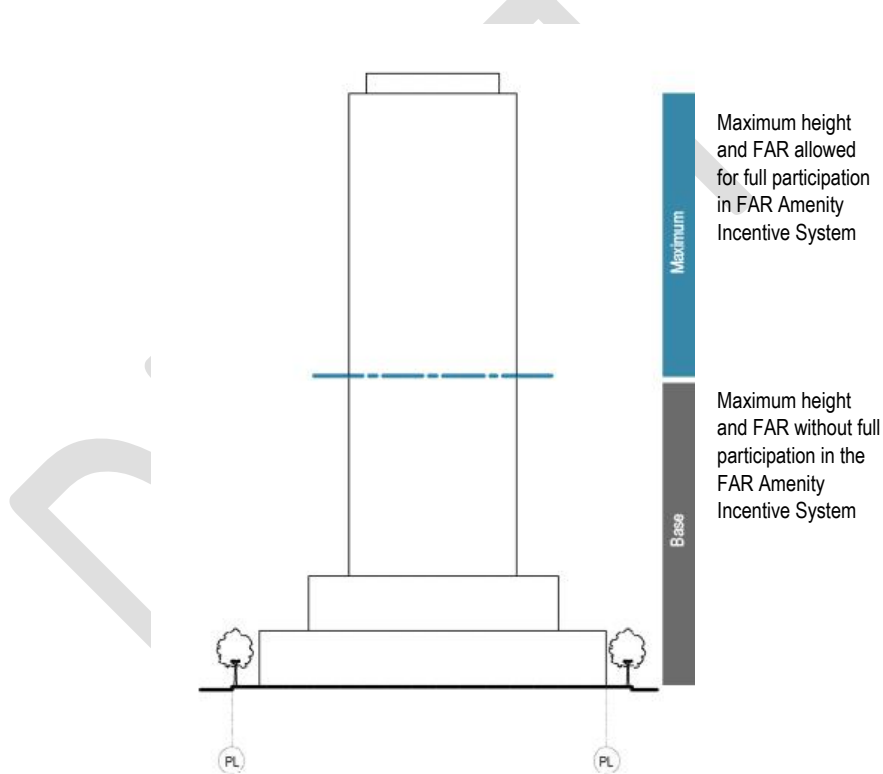

3. Height Exceptions for Mechanical Equipment. The Director may approve intrusions that are necessary for mechanical equipment, such as elevator overruns, up to a maximum of 20 feet.

#### 20.25A.070 Amenity Incentive System and Floor Area Ratio

##### A. General.

A building may exceed the base floor area ratio or base building height permitted for development within a Downtown Land Use District or Perimeter Overlay pursuant to LUC 20.25A.060.A.4 only if it complies with the requirements of this section. In no case may the building exceed the maximum floor area ratio permitted for the district or overlay unless expressly permitted by the terms of this code. The bonus ratios have been calibrated by neighborhood to provide higher incentives for amenities that contribute to neighborhood character objectives.

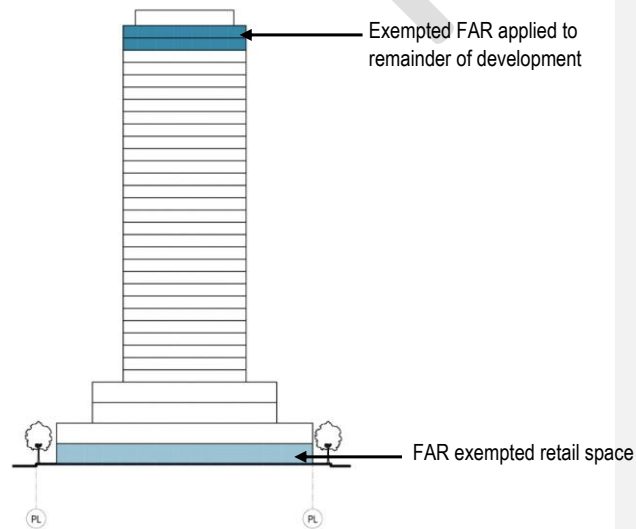

##### B. Required Review.

The Director may approve an amenity that complies with subsection D of this section if all the specific amenity system requirements are satisfied and established design criteria for the amenity have been met.

C. FAR Exemptions, Special Dedications, and Conversion of Previously Approved Exempt Retail Activity Space.

1. FAR Exemption for Ground Level and Upper Level Active Uses. For purposes of applying the Amenity Incentive System, a level shall be considered the ground level so long as less than half of that ground level story height is located below the average finished grade of the adjacent public right-of-way or pedestrian connection. The single building story immediately above the ground level story and intended to activate the ground level pedestrian environment through demonstrated compliance with the Upper Level Active Uses design guidelines contained in LUC 20.25A.170.D, shall be considered an upper level.

- a. Ground Level Floor Areas Meeting the Definition of Active Uses. Each square foot of ground level floor area of active uses that satisfies the requirements of 20.25A.020.A and complies with the design guidelines contained in LUC 20.25A.170.B.1 (Pedestrian Corridor / High Streets – A Rights of Way) shall be eligible for an exemption from calculation of maximum floor area of up to 1.0 FAR, except where specifically provided by the terms of this code.

- b. Upper Level Floor Areas Meeting the Definition of Active Uses. Each square foot of upper level floor area of active uses that satisfies the requirements of LUC 20.25A.020.A and complies with the design guidelines contained in LUC 20.25A.170.D (Upper Level Active Uses) shall be eligible for an exemption from calculation of maximum floor area of up to 0.5 FAR, except where specifically provided by the terms of this code.

c. Designation of an Active Use. The Director may approve an Active Use not otherwise listed in the definition contained in LUC 20.25A.020, through an administrative departure pursuant to LUC 20.25A.030.D.1 if the following criteria are met:

- i. The use is within a building and supports pedestrian activity;
- ii. The use promotes a high degree of visual and physical interaction between the building interior and the adjacent public realm; and
- iii. The use meets the design criteria in FAR Exemption for Ground Level and Upper Level Active Uses in LUC 20.25A.070.C.1.a and b, and the design guidelines for the applicable right-of-way designation in LUC 20.25A.170.B.

2. FAR Exemption for Affordable Housing (RESERVED). Affordable Housing Development Flexibility. A maximum of 1.0 FAR of floor area may be exempted to support the provision of affordable housing, minimum parking may be reduced, and additional development flexibility allowed, as provided below.

a. Up to 1.0 FAR of floor area dedicated to support the creation of on-site affordable housing shall not be counted for the purposes of calculating the FAR of a project, provided that:

- i. For every 1.0 square feet of affordable housing provided at 80 percent AMI, 2.5 square feet is allowed for market rate housing not to exceed a maximum of 1.0 FAR total;
- ii. The bedroom mix and exterior finishes shall be comparable to the market rate units, but interior design, unit size, amenities and interior finishes may vary; and
- iii. An agreement in a form approved by the City will be executed by the applicant and recorded with the King County Record's Office, or its successor organization, requiring the affordable housing to remain for the life of the project. This agreement shall be a covenant running with the land, binding on assigns, heirs, and successors of the applicant.

b. Reduced Minimum Parking Ratio for Affordable Units. Affordable studio and one-bedroom units located in projects meeting the requirements of LUC 20.25A.C.2.a shall have a minimum parking ratio of 0.5 stalls per unit.

c. Additional Development Flexibility. Projects that provide 0.5 FAR or greater of the exempt floor area earned through the provisions of on-site affordable housing may:

- i. Increase the maximum lot coverage by five percent in Perimeter Overlay Districts A-1, A-2, A-3, B-1, and B-2; and
- ii. Decrease the upper level setbacks required in LUC 20.25A.075.C by a maximum of five feet.

**Commented [BT(7)]:** Added per Council direction on Sept. 18.

3. Floor Area Earned from Special Dedications

a. General. Land that is dedicated to the City of Bellevue for right-of-way or to accommodate the linear alignment of an RLRT system without compensation to the owner in conformance with subsection 3.b of this section is included in land area for the purpose of computing maximum FAR notwithstanding the definition of floor area ratio (FAR) contained in LUC 20.25A.020.A.

b. Special Dedications.

i. A property owner may make a special dedication by conveying land identified for right-of-way or linear alignment of an RLRT system acquisition in a Transportation Facilities Plan of the Comprehensive Plan, the Transportation Facilities Plan adopted by the City Council or the Capital Investment Program Plan to the City of Bellevue by an instrument approved by the City Attorney.

ii. A property owner may also make a special dedication by conveying land identified by the Director of Transportation as necessary for safety or operational improvement projects.

c. Recording Requirements. The applicant shall record the amount (square footage) of floor area earned by area dedicated in conformance this paragraph with the King County Recorder's Office, or its successor agency, and provide a copy of the recorded document to the Director.

4. Conversion of Previously Approved Exempt Retail Activity Space

a. General. Exempt Retail Activity space approved pursuant to the Downtown Part 20.25A LUC in effect prior to [INSERT EFFECTIVE DATE OF THE ORDINANCE] may be converted to Active Use space pursuant to the provisions of this paragraph.

b. Requirements. The Director may approve a conversion of Exempt Retail Activity Space approved pursuant to the Downtown Part 20.25A LUC in effect prior to [INSERT EFFECTIVE DATE OF THE ORDINANCE] provided the following requirements are met:

i. Prior to Conversion. The applicant shall show a good faith effort to locate retail tenants meeting the Pedestrian Oriented Frontage use requirements of the previous approval before a conversion may be considered by the Director.

ii. Requirements for Conversion to be Approved.

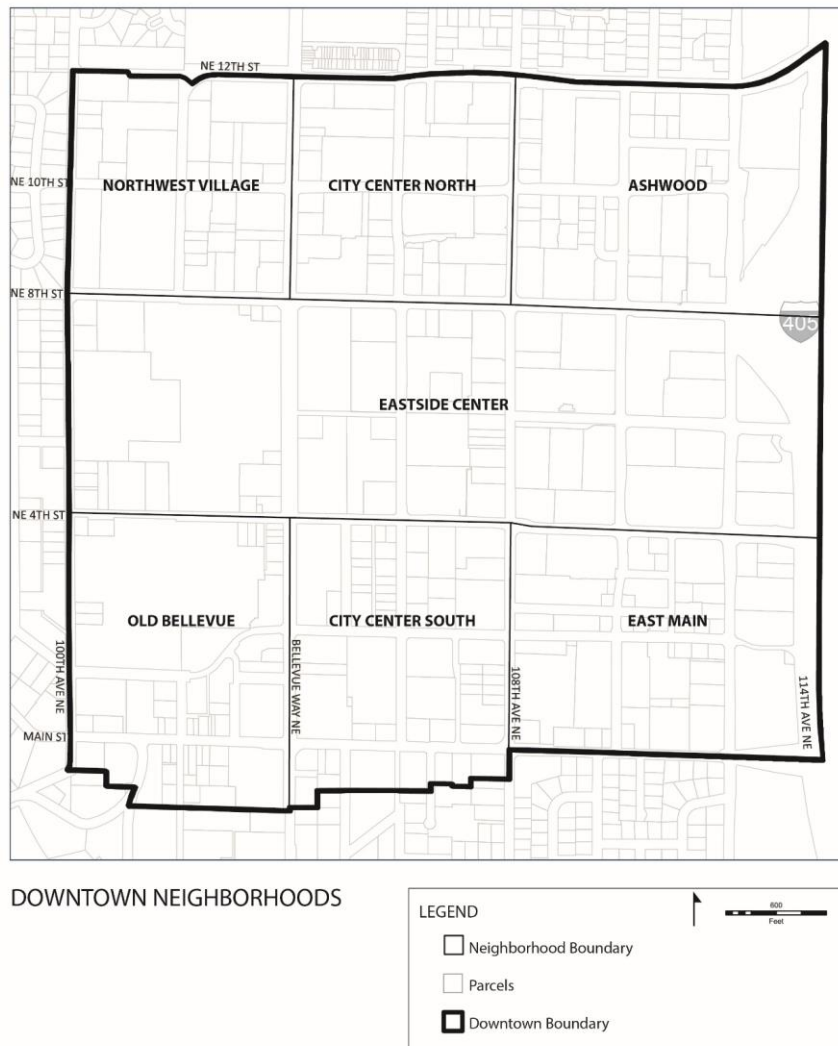

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- (1) Conversion of the previously approved exempt retail activity space shall not allow the building to exceed the maximum FAR contained in LUC 20.25A.060; and
- (2) The converted space shall be retrofitted, to the maximum extent feasible, to comply with the requirements of LUC 20.25A.170.B.1 (Pedestrian Corridor / High Streets – A Rights of Way).

D. Specific Amenity Incentive System Requirements.

1. Participation in the Amenity Incentive System shall comply with Chart 20.25A.070.D.4, provided below. Amenity bonus rates and applicability shall follow Downtown Neighborhood boundaries as shown in Figure 20.25A.070.D.1.

Figure 20.25A.070.D.1

2. Development within a project limit may only exceed its base FAR or base building height by providing amenities as described in Chart 20.25A.070.D.4 and this subsection.

a. Calculation of Required Amenity Incentive Points. The process below shall be used to determine the required amenity incentive points by individual building. There are two conditions that shall guide a building's required amenity incentive points based on it being above or below the base building heights shown in LUC 20.25A.060.A.4.

Condition 1: All building floor area is developed below the base building height. In this case, the amount of square footage above the base FAR is equal to the required amenity points.

Condition 2: A portion of the building floor area is developed above the base building height. In this case, the greater of the floor area being constructed above base FAR, OR the floor area being constructed above base height divided by two shall count as the required amenity incentive points for each building. For example: A building has 60,000 square feet above base FAR and 30,000 square feet above base building height divided by two = 15,000; the requirement would be 60,000 amenity points. A building with zero square feet above base FAR and 20,000 square feet above base building height divided by two would require 10,000 amenity points.

For multi-building development, the individual building amenity calculations shall be combined for an overall development's required amenity incentive points.

b. Allocation of Amenities. The Amenity Incentive System has a focus on public open space features. It is required that 75 percent or more of a project's amenity points shall be earned from one or more of the following amenities: Major Pedestrian Corridor and Major Public Open Space, Outdoor Plaza, Donation of Park Property, Improvement of Public Park Property, Enhanced Streetscape, Active Recreation Area, Enclosed Plaza or Alleys with Addresses. The remaining 25 percent of a project's required amenity points may be earned from any other amenity on the amenity list. DT-Small Sites may utilize any combination of amenity incentive points from the standard list to earn required amenity points.

**Commented [HC8]:** Errata. Major Public Open Space is a subset of the Major Pedestrian Corridor. For clarify they are called out separately to align with the list of bonusable amenities contained in LUC Chart 20.25A.070.D.4.

c. In-lieu Fees. In-lieu fees may be used for up to 50 percent of a project's required amenity incentive points. The in-lieu fee as of [INSERT EFFECTIVE DATE OF THE ORDINANCE] 2017 is \$28.00 per amenity point. In-lieu fees shall be assessed and collected at building permit issuance. In-lieu fees collected by the City shall be placed in a dedicated account and used exclusively for the acquisition or improvement of publicly accessible open space within, adjacent to, or connected to Downtown as determined by the Parks and Community Services Director. The amenity incentive system in-lieu fee rate, published in the City's fee rate schedule, shall be reviewed annually, and, effective January 1st of each year, may be administratively increased or decreased by an adjustment to reflect the current published annual change in the Seattle Consumer Price Index for Wage Earners and Clerical Workers as needed in order to maintain accurate costs for the region.

**Commented [BT(9)]:** Council direction provided September 18, 2017.

3. In a multi-building development within a single project limit, amenities may be allocated among all buildings within the project limit; provided, that such allocation shall be approved by the Director through a Master Development Plan (MDP). If construction of the multi-building development is to be phased, each phase shall provide for a proportionate installation of amenities as established in an approved MDP phasing plan. No phase may depend on the future construction of amenities.

4. Amenity Incentive System

LIST OF BONUSABLE AMENITIES	APPLICABLE NEIGHBORHOODS AND BONUS RATIOS						
	Northwest Village	City Center North	Ashwood	Eastside Center	Old Bellevue	City Center South	East Main
<b>PUBLIC OPEN SPACE FEATURE AMENITIES</b>							
<b>1. Major Pedestrian Corridor and Major Public Open Spaces:</b> The Major Pedestrian Corridor and Major Public Open Spaces located on or in the immediate vicinity of NE 6th Street between Bellevue Way and 112th Avenue NE.				16:1			
	16:1 bonus points per square foot of Pedestrian Corridor or Major Public Open Space constructed.						
	<b>DESIGN CRITERIA:</b> 1. Pedestrian Corridor and Major Public Open Space improvements shall comply with the requirements of LUC 20.25A.090.						
<b>2. Outdoor Plaza:</b> A publicly accessible, continuous open space, predominantly open from above, and designed to relate to the surrounding urban context. Outdoor plazas prioritize pedestrian use and serve as opportunities to activate Downtown for residents and users.	9.3:1	9.3:1	8.4:1	9.3:1	8.4:1	8.4:1	8.4:1
	8.4 bonus points per square foot of outdoor plaza in Priority Neighborhoods; 9.3 bonus points per square foot in High Priority Neighborhoods.						
	<b>DESIGN CRITERIA:</b> 1. Minimum plaza size is 3,000 square feet with a maximum bonusable area of 20 percent of the gross lot area, <u>provided that the minimum plaza size for a DT-Small Site is 1,500 square feet.</u> Plazas larger than 10,000 square feet may earn 10 percent additional bonus points if they are designed in a manner to provide for activities to promote general public assembly. 2. Minimum plaza size may be met through the linking of smaller plaza spaces in a cohesive, logical manner with a strong design narrative. 3. Minimum seating provided shall be 1 linear foot of seating space per 30 square feet of plaza space. 4. A minimum of 20 percent of the area eligible for bonus amenity points in the plaza shall be landscaped. 5. Plaza amenities to enhance the users experience shall be provided, e.g. art and water elements. 6. Plaza shall be located within 30 inches of the adjacent sidewalk grade, and shall provide physical and visual access from the adjacent right-of-way. 7. Provide for sense of security to users through well-lit and visible spaces. 8. Directional signage shall be provided to identify circulation routes for all users and inform the public that the space is accessible to the public at all times. The

	Northwest Village	City Center North	Ashwood	Eastside Center	Old Bellevue	City Center South	East Main
small retail, restaurant, and other commercial entries.	2. Frontage zone shall contain street furniture, including movable tables and chairs, and may be used for retail and food vendor space. 3. Applicant shall comply with three of the five design standards below: a. Additional landscaping such as seasonal pots and plantings. b. Decorative paving. c. Small artistic elements. d. Additional weather protection. e. Other features suggested that assist in activating the space. 4. Visual access shall be provided into abutting commercial spaces. For residential use this may be provided through a private patio or stoop.						
<b>6. Active Recreation Area:</b> An area that provides active recreational facilities and is open to the general public. Does not include health or athletic clubs.	2:1	2:1	2:1	2:1	2:1	2:1	2:1
	2 bonus points per square foot of active recreation area provided.  <b>DESIGN CRITERIA:</b> 1. May be located indoors or outdoors. 2. Recreational facilities include, but are not limited to, sport courts, child play areas, climbing wall, open space for play, and dog relief areas. 3. May be fee-for-use but not used exclusively by membership. 4. The maximum bonusable area is 1,500 square feet.						
<b>7. Enclosed Plaza:</b> A publicly accessible, continuous open space located within a building and covered to provide overhead weather protection while admitting substantial amounts of natural daylight (atrium or galleria). Enclosed Plazas function as a “Third Place,” and are “anchors” of community life and facilitate and foster broader, more creative interaction.	4:1	4:1	4:1	4:1	4:1	4:1	4:1
	4 bonus points per square foot of enclosed plaza provided.  <b>DESIGN CRITERIA:</b> 1. Shall be open and accessible to the public during the same hours that the building in which it is located is open. 2. Shall provide signage to identify the space as open to the public as provided per the Bellevue Transportation Department Design Manual. Shall provide directional signage that identifies circulation routes for all users and informs the public that the space is accessible to the public at all times. The signage shall be visible from all points of access. If the signage requirements are not feasible, the applicant may propose an alternative that is consistent with this provision and achieves the design objectives for the building and the site may propose an alternative that is consistent with this provision and achieves the design objectives for the building and the site. 3. Shall be visually and physically accessible from a publicly accessible space. 4. At least 5 percent of the area shall be landscaped. Landscape requirements may be modified if an equal or better result is provided through the use of interesting building materials, art, and architectural features that soften and enhance the enclosed plaza area. 5. The minimum sitting space shall be 1 linear foot of seating per 30 square feet of enclosed plaza space. More than 50 percent of the seating shall be provided in the form of movable chairs and furniture. 6. Minimum horizontal dimension is 20 feet. 7. Minimum area is 750 square feet.						

DRAFT

## Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

<b>8. Alleys with Addresses:</b> Pedestrian oriented ways off the main vehicular street grid that provide an intimate pedestrian experience through a combination of residential, small retail, restaurant, and other commercial entries with meaningful transparency along the frontage building walls. This area does not have a “back of house” feel.	6.7:1	6.7:1				6.7:1	6.7:1
	6.7 bonus points per square foot of alley with address improvement based on Neighborhood location.  <b>DESIGN CRITERIA:</b> 1. Shall be open to the public 24 hours a day and 7 days a week and require an easement for public right of pedestrian use in a form approved by the City. 2. May not be enclosed. 3. Shall provide a finer scaled building design at the pedestrian level to emphasize the pedestrian realm and to provide scale relief from the primary massing. 4. Alley frontage shall meet guidelines for C Rights-of-Way, Mixed Streets in LUC 20.25A.170.B. 5. Residential use must provide a strong connection to the alleyway through the use of patios or stoops. 6. Shall provide pedestrian scaled lighting. 7. Shall provide signage to show open to the public and the hours. 8. Automobile access and use shall be secondary to pedestrian use and movement. 9. Shall meet design guidelines at LUC 20.25A.170.C. 10. Square footage for purposes of calculating amenity points shall not include vehicle or loading drive surfaces.

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

<b>11. Performing Arts Space:</b> Space containing fixed seating for public assembly for the purpose of entertainment or cultural events (live performances only).	16:1	16:1	16:1	16:1	16:1	16:1	16:1
	16 bonus points per square foot of performing arts space provided.  <b>DESIGN CRITERIA:</b> This bonus shall apply only to performing arts spaces that are less than 10,000 square feet.						
<b>12. Public Art:</b> Any form of permanent artwork that is outdoors and publicly accessible or visible from a public place. The purpose is to create a memorable civic experience and affinity between artist and community.	40:1	40:1	40:1	40:1	40:1	40:1	40:1
	40 bonus points per every \$1,000 of appraised art value.  <b>DESIGN CRITERIA:</b> 1. Shall be located outside in areas open to the general public or visible from adjacent public right-of-way, perimeter sidewalk or pedestrian way. 2. May be an artist-made object or artist-made integrated feature of the building's exterior or other visible infrastructure such as paving, hand railings, walls, seating or other elements visible to the public or in publicly accessible areas. 3. Public art can include murals, sculptures, art elements integrated with infrastructure, and special artist designed lighting. 4. Stand alone or landmark artworks shall be at a scale that allows them to be visible at a distance. 5. Value of art to be determined through appraisal accepted by Bellevue Arts Program. 6. Maintenance of the art is the obligation of the owner of that portion of the site where the public art is located for the life of the project.						
<b>13. Water Feature:</b> A fountain, cascade, stream water, sculpture, or reflection pond. The purpose is to serve as a focal point for pedestrian activity.	40:1	40:1	40:1	40:1	40:1	40:1	40:1
	40 bonus points per every \$1,000 of appraised value of water feature, or actual construction cost, whichever is greater.  <b>DESIGN CRITERIA:</b> 1. Shall be located outside of the building, and be publicly visible and accessible at the main pedestrian entrance to a building, or along a perimeter sidewalk or pedestrian connection. 2. Water shall be maintained in a clean and non-contaminated condition. 3. Water shall be in motion during daylight hours.						
<b>14. Historic Preservation of Physical Sites/Buildings:</b> Historic and cultural resources are those identified in the City's resource inventory, or identified by supplemental study submitted to the City.	40:1	40:1	40:1	40:1	40:1	40:1	40:1
	40 bonus points per every \$1,000 of documented construction cost to protect historic façades or other significant design features.  <b>DESIGN CRITERIA:</b> 1. Voluntary protection of historic façades or other significant design features when redevelopment occurs.						

## Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

<b>15. Historic and Cultural Resources Documentation:</b> Historic and cultural resources are those identified in the City's resource inventory, or identified by supplemental study submitted to the City.	40:1	40:1	40:1	40:1	40:1	40:1	40:1
<b>16. Neighborhood Serving Uses:</b> Allocation of space for noncommercial neighborhood serving uses that bolster livability for residents (e.g., community meetings rooms and non-profit child care).	8:1	8:1	8:1	8:1	8:1	8:1	8:1
<b>17. Sustainability Certification:</b> The City has a vested interest in supporting sustainable building practices and provides amenity bonus points commensurate with the level of sustainability provided in each building. Bonus FAR shall be earned according to the level of rating applicant completes. Building practices are rapidly evolving and sustainability features are becoming mainstream. The purpose of this	<p>40 bonus points per every \$1,000 of documented cost of plaques/interpretive markers or construction cost of space dedicated to collect, preserve, interpret, and exhibit items.</p> <p><b>DESIGN CRITERIA:</b></p> <ol style="list-style-type: none"> <li>1. Use plaques and interpretive markers to identify existing and past sites of historic and cultural importance.</li> <li>2. Note: Other Sustainability Certifications with an expected public benefit equal to or in excess of Tier 1 or Tier 2 may be pursued under the Flexible Amenity provisions.</p> <p><b>DESIGN CRITERIA:</b></p> <ol style="list-style-type: none"> <li>1. Buildings shall meet minimum criteria for LEED, Built Green or Living Building Challenge certification in chosen category.</li> <li>2. A performance bond equivalent to the value of the bonus shall be provided to the City by the developer. In the event the project does not achieve the planned rating within 18 months of project completion, the bonded funds shall be used for environmental improvements within Downtown identified by the City.</li> </ol>						

amenity is to incentivize performance significantly above the industry norm.	
<b>FLEXIBLE AMENITY</b>	
<p><b>18. Flexible Amenity:</b> For proposed amenities not identified in items 1 – 17 of this list, the Flexible Amenity allows an applicant the opportunity to propose an additional amenity that would substantially increase livability in the Downtown. Credit shall be determined on a case-by-case basis; it is expected that the public benefit shall equal or exceed what would be provided by amenities on the standard list provided above. The Flexible Amenity may also be used to determine a mix of amenities that is appropriate for a DT-Small Site when application of standard list would not provide it with the development rights permitted to other similarly situated properties.</p>	<p>Values for this amenity will be set through the City Council Departure process in 20.25A.030 and require a Development Agreement. May be pursued in all Downtown Neighborhoods. This amenity may be used on DT-Small Sites to earn necessary amenity bonus points needed to exceed base FAR.</p> <p><b>DESIGN CRITERIA:</b></p> <ol style="list-style-type: none"> <li>1. Bonus proposal shall be approved by City Council through a Legislative Departure and Development Agreement.</li> <li>2. Proposed bonus shall have merit and value to the community.</li> <li>3. Proposed bonus shall be outside of the anticipated amenity bonus structure.</li> <li>4. Proposed bonus shall not be in conflict with existing Land Use Code regulations.</li> </ol> <p><b>TECHNICAL REVIEW:</b></p> <p>The City may require the applicant to pay for independent technical review, by a consultant retained by the City, of materials submitted by the applicant to support the requested departures contained within a requested Development Agreement. Consultant services may include, but are not limited to, economic evaluation of public benefits, impacts on property values, review of construction valuations, documentation related to constructability, and other input deemed necessary by the City Council to support its legislative decision making.</p>

E. Recording.

The total amount of bonus floor area earned through the Amenity Incentive System for a project, and the amount of bonus floor area to be utilized on-site for that project shall be recorded with the King County Recorder's Office, or its successor agency. A copy of the recorded document shall be provided to the Director.

F. Bonus Floor Area Earned from Pedestrian Corridor or MPOS Construction.

1. Use of Floor Area Earned. Bonus floor area earned for actual construction of the Major Pedestrian Corridor or Major Public Open Space may be used within the project limit or transferred to any other property within the area of Downtown bounded on the west by Bellevue Way, on the east by 112th Avenue NE, on the south by NE 4th Street and on the north by NE 8th Street. Properties may utilize this earned floor area to exceed the Floor Area Ratio Maximum of LUC 20.25A.060.A.4, but shall remain within maximum building height limits.
2. Recording Required. The property owner shall record each transfer of floor area with the King County Recorder's Office, or its successor agency, and shall provide a copy of the recorded document to the Director.
3. Notwithstanding any provision of Part 20.25A LUC, no transfer of floor area occurs when all property is included in one project limit.

G. Periodic Review.

The Amenity Incentive System shall be periodically reviewed every five to seven years with initiation by City Council. The Director shall prepare an annual performance report that includes, at a minimum, the following information for the amenity incentive points earned from participation in amenity incentive system.

- (1) Total number of Downtown projects that participated in the amenity incentive system;
- (2) The total amount of square footage earned through participation in the amenity incentive system; and
- (3) The total number of amenity points earned for each bonasable amenity listed in LUC 20.25A.070.D.4.

## 20.25A.075 Downtown Tower Requirements

### A. Requirements for Additional Height

1. Applicability. Buildings with heights that exceed the trigger for additional height shall be subject to the diminishing floor plate requirement in paragraph A.2 and an outdoor plaza space requirement.

2. Diminishing Floor Plate Requirement. The maximum floor plates above the trigger for additional height shall be reduced by: ~~10 to 25 percent nonresidential buildings and ten percent for residential buildings.~~

a. 15 percent in nonresidential towers located in the DT-O-1 and DT-O-2 Districts;

b. 10 percent in nonresidential towers located in the DT-MU, DT-MU Civic Center, DT-OLB Central, and DT-OLB South Districts; and

c. 10 percent in residential towers.

d. The reduction shall be applied on all floor plates above the trigger for additional height. The applicable percent reduction may be averaged among all floor plates above 80 feet, but no single floor plate shall exceed the maximum floor plate size above 80 feet.

3. Outdoor Plaza Requirement. Buildings with heights that exceed the trigger for additional height shall provide outdoor plaza space in the amount of ten percent of the site, provided that the outdoor plaza space shall be no less than 3,000 square feet in size (or 1,500 square feet on DT-Site Sites). In no event shall the Outdoor Plaza Space be required by the Director to exceed one acre in size. The open space shall be provided within 30 inches of the adjacent sidewalk and shall comply with the requirements for Outdoor Plazas in the Amenity Incentive System of LUC 20.25A.070.D.2. Vehicle and loading drive surfaces shall not be counted as outdoor plaza space.

a. Modification of the Plaza Size with Criteria. The Director may approve a modification to the 10 percent requirement for outdoor plaza space through an administrative departure pursuant to 20.25A.030.D.1, provided that the following minimum criteria are met:

i. The outdoor plaza is not less than 3,000 square feet in size (or 1,500 square feet on a DT-Small Site);

ii. The outdoor plaza is functional and is not made up of isolated unusable fragments;

iii. The outdoor plaza meets the design criteria for Outdoor Plazas in the Floor Area Ratio and Amenity Incentive System, Chart LUC 20.25A.070.D.42; and

iv. The size of the plaza is roughly proportional to the additional height requested.

**Commented [BT(11)]:** Added per Council direction on September 5, 2017.

**Commented [BT(12)]:** Council direction on September 5, 2017. Note that towers are buildings over 100 feet and residential buildings do not exceed 100 feet in Perimeter Overlays A-1, 2, and 3.

**Commented [HC13]:** Added per Council direction on September 18, 2017.

**Commented [HC14]:** Added per Council direction on September 18, 2017.

**Commented [BT(15)]:** Errata. Citation should be Chart LUC 20.25A.070.D.2.

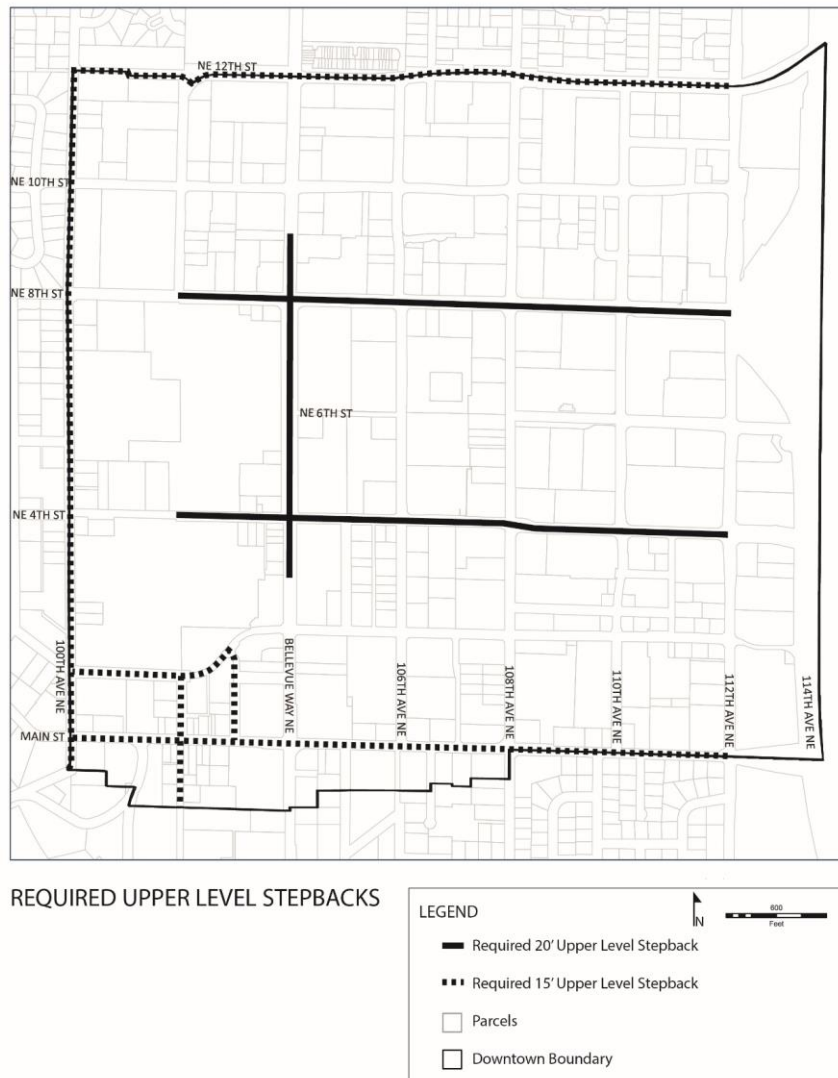

**B. Required Tower Separation** - Tower separation is intended to provide privacy, natural light and air, and contribute to a distinctive skyline.

1. **Applicability.** This paragraph shall apply to multiple towers within Downtown built within a single project limit.
2. **Separation.** Two or more towers built within a single project limit shall maintain a tower separation of 60 feet.
3. **Modification with Criteria.** Tower separation may be reduced to a minimum of 20 feet between the closest points of multiple towers measured 80 feet above average finished grade through an administrative departure pursuant to LUC 20.25A.030.D.1 if the following criteria are met:
  - a. A maximum of 10 percent of the façade is within the tower separation distance of another building's façade; and,
  - c. The applicant demonstrates that the intrusion does not affect the light, air or privacy of the users of either building.
4. **Small Site Exception.** If a parcel is less than or equal to 40,000 square feet, the tower separation requirement does not apply.

#### **C. Upper Level Stepbacks**

1. **Upper Level Stepback.** Each building facade depicted in Figure 20.25A.075.C.2 shall incorporate a minimum 15 or 20-foot-deep stepback at a height between 25 feet and the level of the first floorplate above 40 feet. The required depth of the stepback is shown on Figure 20.25A.075.C.2. This required stepback may be modified or eliminated if the applicant demonstrates through Design Review (Part 20.30F LUC) that:
  - a. Such stepback is not feasible due to site constraints, such as a small or irregularly shaped lot;
  - b. The modification is necessary to achieve design elements or features encouraged in the design guidelines of 20.25A.140-.180, and the modification does not interfere with preserving view corridors. Where a modification has been granted under LUC 20.25A.060.B.2.c, the upper level stepback may be incorporated between 25 feet and the level of the first floorplate above 45 feet; or
  - c. The modification is necessary to provide a property owner with the same development opportunity as an adjacent existing development that did not incorporate an upper level stepback. Where the upper level stepback on properties immediately adjacent to a site is less than the upper level stepback required by LUC 20.25A.075.C.1, the required upper level stepback may be modified as set forth in this subsection. The modification shall be determined by connecting the portion of each adjacent structure that encroaches into the required upper level stepback. The line established represents the upper level stepback for the site.

Figure 20.25A.075.C.2

## 20.25A.080 Parking Standards

### A. General.

The provisions of LUC 20.20.590, except as they conflict with this section, apply to development in Downtown.

### B. Minimum/Maximum Parking Requirement by Use – Specified Uses.

This subsection supersedes LUC 20.20.590.F.1. Subject to LUC 20.20.590.G and 20.20.590.H, the property owner shall provide at least the minimum and may provide no more than the maximum number of parking stalls as indicated below unless modified pursuant to applicable departure allowances contained in this section:

#### Downtown Parking Requirements

			Downtown Land Use Districts			
Land Use	Unit of Measure		-O-1,-O-2		-R,-MU,-OB, -OLB	
			Min.	Max.	Min.	Max.
a. Auditorium/Assembly Room/Exhibition Hall/Theater/Commercial Recreation (1)	per 8 fixed seats or per 1,000 nsf (if there are no fixed seats)		1.0 (10.0)	2.0 (10.0)	1.5 (10.0)	2.0 (10.0)
b. Financial Institution	per 1,000 nsf		3.0	4.0	4.0	5.0
c. Funeral Home/Mortuary (1)	per 5 seats		1.0	1.0	1.0	no max.
d. High Technology/Light Industry	per 1,000 nsf		2.0	3.5	2.0	3.5
e. Home Furnishing/Retail/Major Appliances – Retail	per 1,000 nsf		1.5	3.0	1.5	3.0
f. Hospital/In-Patient Treatment Facility/Outpatient Surgical Facility	per 1.5 patient beds		1.0	2.0	1.0	2.0
g. Manufacturing/Assembly (Other than High Technology/Light Industrial)	per 1,000 nsf		0.7	1.0	1.0	1.5
h. Office (Business Services/Professional Services/General Office) (3)	per 1,000 nsf		2.0	2.7	2.5	3.0
i. Office (Medical Dental/Health Related Services)	per 1,000 nsf		3.0	4.0	4.0	5.0
j. Personal Services:						
Without Fixed Stations	per 1,000 nsf		2.0	2.0	2.0	3.0
With Fixed Stations	per station		0.7	2.0	1.0	1.5
k. Residential (6)	per unit		0	2.0	1.0(5)	2.0

Attachment C

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

		Downtown Land Use Districts			
Land Use	Unit of Measure	-O-1,-O-2		-R,-MU,-OB, -OLB	
		Min.	Max.	Min.	Max.
l. Restaurant	per 1,000 nsf	0	15.0	10.0(4)	20.0
m. Retail	per 1,000 nsf	3.3	5.0	4.0(4)	5.0
n. Retail in a Mixed Development (except Hotel) (2)	per 1,000 nsf	0	3.3	2.0(4)	4.0
o. Senior Housing:					
Nursing Home	per patient bed	0.4	0.8	0.4	0.8
Senior Citizen Dwelling or Congregate Care	per living unit	0	1.0	0.33	1.0

nsf = net square feet (see LUC 20.50.036)

Notes to Parking Requirements:

- (1) Room or seating capacity as specified in the International Building Code, as adopted and amended by the City of Bellevue, at the time of the application is used to establish the parking requirement.
- (2) If retail space in a mixed development exceeds 20 percent of the gross floor area of the development, the retail use parking requirements of subsection B of this section apply to the entire retail space.
- (3) Special Requirement in Perimeter Overlays. The Director may require the provision of up to 3.5 parking stalls per 1,000 net square feet for office uses within the Perimeter Overlays to avoid potential parking overflow into adjacent Land Use Districts outside Downtown.
- (4) Parking for existing buildings in the Downtown-OB District shall be provided according to the criteria set forth in this Note (4).
  - (a) Existing Building Defined. For this Note (4), “existing building” shall refer to any building in existence as of December 31, 2006, or any building vested as of December 31, 2006, per LUC 20.40.500, and subsequently constructed consistent with the 2006 vesting.
  - (b) First 1,500 Net Square Feet of a Restaurant or Retail Use – No Parking Required. The first 1,500 net square feet of a restaurant or retail use located in an existing building shall have a minimum parking ratio of zero (0).
  - (c) Restaurant or Retail Uses in Excess of 1,500 Net Square Feet. A restaurant or retail use that exceeds 1,500 net square feet and is located within an existing building shall provide parking according to the above table for any floor area in excess of 1,500 net square feet.
  - (d) Limitation on Applicability of Note (4).
    - (i) Buildings that do not meet the definition of an existing building shall provide parking for all uses according to the above table.
    - (ii) Parking in existing buildings for uses other than restaurant and retail uses shall be provided according to the above table.

## Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

(5) The minimum requirement for studio apartment units available to persons earning 60 percent or less than the median income as determined by the United States Department of Housing and Urban Development for the Seattle Metropolitan Statistical Area is 0.25 stalls per unit. An agreement to restrict the rental or sale of any such units to an individual earning 60 percent or less of the median income shall be recorded with the King County Recorder's Office (or its successor agency), and a copy shall be provided to the Director.

(6) Visitor parking shall be provided in residential buildings at a rate of 1 stall per 20 units, but in no case shall the visitor parking be less than 1 stall.

### C. Shared Parking

1. General. In Downtown, this subsection supersedes LUC 20.20.590.I.1.
2. Subject to compliance with other applicable requirements of City Codes, the Director may approve shared development or use of parking facilities located on adjoining separate properties or for mixed use or mixed retail use development on a single site through approval of an administrative departure pursuant to LUC 20.25A.030.D.1 and if:
  - a. A convenient pedestrian connection between the properties or uses exists; and
  - b. The availability of parking for all affected properties or uses is indicated by directional signs, as permitted by Chapter 22B.10 BCC (Sign Code).
3. Number of Spaces Required.
  - a. Where the uses to be served by shared parking do not overlap their hours of operation, the property owner or owners shall provide parking stalls equal to the greater of the applicable individual parking requirements; and
  - b. Where the uses to be served by shared parking have overlapping hours of operation, the Director may approve a reduction of up to 20 percent of the total required parking stalls if the following criteria are met:
    - i. The reduction is supported by a parking demand analysis performed by a professional independent traffic engineer;
    - ii. The parking demand analysis adheres to professional methods and is supported by:
      - (1) Documentation of the estimated shared parking demand for the proposed use; and
      - (2) Evidence in available technical studies or manuals relating to the proposed mix of shared uses;
    - iii. The parking demand analysis for the proposed mix of shared uses may take into consideration how parking supply for a similar use has been calculated and performed at other locations in Bellevue, where available, or comparable circumstances in other jurisdictions;

iv. Required visitor parking for residential uses, and secured/gated parking that is dedicated to residential uses only, shall not be included in the number of parking stalls available for shared use.

4. Documentation Required. Prior to establishing shared parking or any use to be served thereby, the property owner or owners shall file with the King County Recorder's Office or its successor agency, a written agreement approved by the Director providing for the shared parking use. A copy of the written agreement shall be retained by the Director in the project file. The agreement shall be recorded on the title records of each affected property.

#### **D. Off-Site Parking Location.**

1. General. In Downtown, this subsection supersedes LUC 20.20.590.J. Except as provided in paragraph D.2 of this section, the Director may approve a portion of the approved parking through approval of an administrative departure pursuant to LUC 20.25A.030.D.1 for a use to be located on a site other than the subject property if:

- a. Adequate visitor parking exists on the subject property; and
- b. Adequate pedestrian, van or shuttle connection between the sites exists; and
- c. Adequate directional signs in conformance with Chapter 22B.10 BCC (Sign Code) are provided.

2. Downtown-R District Limitations. Parking located in the Downtown-R District may only serve uses located in that district unless otherwise permitted through Design Review, Part 20.30F LUC, and then, only if such parking is physically contiguous and functionally connected to the use that it serves in an adjacent Land Use District.

3. Short-Term Retail Parking Facilities. The Director may approve the development of short-term retail parking facilities (see definition at LUC 20.50.040) not associated with a specific use. Upon the separate approval of an administrative departure pursuant to LUC 20.25A.030.D.1 by the Director, a property owner or owners may satisfy all or a portion of the parking requirement for a specified retail use through an agreement providing parking for the use at a designated short-term retail parking facility; provided, that:

- a. Adequate pedestrian, van or shuttle connection exists between the sites; and
- b. Adequate directional signs in conformance with Chapter 22B.10 BCC (Sign Code) are provided.

4. Documentation Required. Prior to establishing off-site parking or any use to be served thereby, the property owner or owners shall file with the King County Recorder's Office (or its successor agency) a written agreement approved by the Director providing for the shared parking use. The agreement shall be recorded on the title records of each affected property and a copy of the recorded document shall be provided to the Director.

**E. Commercial Use Parking.**

1. Any parking facilities or parking stalls located in Downtown and developed to meet the requirements of the Land Use Code for a particular use may be converted to commercial use parking (see definition at LUC 20.50.040); provided, that the property owner shall:

- a. Comply with all parking and dimensional requirements and with the performance standards for parking structures of this Part 20.25A LUC.
- b. If the parking facility or parking stalls proposed for commercial use were approved for construction subsequent to the effective date of Ordinance 2964 (enacted on March 23, 1981), the commercial use parking facility or parking stalls shall comply with all landscaping requirements set forth at LUC 20.25A.110.
- c. If the parking facility or parking stalls proposed for commercial use were approved for construction prior to the effective date of Ordinance 2964 (enacted on March 23, 1981), and the commercial use parking facility occupies more than 30 spaces, the minimum landscaping requirements of this Code shall be deemed met where the property owner installs landscaping in compliance with an approved landscaping plan that achieves the following objectives:
  - i. Surface parking areas shall be screened from street level views to a minimum height of four feet by a wall, hedge, berm or combination thereof.
  - ii. The minimum width of any hedge planting area shall be three feet.
  - iii. Visual relief and shade shall be provided in the parking area by at least one deciduous shade tree (12 feet high at planting) for every 20 parking stalls, provided such trees shall not be required in covered or underground parking. Each tree planting area shall be at least 100 square feet in area and four feet in width, and shall be protected from vehicles by curbing or other physical separation. If irrigation is provided, the planting area may be reduced to 40 square feet.
  - iv. The proposed landscaping plan shall be reviewed by the Director for compliance with these objectives and shall be approved by the Director prior to initiation of the commercial use parking.

2. Assurance Device. The Director may require an assurance device pursuant to LUC 20.40.490 to ensure conformance with the requirements and intent of this subsection.

**F. Parking Area and Circulation Improvements and Design.**

1. Landscaping. Paragraph F.1 of this section supersedes LUC 20.20.590.K.7. The property owner shall provide landscaping as required by LUC 20.25A.110.
2. Compact Parking. Paragraph F.2 of this section supersedes LUC 20.20.590.K.9. The Director may approve through an administrative departure pursuant to LUC 20.25A.030.D.1, the design and designation of up to 65 percent of the spaces for use by compact cars.

3. **Vanpool/Carpool Facilities.** The property owner shall provide a vanpool/carpool loading facility that is outside of required driveway or parking aisle widths. The facility shall be adjacent to an entrance door to the structure and shall be consistent with all applicable design guidelines.
4. **Performance Standards for Parking Structures.** The Director may approve a proposal for a parking structure through Design Review, Part 20.30F LUC and an administrative departure through LUC 20.25A.030.D.1. The Director may approve the parking structure only if:
  - a. Driveway openings are limited and the number of access lanes in each opening is minimized;
  - b. The structure exhibits a horizontal, rather than sloping, building line;
  - c. The dimension of the parking structure abutting pedestrian areas is minimized, except where retail, service or commercial activities are provided;
  - d. The parking structure complies with the requirements of LUC 20.25A.140 through 20.25A.180;
  - e. A wall or other screening of sufficient height to screen parked vehicles and that exhibits a visually pleasing character is provided at all above-ground levels of the structure. Screening from above is provided to minimize the appearance of the structure from adjacent buildings;
  - f. Safe pedestrian connection between the parking structure and the principal use exists;
  - g. Loading areas are provided for vanpools/carpools as required by paragraph F.3 of this section; and
  - h. Vehicle height clearances for structured parking shall be at least eight feet for the entry level to accommodate accessible van parking.

#### **G. Bicycle Parking.**

Office, residential, institutional, retail, and education uses are required to provide bicycle parking pursuant to the following standards:

1. **Ratio.**
  - a. One space per 10,000 nsf for nonresidential uses greater than 20,000 nsf.
  - b. One space per every 10 dwelling units for residential uses.
2. **Location.** Minimum bicycle parking requirement shall be provided on-site in a secure location.
3. **Covered Spaces.** At least 50 percent of required parking shall be protected from rainfall by cover.
4. **Racks.** The rack(s) shall be securely anchored and a bicycle six feet long can be securely held with its frame supported so the bicycle cannot be pushed or fall in a manner that will damage the wheels or components.
5. **Size Requirement.** Each required bicycle parking space shall be accessible without moving another bicycle.

**H. Director's Authority to Modify Required Parking.**

Through approval of an administrative departure pursuant to LUC 20.25A.030.D.1, the Director may modify the minimum or maximum parking ratio for any use in LUC 20.25A.080.B as follows:

1. The modified parking ratio is supported by a parking demand analysis provided by the applicant, including but not limited to:
  - a. Documentation supplied by the applicant regarding actual parking demand for the proposed use; or
  - b. Evidence in available planning and technical studies relating to the proposed use; or
  - c. Required parking for the proposed use as determined by other compatible jurisdictions.
2. Periodic Review. The Director may require periodic review of the proposed review of the reduced parking supply to ensure the terms of the approval are being met.
3. Assurance Device. The Director may require an assurance device pursuant to LUC 20.40.490 to ensure compliance with the requirements and intent of subsection F.1 of this section.
4. To increase the maximum parking ratio, the applicant must show that shared or off-site parking is not available or adequate to meet demand.
5. Any required Transportation Management Program will remain effective.

**Commented [BT(16)]:** Added per Council direction on July 10, 2017. Gives the Director flexibility to modify the minimum parking ratio as well as the maximum parking ratio for any use.

## **20.25A.090 Street and Pedestrian Circulation Standards**

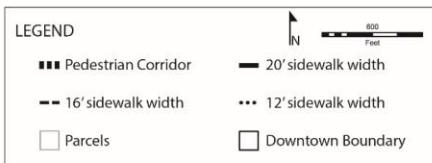

### **A. Walkways and Sidewalks – Standards and Map**

1. Sidewalk Widths. The minimum width of a perimeter walkway or sidewalk shall be as prescribed in Figure 20.25A.090A.1 of this section, plus a 6-inch curb. A planter strip or tree pit shall be included within the prescribed minimum width of the walkway or sidewalk as provided in Plate 20.25A.090A.1 of this section.

--------------------------	---------------

2. Minimum Width. Along any other street not listed in of this section, the minimum width of a perimeter walkway or sidewalk is 12 feet plus a 6-inch curb. Included in that 12 feet and adjacent to the curb, there shall be a planter strip or tree pit as prescribed in Plate A of this section.

3. Unobstructed Travel Path. Within the width of the walkway or sidewalk, at least six feet of unobstructed travel path shall be maintained for safe pedestrian access in new development. A narrower width may be approved to accommodate sidewalk cafes adjacent to development that was permitted under Part 20.25A LUC prior to [EFFECTIVE DATE OF THE ORDINANCE], if the width is consistent with design standards adopted by the Director of Transportation and is consistent with the ADA.

**B. Planter Strips and Tree Pits.**

Planter strips shall be at least five feet wide and as long as the street frontage, excluding curb cuts, driveways and spacing for utilities. Planter strips and tree pits shall be located adjacent to the curb unless precluded by existing utilities that cannot be reasonably relocated. Tree pits shall be covered with protective grates or pavers. Where stormwater facilities are used in conjunction with tree pits, removable grates shall be utilized. Pursuant to LUC 20.25A.030.D.1, the Director may approve an administrative departure for the location or size of tree pits and planter strips if the applicant is unable to meet the requirements of this-paragraph to utility placement or other obstruction that is out of the applicant's control.

**C. Downtown Core.**

1. Major Pedestrian Corridor.

a. Purpose. The major pedestrian corridor is to serve as a focus for pedestrian use.

b. Location. The alignment of the major pedestrian corridor is defined as the area within 30 feet of the extension of the north line of Lots 3 and 4, Block 2 of Cheriton Fruit Gardens Plat No. 1 recorded in the King County Recorder's Office (or its successor agency) in Volume 7 of Plats at page 47, extending from the eastern edge of the enclosed portion of Bellevue Square to 108th Avenue NE and the area within 30 feet north of the north curb and 30 feet south of the south curb of the Bellevue Transit Center traffic lanes as hereafter approved by the City, extending across the 108th Avenue NE right-of-way and to 110th Avenue NE. This alignment may be modified by the Bellevue Pedestrian Corridor Guidelines or by a Corridor Development Design Plan for a specific property.

c. Bellevue Pedestrian Corridor Guidelines. Each development abutting the Pedestrian Corridor as described in paragraph C.1.c.v of this section shall comply with the provisions of this paragraph and the Bellevue Pedestrian Corridor Guidelines and Major Open Space Design Guidelines as adopted by the City Council, or as the same may hereafter be amended. The

Bellevue Pedestrian Corridor and Major Public Open Space Design Guidelines consist of general design guidelines consistent with provisions of this paragraph.

- i. The corridor shall present a coordinated design. The City shall consider coordinated design features such as uniform treatment of signing, landscaping and lighting over the entire length of the corridor. Variety in design shall be allowed and in some cases encouraged in order to provide visual interest and harmony with adjacent development. The corridor shall incorporate numerous pedestrian amenities such as seating areas, landscaping, art features, weather protection and pedestrian scale lighting.
- ii. The major pedestrian corridor shall provide predominantly continuous pedestrian-oriented frontage, plazas, pedestrian ways, street arcades, landscape features, or enclosed plazas along its entire length.
- iii. The entire corridor shall be open to the public 24 hours per day. Segments of the corridor may be bridged or covered for weather protection, but not enclosed. Temporary closures will be allowed as necessary for maintenance purposes.
- iv. Pedestrian movement across 104th Avenue NE, 106th Avenue NE or 108th Avenue NE shall be at grade.
- v. The major pedestrian corridor width is established as part of the Bellevue Pedestrian Corridor Guidelines. The corridor width shall average 60 feet and in no case be less than 40 feet over each superblock west of 108th Avenue NE, and shall average 30 feet and in no case be less than 20 feet on each side over the superblock extending from the western edge of the 108th Avenue NE right-of-way to 110th Avenue NE.

All subdivisions or short subdivisions hereafter approved or permits for any structure or permanent parking or circulation area shall be reviewed for compatibility with the alignment of the major pedestrian corridor and major public open space as specified in paragraph C.1.b of this section or in the Bellevue Pedestrian Corridor and Major Public Open Space Design Guidelines if any lot line, structure or permanent parking or circulation area is within:

- (1) 330 feet of the centerline of the major pedestrian corridor if west of 108<sup>th</sup> Avenue NE; or
- (2) The area between the exterior edge of the curblines of the Transit Center and the eastward extension of the trigger lines as defined in paragraph C.1.c.v(1) of this section to 110th Avenue NE.

d. Preservation of the Major Pedestrian Corridor.

- i. Prior to the issuance of a Building Permit for any structure other than surface parking; and other than any interior remodel or exterior remodel that enlarges exterior dimensions such that new floor area not exceeding a total of 20 percent of the gross floor area of the existing building is added; and provided, that all new floor area is devoted to pedestrian-oriented uses; located within the major pedestrian corridor as defined in paragraph C.1.b of this section, the following conditions shall be met:

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- (1) The alignment of the major pedestrian corridor related to the proposed structure or permanent parking or circulation area shall be established by the execution and recording of a legal agreement in accordance with paragraph C.1.e.i or ii of this section.
  - (2) A Design Development Plan for the section of the corridor required to be constructed under paragraph C.1.c.iii of this section. Corridor shall be approved by the Director as required by paragraph C.1.e.ii of this section. Construction shall begin prior to the issuance of certificate of occupancy or a temporary certificate of occupancy for the structure other than surface parking as required by paragraph C.1.e.iii(2) of this section.
- ii. Building Permits for surface parking areas to be located in this corridor as defined in paragraph C.1.b of this section may be granted for up to a five-year period, subject to the landscape requirement for surface parking areas in the Downtown-MU District, as specified in LUC 20.25A.110.B. Building Permits for parking areas may be renewed only if the Director finds that an extension is necessary to meet the maximum Code requirements for parking and the extension is necessary for the construction of a building requiring utilization of the surface parking area.
- e. Provision of the Corridor.
- i. If the property owner wishes to at any time obtain bonus FAR for construction of the major pedestrian corridor, the City may approve the subdivision or short subdivision of property resulting in any interior lot line that is within the distances specified in paragraph C.1.c.v of this section only if:
    - (1) The owner of the property to be subdivided or short subdivided executes a legal agreement providing that all property that he/she owns within the superblock in which any of the property to be subdivided or short subdivided is located and that is within the alignment of the major pedestrian corridor established under paragraph C.1.b, C.1.c or C.1.e.iii of this section (hereafter the "Corridor Property") shall be subject to a nonexclusive right of pedestrian use and access by the public. The agreement shall legally describe and shall apply to only that property of the owner located within the distances specified in paragraph C.1.c.v of this section. Such an agreement shall further provide that:
      - (a) The public right of pedestrian use established thereunder shall be enforceable by the City of Bellevue, and the City shall have full rights of pedestrian access to and use of the corridor property for purposes of enforcing the rights of the public under this agreement.
      - (b) The obligations under the agreement shall run with the corridor property. The agreement shall be reviewed at the end of 50 years from the date the agreement is signed and shall continue or change in accordance with the then existing public need for pedestrian use and access of the corridor for subsequent 50-year terms.
      - (c) The owner shall design and construct the corridor within such corridor property in accordance with the requirements of paragraph C.1 of this section.
      - (d) The agreement shall be recorded with the King County Recorder's Office (or its successor agency) and provided to the Director.

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- (e) The owner shall maintain the portion of the corridor located on the corridor property and keep the same in good repair.
- (f) The City shall provide adequate police protection.
- (g) No modifications may be made to the corridor without approval of the City in accordance with paragraph C.1.e.ii of this section.
- (h) The alignment of any such portion of the pedestrian corridor established by a legal agreement may be modified or terminated by the property owner and the City if the alignment of any section of the major pedestrian corridor changes pursuant to paragraph C.1.e.ii of this section.
- (i) The owner may adopt reasonable rules and regulations for use of his/her portion of the corridor; provided, that the same may not be inconsistent with the requirements or intentions of this section.
- (j) Any other terms and conditions that the owner(s) and the City agree to.

ii. Corridor Design Development Plan. Prior to the issuance of a Building Permit for the construction of any structure other than surface parking; and other than any interior remodel or exterior remodel that enlarges exterior dimensions such that new floor area not exceeding a total of 20 percent of the gross floor area of the existing building is added; and provided that all new floor area is devoted to pedestrian-oriented uses; on the property, any portion of which abuts the major pedestrian corridor and is within the distances specified in paragraph C.1.c.v of this section, a Design Development Plan for the section of the corridor required to be constructed under paragraph C.1.e.iii of this section shall be submitted to and approved by the Director, through Design Review, Part 20.30F LUC. If the owner constructs a temporary pedestrian linkage under paragraph E.1.e.iii of this section, preparation of the Corridor Design Development Plan shall not be required until the property to be developed is located within:

- (1) 130 feet of the centerline of the major pedestrian corridor, west of 108th Avenue NE; or
- (2) The area between the exterior edge of the curblines of the Transit Center and the eastward extension of the trigger lines as defined in paragraph C.1.e.ii(1) of this section to 110th Avenue NE. The proposed plan shall specify the following elements:
  - (a) Landscaping,
  - (b) Lighting,
  - (c) Street furniture,
  - (d) Color and materials,
  - (e) Relationship to building frontage,
  - (f) Specific alignment for property on which the corridor will have to be constructed by the applicant proposing development,

(g) Any other physical element that the Director and the City Council, in their review, determine is necessary for and consistent with the Design Development Plan for a specific section of the major pedestrian corridor, not including specific requirements to construct structures containing retail uses abutting the corridor.

iii. The City may issue a permit for the construction of a structure other than surface parking and other than any interior remodel or exterior remodel that enlarges exterior dimensions such that new floor area not exceeding a total of 20 percent of the gross floor area of the existing building is added; and provided, that all new floor area is devoted to pedestrian-oriented uses; on property any part of which abuts the major pedestrian corridor and is within the distances specified in paragraph C.1.c.v of this section at the time of the adoption of Ordinance No. 2945 only if:

(1) The owner complies with paragraph C.1.e.i(1)(a) through (j) of this section if that owner wishes to earn bonus FAR for construction of the major pedestrian corridor; and

(2) The owner files a Building Permit application to construct his/her section of the corridor on (a) land he/she owns within the corridor and within the superblock of the subject construction permit for a structure, and (b) on one-half the width of any abutting City-owned land in the corridor (except for intersections listed below). The City shall initiate or abutting property owners may initiate a street vacation for right-of-way the City owns between 104th Avenue NE and 106th Avenue NE at NE 6th Street in conjunction with or prior to an owner application to construct the major pedestrian corridor. Actual construction of the corridor must begin prior to the issuance of a certificate of occupancy or temporary certificate of occupancy for the structure other than surface parking. The City shall construct the corridor at the street intersections of the corridor and 104th Avenue NE, 106th Avenue NE, and 108th Avenue NE. The width of the corridor that would have to be constructed under the requirements of paragraph C.1.e.iii of this section may be modified when the final alignment of the corridor is established as part of Corridor Design Development Plan (paragraph C.1.e.ii of this section). Notwithstanding this potential change in the width of the corridor that would have to be constructed under paragraph E.1.e.iii of this section, property owners shall at a minimum be required to construct the section of the corridor as specified in paragraph C.1.e.iii(2)(a) of this section. Building Permits for surface parking areas to be located on property any part of which abuts the major pedestrian corridor and is within the distances specified in paragraph C.1.c.v of this section at the time of the adoption of the ordinance codified in this Part 20.25A may be issued subject to the conditions specified in paragraph C.1.d.ii of this section. Notwithstanding any other requirement of this section, if a temporary pedestrian linkage is constructed as specified in paragraph C.1.f of this section, construction of the corridor shall not be required unless the property to be developed is located within the distances specified in paragraph C.1.e.ii of this section.

f. Temporary Pedestrian Linkage.

i. Any temporary pedestrian linkage developed under paragraph C.1.c.iii of this section shall at a minimum include a combination of paving, landscaping and lighting to permit safe pedestrian movement at night.

- ii. The City Council must approve a plan for any temporary pedestrian linkage to be prepared as part of a Corridor Design Planning process approved through a Development Agreement (Part 20.30L LUC).
- iii. Any owner constructing a temporary pedestrian linkage under paragraph C.1.e.iii of this section shall construct the linkage across all lands that he/she owns within the superblock where development is proposed that abut or are within the alignment of the corridor.
- g. Maintenance. Each segment of the major pedestrian corridor shall be maintained by the property owners abutting it. The City shall maintain the intersections of all public streets with the corridor.
- h. Bonus Floor Area for Major Pedestrian Corridor Construction. Bonus floor area associated with the major pedestrian corridor shall be awarded pursuant to the terms of LUC 20.25A.070 to owners of property within the distances specified in paragraph C.1.c.v of this section through Design Review, Part 20.30F LUC, and according to the provisions of paragraph C.1.e.iii(2) of this section, in conjunction with an application for a permit to construct a structure, permanent parking, or circulation area within the major pedestrian corridor and the provision of a legal agreement establishing the public right of pedestrian use pursuant to paragraph C.1.e.i(1)(a) through (j) of this section.
- i. Exempt Activity/Use. Notwithstanding the provisions of paragraph C.1 of this section, the following activities and uses may occur on property within the distances specified in paragraph C.1.c.v of this section without concurrent construction of the major pedestrian corridor, the temporary pedestrian linkage or the intermediate pedestrian corridor:
  - i. Surface parking approved pursuant to paragraph C.1.d.ii of this section;
  - ii. Landscape development;
  - iii. Street, access and sidewalk improvements, including the Transit Center as provided for in paragraph C.2 of this section;
  - iv. Any interior remodel;
  - v. Any exterior remodel; provided, that if exterior dimensions are enlarged new floor area may not exceed a total of 20 percent of the gross floor area of the structure as it existed on the effective date of this provision; and provided, that all new pedestrian level floor area is devoted to pedestrian-oriented uses;
  - vi. Development of the temporary pedestrian linkage or the intermediate pedestrian corridor.
- j. Intermediate Pedestrian Corridor.
  - i. Notwithstanding any provision of this Code, which requires construction of the major pedestrian corridor, a property owner may phase construction of that section of the major pedestrian corridor otherwise required to be built by delaying any portion not directly abutting or adjacent to the project limit that triggered the construction requirement if the owner provides an intermediate pedestrian corridor for that delayed portion of the corridor property that :

(1) Is at least 16 feet in width from the centerline of the major pedestrian corridor west of 108th Avenue NE, or extending outward from the exterior edge of the north or south curblines of the Bellevue Transit Center traffic lanes. This space shall be designed to include a minimum four feet edge separating and defining the space, a minimum eight feet pedestrian movement area and a minimum four feet recreation/activity area.

(2) Incorporates lighting, planting, seating, and scored or decorative paving.

(3) Provides a sense of enclosure along the exterior edge of the space by the use of a design element that both physically and visually separates the intermediate corridor from abutting property. Nonexclusive examples of such an element sculptural wall, dense planting, or berm.

(4) Is consistent with the applicable provisions of the Bellevue Pedestrian Corridor Guidelines, as determined by the Director.

ii. Design for any intermediate pedestrian corridor shall be approved through Design Review, Part 20.30F LUC, in conjunction with the Design Development Plan for the major pedestrian corridor required to be constructed.

iii. An intermediate pedestrian corridor satisfies any requirement of this Code to construct the temporary pedestrian linkage.

iv. Space developed as an intermediate pedestrian corridor shall be replaced by the major pedestrian corridor at the time of development on any project limit abutting or adjacent to the major pedestrian corridor. Construction of the major pedestrian corridor shall be in conformance with all requirements of paragraph C.1.e of this section.

## 2. Major Public Open Spaces.

a. Purpose. Major public open spaces serve as focal points for pedestrian activity within the Downtown Core, and are design elements fully integrated with the major pedestrian corridor.

b. Location. The major public open spaces are to be located at or near the junction of the major pedestrian corridor and:

i. Bellevue Way;

ii. 106th Avenue NE;

iii. 110th Avenue NE.

c. Design. Each development abutting a location of the major open public spaces as defined in paragraph C.2.b of this section shall comply with the provisions of this paragraph and the Bellevue Pedestrian Corridor Guidelines and Major Public Open Space Guidelines as adopted by the City Council, or as the same may hereafter be amended. The Bellevue Pedestrian Corridor and Major Open Space Design Guidelines consist of general design guidelines consistent with provisions of this paragraph.

i. The major public open spaces shall be designed with numerous pedestrian amenities such that these areas serve as focal points. Pedestrian amenities include elements such as seating,

lighting, special paving, planting, food and flower vendors, artwork and special recreational features. Design shall be coordinated with that of the major pedestrian corridors.

ii. The major public open spaces at or near 106th Avenue NE and 110th Avenue NE shall be a minimum of 30,000 square feet in size. A maximum of 37,000 square feet is allowed for the purpose of obtaining bonus floor area. The major public open space at or near Bellevue Way shall be a minimum of 10,000 square feet in size. A maximum of 15,000 square feet is allowed for the purpose of obtaining bonus floor area.

iii. Area devoted to a major public open space shall be in addition to any area devoted to the major pedestrian corridor.

iv. Pedestrian-oriented frontage is required on at least two sides of a major public open space unless the major public space is linear in design, in which case pedestrian-oriented frontage is required on at least one side.

d. Specific Development Mechanism.

i. General. The provisions of paragraph C.4.d of this section establish alternative development mechanisms and specific requirements for each of the major public open spaces. Each affected property owner shall comply with the major public open space design and construction requirements. Only those property owners who establish public access through a recorded legal agreement may utilize the FAR bonus for these open spaces.

ii. Ownership. The owners of property to be devoted to a major public open space will retain fee ownership of that property.

iii. Public Access – Legal Agreement.

(1) Each owner of property to be devoted to a major public open space who chooses to participate in the FAR bonus system for a major public open space shall execute a legal agreement providing that such property is subject to a nonexclusive right of pedestrian use and access by the public.

(2) The agreement shall further provide that the public right of pedestrian use established thereunder shall be enforceable by the City of Bellevue, and the City shall have full rights of pedestrian access to and use of the major public open space for purposes of enforcing the rights of the public under the agreement.

(3) The agreement shall be recorded with the King County Recorder's Office and Bellevue City Clerk.

(4) The obligations under the agreement shall run with the land devoted to a major public open space. The agreement shall be reviewed at the end of 50 years from the date the agreement is signed and shall continue or change in accordance with the then-existing public need for pedestrian use and access of a major public open space for subsequent 50-year terms.

(5) The owner of property to be devoted to a major public open space shall maintain that portion of the major public open space and keep the same in good repair.

(6) The owners of property to be devoted to a major public open space may adopt reasonable rules and regulations for the use of that space; provided, that the rules and regulations are not in conflict with the right of pedestrian use and access and the intention of paragraph C.2.d.iii of this section.

iv. Arrangement of Space. The general apportionment, location, and major design features of at least the minimum area of a major public open space shall be established as part of the Bellevue Pedestrian Corridor and Major Public Open Space Design Guidelines. The specific apportionment and specific design of a major public open space on each affected parcel shall be established through the Design Development Plan described in paragraph C.4.d.x of this section.

v. Development Rights. Space above and beneath the area to be devoted to a major public open space may be developed by the property owner so long as that development is not in conflict with any established pedestrian use of and access to the major public open space, the intentions of paragraph C.2.d.iii of this section, if applicable, and the Bellevue Pedestrian Corridor and Major Public Open Space Design Guidelines.

vi. Floor Area Ratio Bonus.

(1) Bonus floor area associated with major public open space shall be awarded pursuant to the terms of LUC 20.25A.070.F to owners of property to be devoted to the major public open space who provide a recorded legal agreement pursuant to paragraph C.2.d.iii of this section upon approval of an application to construct that major public open space.

(2) Bonus floor area earned for construction of a major public open space may be

used within the project limit incorporating the Major Public Open Space or transferred to any other property within the area of Downtown bounded on the west by Bellevue Way, on the east by 112th Avenue NE, on the south by NE 4th Street and on the north by NE 8th Street. Properties may utilize transferred floor area only to the extent that the building height does not exceed maximum height limits established for the applicable Land Use District. Each transfer shall be recorded with the King County Recorder's Office (or its successor agency) and provided to the Director.

vii. Construction Required. Subject to paragraph C.4.d.viii of this section, construction by the property owner of all or part of a major public open space on property in that ownership at the location identified in the Bellevue Pedestrian Corridor and Major Public Open Space Design Guidelines is required in conjunction with any development on property in that ownership within:

(1) 175 feet of the intersection of the eastern edge of the 106th Avenue NE right-of-way and the centerline of the major pedestrian corridor, but including only that area east of the 106th Avenue NE right-of-way; or

(2) 175 feet of the intersection of the centerline of the 110th Avenue NE right-of-way and the centerline of the major pedestrian corridor, or the extension thereof; or

- (3) 175 feet of the intersection of the centerline of the Bellevue Way right-of-way and the centerline of the major pedestrian corridor.

viii. Exempt Activity/Use. Notwithstanding the provisions of paragraph C.4.d.vii of this section, the following activities and uses may occur on property described therein without concurrent construction of the major public open space:

- (1) Surface parking, subject to the landscape development provisions of this Code, for a period of not more than five years;
- (2) Temporary major pedestrian corridor improvements in conformance with the Interim Corridor Design Plan;
- (3) Landscape development;
- (4) Street improvements;
- (5) Any interior remodel; and
- (6) Any exterior remodel that enlarges exterior dimensions such that new floor area not exceeding a total of 20 percent of the gross floor area of the existing building is added, and all new floor area is devoted to pedestrian-oriented uses.

ix. Major Public Open Space Design.

- (1) Prior to issuance of a Building Permit for any structure that requires construction of all or part of a major public open space, or prior to actual construction of all or part of a major public open space, whichever comes first, the Bellevue Pedestrian Corridor and Major Public Open Space Design Guidelines shall contain an illustrative design generally apportioning the minimum required amount of major public open space for that entire open space. Each major public open space may have a separate illustrative design.
- (2) The property owners shall record the approved illustrative design with the King County Recorder's Office and provide a copy to the Director.

x. Design Development Plan.

- (1) Prior to issuance of a Building Permit for any structure that requires construction of all or part of a major public open space, or prior to actual construction of all or part of a major public open space, whichever comes first, a Design Development Plan for that portion to be constructed shall be submitted to and approved by the Director.
- (2) The Director shall review the plan, or amend any approved plan through Design Review, Part 20.30F LUC. Plans that depart from the conceptual design in the Pedestrian Corridor and Major Public Open Space design guidelines shall be approved by the City Council through a Development Agreement (Part 20.30L LUC). A plan approved by the Council through the City Council Design Review process may be amended by the Director through Part 20.30F LUC.
- (3) The proposed plan shall specify the following elements:

- (a) Landscaping;
- (b) Lighting;
- (c) Street furniture;
- (d) Color and materials;
- (e) Relationship to building frontage;
- (f) Specific location of the major public open space;
- (g) All design features required pursuant to paragraph C.4.c of this section;
- h) Relationship to and coordination with other portions of the major public open space, and with the major pedestrian corridor;
- (i) Any other physical element that the Director determines is necessary for and consistent with the Major Public Open Space Design Plan.

3. Minor Publicly Accessible Spaces.

- a. Purpose. Minor publicly accessible spaces provide relief from high intensity urban development, serve as visual gateways to the intensive Downtown Core, and provide opportunities for active or passive recreation.
- b. Applicability. Minor publicly accessible spaces shall be required when a development in the Downtown Core does not participate in the Amenity Incentive System of LUC 20.25A.070.
- c. Location. Minor publicly accessible spaces shall be located in Downtown. At least two spaces shall be located in each superblock based on coordination of design and proximity to other publicly accessible spaces, or pedestrian connections.
- d. Design Guidelines.
  - i. Minor publicly accessible spaces may be outdoors or enclosed as long as adequate access is provided and their existence is easily identifiable.
  - ii. A minor publicly accessible space shall be open at least during the hours of 8:00 a.m. to 10:00 p.m., or during the hours of operation of adjacent uses, whichever is lesser.
  - iii. A minor publicly accessible open space shall be developed as a plaza, enclosed plaza, or art or landscape feature. The design criteria of LUC 20.25A.070.D.2 or 7. shall be met, and the FAR amenity bonus may be utilized.
  - iv. Directional signage shall identify circulation routes for all users and state that the space is accessible to the public at the times specified by subsection C.3.c.ii. of this section. The signage shall be visible from all points of access. The Director shall require signage as provided in the City of Bellevue Transportation Department Design Manual. If the signage requirements are not feasible, the applicant may propose an alternative that is consistent with this section and achieves the design objectives for the building and the site.

e. Public Access – Legal Agreement.

i. Owners of property that is used for a minor publicly accessible open space shall execute a legal agreement providing that such property is subject to a nonexclusive right of pedestrian use and access by the public during hours of operation.

ii. The agreement shall provide that the public right for pedestrian use shall be enforceable by the City of Bellevue, and the City shall have full rights of access to the minor publicly accessible space and associated circulation routes for purposes of enforcing the rights of the public under this agreement.

iii. Owners of property subject to this legal agreement shall maintain the pedestrian access route and may adopt reasonable rules and regulations for the use of this space; provided, that the rules and regulations are not in conflict with the right of pedestrian use and access, and are consistent with this section.

iv. The agreement shall be recorded with the King County Recorder's Office (or its successor agency) and provided to the Director.

## **20.25A.100 Downtown Pedestrian Bridges**

### **A. Where Permitted.**

Pedestrian bridges over the public right-of-way may be allowed at or near the mid-block in the following locations; provided, that no more than one bridge may be allowed on any side of a 600-foot superblock:

1. On NE 4th Street between Bellevue Way and 110th Avenue NE;
2. On NE 8th Street between Bellevue Way and 110th Avenue NE; and
3. On Bellevue Way between NE 4th Street and NE 8th Street.

Above-grade pedestrian crossings over the public right-of-way in existence at the time of adoption of the ordinance codified in this section shall not be considered nonconforming, and may be repaired or replaced in their current locations without compliance with this section.

### **B. Location and Design Plan.**

The City Council shall review any Downtown Pedestrian Bridge Location and Design Plan, by entering into a Development Agreement pursuant to the terms of LUC 20.25A.030.D.2.

1. Prior to issuance of any permits for a proposed Downtown pedestrian bridge, a Downtown Pedestrian Bridge Location and Design Plan shall be submitted to and approved by the City Council, through a development agreement process pursuant to Part 20.30L LUC.
2. A Downtown Pedestrian Bridge Location and Design Plan shall identify the location of the Downtown pedestrian bridge, include a finding by Council that the proposal satisfies the public benefit test set forth in paragraph C of this section, be consistent with the development standards of paragraph D of this section, and be consistent with the Comprehensive Plan.
3. The Director shall ensure that the approved Downtown pedestrian bridge is constructed consistent with the Design Plan. Modification to the location of the Downtown pedestrian bridge, or to the articulated public benefits requires approval by the City Council pursuant to this section. Modifications to the design of the crossing that do not modify the location or public benefits, and that are consistent with the intent of the Design Plan may be approved by the Director through the process set forth in Part 20.30F LUC.
4. The property owners shall record the approved Design Plan with the King County Recorder's Office or its successor agency and provide a copy to the Director.

### **C. Public Benefit Required.**

The Council may approve, or approve with modifications, a proposed Downtown pedestrian bridge if it finds that the bridge provides a public benefit. For the purposes of this section, a Downtown pedestrian bridge shall be determined to provide a public benefit when it meets all of the following criteria:

1. The bridge improves pedestrian mobility;
2. The bridge does not detract from street level activity; and
3. The bridge functions as part of the public realm.

**D. Development Standards.**

Each proposed Downtown pedestrian bridge shall be developed in compliance with the following standards:

1. The bridge shall be open from at least 6:00 a.m. to midnight, or during the hours of operation of adjacent uses, whichever is greater. Signs shall be posted in clear view stating that the pedestrian bridge is open to the public during these hours;
2. The bridge connects upper-level publicly accessible space to upper-level publicly accessible space and provides a graceful and proximate connection between the sidewalk and bridge level that is visible and accessible from the sidewalk. The vertical connection shall occur within 50 feet of the sidewalk;
3. Vertical circulation elements shall be designed to indicate the bridge is a clear path for crossing the public right-of-way;
4. Directional signage shall identify circulation routes for all users;
5. Structures connected by the bridge shall draw pedestrians back to the sidewalk at the ground level immediately adjacent to both ends of the pedestrian bridge;
6. It is preferred that the bridge remain unenclosed on the sides, but allow enclosure or partial enclosure if the applicant demonstrates it is necessary for weather protection;
7. Visual access shall be provided from the sidewalk and street into the bridge;
8. Bridge may not diverge from a perpendicular angle to the right-of-way by more than 30 degrees;
9. The interior width of the bridge, measured from inside face to inside face shall be no less than 10 feet and no more than 14 feet;
10. Bridge shall be located at the second building level, with a minimum clearance of 16 feet above the grade of the public right-of-way;
11. Impacts on view corridors, as described in LUC 20.25A.150.D, shall be minimized;
12. Impacts on the function of City infrastructure, including but not limited to utilities, lighting, traffic signals, etc., shall be avoided or mitigated;
13. Lighting shall be consistent with public safety standards;
14. Signage on the exterior of the bridge, or on the interior of the bridge that is visible from a public sidewalk or street is not permitted;

15. Bridge shall be architecturally distinct from the structures that it connects; and
16. Bridge shall exhibit exemplary artistic or architectural qualities.

**E. Public Access – Legal Agreement.**

1. Owners of property that is used for pedestrian bridge circulation and access between the bridge and public sidewalk shall execute a legal agreement providing that such property is subject to a nonexclusive right of pedestrian use and access by the public during hours of bridge operation.
2. The agreement shall provide that the public right for pedestrian use shall be enforceable by the City of Bellevue, and the City shall have full rights of access for the pedestrian bridge and associated circulation routes for purposes of enforcing the rights of the public under this agreement.
3. Owners of property subject to this legal agreement shall maintain the pedestrian access route and may adopt reasonable rules and regulations for the use of this space; provided, that the rules and regulations are not in conflict with the right of pedestrian use and access and consistent with this section.
4. The agreement shall be recorded with the King County Recorder's Office or its successor agency and a copy provided to the Director.

## 20.25A.110 Landscape Development

### A. Street trees and landscaping – Perimeter – Plate B

1. Tree Species. The property owner shall install street trees, in addition to any landscaping required by LUC 20.25A.110.B, according to the requirements of 20.25A.110.A.1 Plate B of this section as now or hereafter amended.

#### 20.25A.110A.1 Plate B

**Plate B – Downtown Bellevue Street Tree Species Plan**

East-West	Proposed Street Trees	Tree Size
NE 12th (102nd to I-405)	Pear: <i>Pyrus calleryana</i> ‘Glens form’	Small
NE 11th (110th to 112th)	‘Katsura: <i>Cercidiphyllum japonicum</i> ’	Large
NE 10th (100th to 106th)	Tupelo: <i>Nyssa sylvatica</i> ‘Firestarter’	Medium
NE 10th (106 to I-405)	Zelkova serrata ‘Village Green’	Medium
NE 9th (110th to 111th)	Katsura: <i>Cercidiphyllum japonicum</i>	Large
NE 8th (100th to 106th)	Honeylocust: <i>Gleditsia tricanthos</i> ‘Shademaster’	Medium
NE 8th (106th to 112th)	Pac Sunset Maple: <i>Acer truncatum</i> x <i>platanoides</i> ‘Warrenred’	Medium
NE 6th (Bellevue Way to 106th)	Honeylocust: <i>Gleditsia tricanthos</i> ‘Shademaster’	Medium
NE 6th (106th to I-405)	Katsura: <i>Cercidiphyllum japonicum</i>	Large
NE 4th (100th to I-405)	Autumn Blaze Maple: <i>Acer</i> x <i>Freemanii</i> ‘Jeffersred’	Large
NE 3rd Pl (110th to 111th)	Tupelo: <i>Nyssa sylvatica</i> ‘Firestarter’	Large
NE 2nd Pl (108th to 111th)	Persian ironwood: <i>Parrotia persica</i> ‘Vanessa’	Medium
NE 2nd (Bellevue Way to I-405)	English oak: <i>Quercus robur</i> ‘Pyramich’	Large
NE 1st/2nd (100th to Bellevue Way)	Hungarian oak: <i>Quercus frainetto</i> ‘Schmidt’	Large
NE 1st (103rd to Bellevue Way)	Ginkgo: <i>Ginkgo biloba</i> ‘Magyar’	Medium
Main St (100th to Bellevue Way)	Ginkgo: <i>Ginkgo biloba</i> ‘Magyar’	Medium

Attachment C

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

Main St (Bellevue Way to I-405)	Tupelo: Nyssa sylvatica 'Afterburner'	Medium
North-South	Proposed Street Trees	Tree Size
100th (NE 12th to NE 10th)	Pear: Pyrus calleryana 'Aristocrat'	Small
100th (NE 10th to NE 1st)	Scarlet oak: Quercus coccinea	Large
100th (NE 1st to Main)	Ginkgo: Ginkgo biloba 'Magyar'	Medium
101st Ave SE (south of Main St)	Katsura: Cercidiphyllum japonicum	Large
102nd (NE 12th to NE 8th)	Miyabe maple: Acer miyabei 'Rugged Ridge'	Large
102nd (NE 1st to south of Main St)	Katsura: Cercidiphyllum japonicum	Large
103rd (near NE 10th)	Ginkgo: Ginkgo biloba 'Autumn Gold'	Medium
103rd (NE 2nd to Main St)	Katsura: Cercidiphyllum japonicum	Large
Bellevue Way (NE 12th to NE 10th)	Tulip tree: Liriodendron tulipifera 'JFS-oz'	Large
Bellevue Way (NE 10th to NE 4th)	Honeylocust: Gleditsia tricanthos 'Shademaster'	Medium
Bellevue Way (NE 4th to Main)	Tulip tree: Liriodendron tulipifera 'JFS-oz'	Large
105th (NE 4th to NE 2nd)	Sweetgum: Liquidambar styraciflua 'Worplesdon'	Large
105th SE (near Main St)	London planetree: Platanus x acerifolia 'Bloodgood'	Large
106th (NE 12th to NE 8th)	Elm: Ulmus propinqua 'Emerald Sunshine'	Large
106th (NE 8th to NE 4th)	Elm: Ulmus Americana 'Jefferson'	Large
106th (NE 4th to Main)	Elm: Ulmus 'Morton Glossy'	Large
106th Pl NE (near NE 12th)	London planetree: Platanus x acerifolia 'Bloodgood'	Large
107th (NE 2nd to south of Main)	Hornbeam: Carpinus caroliniana 'Palisade'	Medium
108th (NE 12th to NE 8th)	Persian ironwood: Parrotia persica 'Ruby Vase'	Medium
108th (NE 8th to NE 4th)	Sweetgum: Liquidambar styraciflua 'Worplesdon'	Large
108th (NE 4th to south of Main)	Zelkova serrata 'Green Vase'	Medium
109th (near NE 10th)	Linden: Tilia cordata 'Chancole'	Large
110th (NE 12th to NE 8th)	Linden: Tilia americana 'Redmond'	Large
110th (NE 8th to NE 4th)	Zelkova serrata 'Village Green'	Medium

Attachment C

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

110th (NE 4th to Main)	Red maple: <i>Acer rubrum</i> 'Somerset'	Large
111th (NE 11th to NE 9th)	Ginkgo: <i>Ginkgo biloba</i> 'Autumn Gold'	Medium
111th (NE 4th to NE 2nd)	Ginkgo: <i>Ginkgo biloba</i> 'Autumn Gold'	Medium
112th (NE 12th to Main)	Scarlet oak: <i>Quercus coccinea</i>	Large

2. Street Landscaping. Street trees together with shrubbery, groundcover and other approved plantings are required in a planter strip along the length of the frontage. Vegetation included in the planter strip shall be able to withstand urban conditions, shall be compatible with other plantings along the same street, and shall reflect the character of the area within which they are planted, as approved by the Director.

3. Installation and Irrigation

a. Installation. Street trees, at least 2.5 inches in caliper or as approved by the Director, shall be planted at least 3 feet from the face of the street curb, and spaced a maximum of 20 feet for small trees, 25 feet for medium trees, and 30 feet for large trees. The size of the tree shall be determined by Plate B of this section, as now or hereafter amended. A street tree planting area may also include decorative paving and other native plant materials, except grass that requires mowing. The use of planter strips for stormwater treatment is encouraged. Installation shall be in accordance with the Parks and Community Services Department Environmental Best Management Practices and Design Standards, as now or hereafter amended.

b. Irrigation. A permanent automatic irrigation system shall be provided at the time of installation of street trees and sidewalk planting strip landscaping located in a required planter strip or tree pit. The use of rainwater to irrigate is encouraged. Rainwater irrigations systems that do not meet the total demand for landscape water, shall be served by a separate water meter installed by the applicant and served by City-owned water supply with 24-hour access by the City. The irrigation system shall be designed per the Parks and Community Services Department Environmental Best Management Practices and Design Standards, as now or hereafter amended.

4. Species substitution. If a designated tree species is not available due to circumstances such as spread disease or pest infestation, it may be substituted with a different species or cultivar as approved by the Director as an administrative departure pursuant to LUC 20.25A.030.D.1. The substitution shall be of the same size and canopy spread as the tree species that is being replaced.

**B. On-site landscaping**

1. The provisions of LUC 20.20.520, except as they conflict with this section, apply to development in Downtown.

2. Site perimeter and parking structure landscaping shall be provided in Downtown L and Use Districts and Perimeter Overlays according to the following chart, Landscape Development Requirements. In addition, street trees may be required by LUC 20.25A.110.A.1.

**20.25A.110 Landscape Development Requirements**

Land Use District/Overlay	Location On-Site		
	Street Frontage	Rear Yard	Side Yard
Downtown-O-1 Downtown-O-2 Downtown OB	If buffering a parking area – 8' Type III (1)	None Required	None Required
Downtown-MU Downtown-R Downtown OLB Perimeter Overlay	If buffering a parking area – 8' Type III (1)	If buffering a surface vehicular access or parking area – 5' Type III	If buffering a surface vehicular access or parking area – 5' Type III

(1) An alternative design may be approved through Alternative Landscape Option, LUC 20.20.520.J through the Administrative Departure process contained in LUC 20.25A.030.D.1.

### C. Linear Buffer

1. General. The standards of this paragraph supplement other landscape requirements of this Part 20.25A and LUC 20.20.520 for development in the Perimeter Overlay.
2. Linear Buffers.
  - a. General. Any development situated within Perimeter Overlay A-1 and A-2 shall provide a linear buffer within the minimum setback from the Downtown boundary required by LUC Chart 20.25A.060.A.4. The purpose of this feature is to produce a green buffer that will soften the visual impact of larger buildings as viewed from the lower intensity Land Use Districts adjacent to Downtown. These design standards are minimum requirements for the size and quantity of trees and other linear buffer elements. The specific design of the linear buffer for each project shall be determined through the Design Review Process. Design considerations include, but are not limited to, the placement of elements and their relationship to adjacent property as well as to the proposed development. Different sets of design standards apply to each of the locational conditions. Linear buffers for Perimeter Overlay A-2 shall be measured from back of curb instead of from the back of sidewalk.
3. Requirements for All Linear Buffers. All linear buffers:
  - a. Shall have a minimum width of 20 feet;
  - b. Shall not be used for parking, and vehicular access drives shall be no more than 25 percent of the total area of the linear buffer;
  - c. Shall include seasonal color in an amount of at least ten percent of the perimeter setback area; and
  - d. Shall utilize native species for at least 50 percent of the plantings located within the perimeter setback area.
4. Linear Buffers that are Adjacent to Rights-of-Way or Public Property shall have:

## Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- a. Three deciduous trees, with a minimum caliper of 2.5 inches, per each 1,000 square feet of the perimeter setback area.
- b. Two flowering trees, with a minimum caliper of two inches, per each 1,000 square feet of perimeter setback area.
- c. Ten evergreen shrubs, minimum five-gallon size, per 1,000 square feet of the perimeter setback area.
- d. Living ground cover that provides cover of unpaved portion of buffer within three years.
- e. Walls and fences that do not exceed 30 inches.
- f. Accessibility both visually and physically abutting the sidewalk and being within three feet of the sidewalk or providing alternative access.
- g. Seventy-five percent of the buffer shall be planted. The other 25 percent may be paved with pervious pavement, brick, stone or tile in a pattern and texture that is level and slip-resistant. The paved portion of the buffer may be used for private recreational space and residential entries.

5. Where the Downtown boundary abuts property outside Downtown other than right-of-way or public property, the minimum setback from the Downtown boundary (or perimeter property lines when the setback has been relocated pursuant to Note 6 of subsection LUC 20.25A.060.A.4 shall be landscaped as follows:

- a. The entire setback shall be planted except for allowed paved portions. No portion may be paved except for required vehicular entrance drives, required through-block connections, patios that do not exceed 25 percent of the area of the required setback, and residential entries that do not exceed 25 percent of the area of the required setback.
- b. The setback shall be planted with:
  - i. Evergreen and deciduous trees, with no more than 30 percent deciduous, a minimum of ten feet in height, at intervals no greater than 20 feet on center;
  - ii. Evergreen shrubs, a minimum of two-gallon in size, at a spacing of three feet on center; and
  - iii. Living ground cover so that the entire remaining area will be covered in three years.

D. Fences

- 1. No fence may violate the sight obstruction restrictions at street intersections. (See BCC 14.60.240.)
- 2. Any fence that exceeds eight feet in height requires a Building Permit and shall conform to the International Building Code, as adopted and amended by the City of Bellevue.
- 3. Height shall be measured from finished grade at the exterior side of the fence. No person may construct a berm upon which to build a fence unless the total height of the berm plus the fence does not exceed the maximum height allowable for the fence if the berm was not present.

4. Prohibited Fences. Barbed wire may not be used in fencing in Downtown. Electric fences are not permitted in Downtown. Chain link fences are not permitted in Downtown except:
- a. To secure a construction site or area during the period of construction, site alteration or other modification; and
  - b. In connection with any approved temporary or special event use.

DRAFT

#### **20.25A.120 Green and Sustainability Factor**

**A. General** All new development shall provide landscaping and other elements that meets a minimum Green and Sustainability Factor score. All required landscaping shall meet standards promulgated by the Director to provide for the long-term health, viability, and coverage of plantings. These standards may include, but are not limited to, the type and size of plants, spacing of plants, depth of soil, and the use of drought-tolerant plants. The Green and Sustainability Factor score shall be calculated as follows:

1. Identify all proposed elements, presented in Figure 20.25A.120.A.5.
2. Multiply the square feet, or equivalent unit of measurement where applicable, of each landscape element by the multiplier provided for that element in Figure 20.25A.120.A.5 according to the following provisions:
  - a. If multiple elements listed in Figure 20.25A.120.A.5 occupy the same physical area, they may all be counted. For example, groundcover and trees occupying the same physical space may be counted under the ground cover element and the tree element.
  - b. Landscaping elements and other frontage improvements in the right-of-way between the lot line and the roadway may be counted.
  - c. Elements listed in Figure 20.25A.120.A.5 that are provided to satisfy any other requirements of Part 20.25A may be counted.
  - d. Unless otherwise noted, elements shall be measured in square feet.
  - e. For trees, large shrubs and large perennials, use the equivalent square footage of each tree or shrub provided in Figure 20.25A.120.A.5. Tree sizing shall be determined by the Green and Sustainability Factor Tree List maintained by the Director in the Development Services Department. If a tree species is not included on the list, the Director shall determine the size of the proposed tree species.
  - f. For green wall systems, use the square footage of the portion of the wall that will be covered by vegetation at three years. Green wall systems shall include year-round irrigation and a submitted maintenance plan shall be included as an element in the calculation for a project's Green and Sustainability Factor Score.
  - g. All vegetated structures, including fences counted as vegetated walls shall be constructed of durable materials, provide adequate planting area for plant health, and provide appropriate surfaces or structures that enable plant coverage. Vegetated walls shall include year-round irrigation and a submitted maintenance plan shall be included as an element in the calculation for a project's Green and Sustainability Factor Score.
  - h. For all elements other than trees, large shrubs, large perennials, green walls, structural soil systems and soil cell system volume; square footage is determined by the area of the portion of the horizontal plane that lies over or under the element.
  - j. All permeable paving and structural soil credits may not count for more than one third of a project's Green and Sustainability Factor Score.

3. Add together all the products calculated in Figure 20.25A.120.A.5 below to determine the Green and Sustainability Factor numerator.
4. Divide the Green and Sustainability Factor numerator by the lot area to determine the Green and Sustainability Factor score. A development shall achieve a minimum score of 0.3. On DT-Small Sites, a development shall achieve a minimum score of 0.25.
5. The Director has the final authority in determining the accuracy of the calculation of the Green and Sustainability Factor score.

**Figure 20.25A.120.A.5**

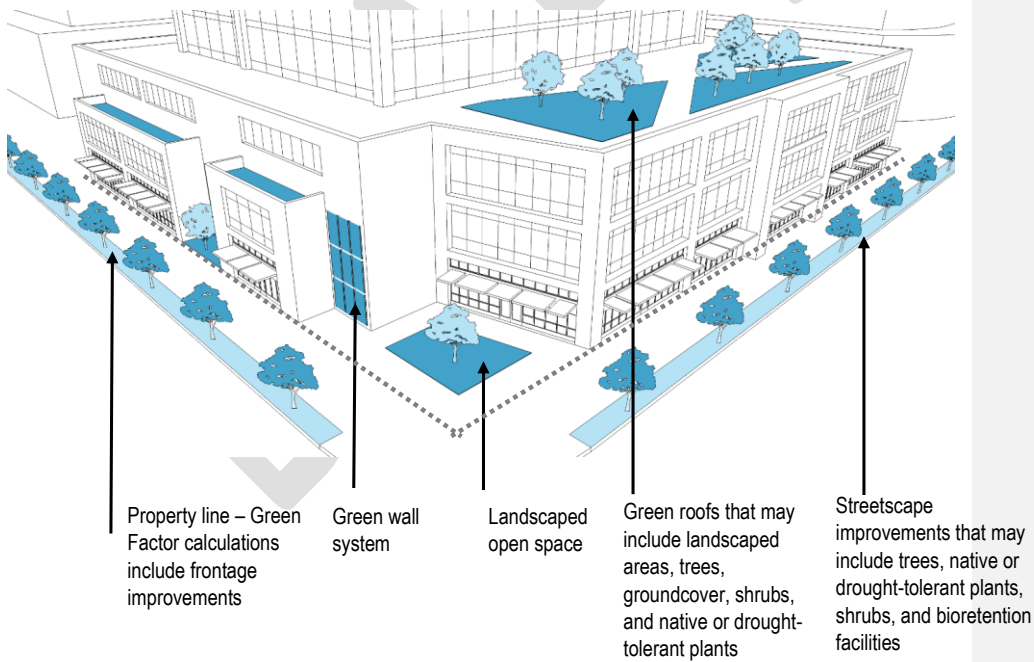

A. Landscape Elements		Multiplier
	1. Bioretention Facilities and Soil Cells. Bioretention facilities and soil cells shall comply with Bellevue's Storm and Surface Water Engineering Standards. Bioretention facilities shall be calculated in horizontal square feet. The soil cell systems shall be calculated in cubic feet. The volume of the facility shall be calculated using three feet of depth or the depth of the facility, whichever is less.	1.2
	2. Structural Soil Systems. The volume of structural soil systems can be calculated up to 3 feet in depth. The volume of structural soil systems shall be calculated in cubic feet. The volume of the facility shall be calculated using three feet of depth or the depth of the facility, whichever is less.	0.2
	3. Landscaped Areas with Soil Depth Less than 24 Inches	0.1
	4. Landscaped Areas with Soil Depth of 24 Inches or More	0.6
	5. Preservation of Existing Trees. Existing trees – proposed for preservation shall be calculated at 20 square feet per inch d.b.h. Trees shall have a minimum diameter of 6 inches at d.b.h. Existing street trees proposed for preservation shall be approved by the Director.	1.0
	6. Preservation of Existing Evergreen Trees Bonus. Existing evergreen trees proposed for this bonus shall be calculated at 20 square feet per inch d.b.h. and shall have a minimum diameter of 6 inches at d.b.h.	0.1

Attachment C

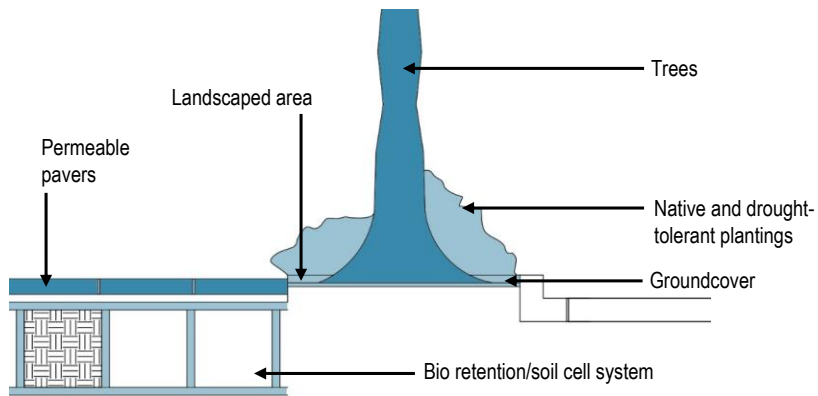

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

	7. Shrubs or Large Perennials. Shrubs or large perennials that are taller than 2 feet at maturity shall be calculated at 12 square feet per plant.	0.4
	8. Small Trees. Small trees shall be calculated at 90 square feet per tree. Consult the Green and Sustainability Factor Tree List for size classification of trees.	0.3
	9. Medium Trees. Medium trees shall be calculated at 230 square feet per tree. Consult the Green and Sustainability Factor Tree List for size classification of trees.	0.3
	10. Large Trees. Large trees shall be calculated at 360 square feet per tree. Consult with the Green and Sustainability Factor Tree List for size classification of trees.	0.4
B. Green Roofs		
	1. Green Roof, 2 to 4 Inches of Growth Medium. Roof area planted with at least 2 inches of growth medium, but less than 4 inches of growth medium.	0.4
	2. Green Roof, At Least 4 Inches of Growth Medium. Roof area planted with at least 4 inches of growth medium.	0.7
C. Green Walls		
	1. Vegetated Wall. Façade or structural surface obscured by vines. Vine coverage shall be calculated with an estimate of 3 years' growth. A year-round irrigation and maintenance plan shall be provided.	0.2
	2. Green Wall System. Façade or structural surface planted with a green wall system. A year-round irrigation and maintenance plan shall be provided.	0.7
D. Landscape Bonuses		
	1. Food Cultivation. Landscaped areas for food cultivation.	0.2
	2. Native or Drought-Tolerant Landscaping. Landscaped areas planted with native or drought-tolerant plants.	0.1
	3. Landscape Areas at Sidewalk Grade.	0.1
	4. Rainwater Harvesting. Rainwater harvesting for landscape irrigation shall be calculated as a percentage of total water budget times total landscape area.	0.2
E. Permeable Paving		

	1. Permeable Paving, 6 to 24 Inches of Soil or Gravel. Permeable paving over a minimum of 6 inches and less than 24 inches of soil or gravel.	0.2
	2. Permeable Paving over at Least 24 Inches of Soil or Gravel.	0.5
F. Publicly Accessible Bicycle Parking		
	1. Bicycle Racks. Bicycle racks in publicly accessible locations shall be calculated at 9 square feet per bike locking space and shall be visible from sidewalk or public area.	1.0
	2. Bicycle Lockers. Bicycle lockers in publicly accessible locations –shall be calculated at 12 square feet per locker, and shall be visible from public areas and open for public use.	1.0

Attachment C  
Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

**20.25A.130 Mechanical Equipment Screening and Location Standards.****A. Applicability.**

The requirements of this section shall be imposed for all new development, and construction or placement of new mechanical equipment on existing buildings. Mechanical equipment shall be installed so as not to detract from the appearance of the building or development.

**B. Location Requirements.**

1. To the maximum extent reasonable and consistent with building and site design objectives, mechanical equipment shall be located in the building, below grade, or on the roof.
2. Where the equipment must be located on the roof, it shall be consolidated to the maximum extent reasonable rather than scattered.
3. Mechanical equipment shall not be located adjacent to a sidewalk, through-block pedestrian connection, or area designated open to the public, such as a plaza.

**C. Screening Requirements.**

1. Exposed mechanical equipment shall be visually screened by a predominantly solid, non-reflective visual barrier that equals or exceeds the height of the mechanical equipment. The design and materials of the visual barrier or structure shall be consistent with the following requirements:
  - a. Architectural features, such as parapets, screen walls, trellis systems, or mechanical penthouses shall be consistent with the design intent and finish materials of the main building, and as high, or higher than the equipment it screens.
  - b. Vegetation or a combination of vegetation and view-obscuring fencing shall be of a type and size that provides a visual barrier at least as high as the equipment it screens and provides 50 percent screening at the time of planting and a dense visual barrier within three years from the time of planting.
  - c. Screening graphics may be used for at-grade utility boxes.
2. Mechanical equipment shall be screened from above by incorporating one of the following measures, in order of preference:
  - a. A solid non-reflective roof. The roof may incorporate non-reflective louvers, vents, or similar penetrations to provide necessary ventilation or exhaust of the equipment being screened;
  - b. Painting of the equipment to match or approximate the color of the background against which the equipment is viewed;
  - c. Mechanical Equipment Installed on Existing Roofs. The Director may approve alternative screening measures not meeting the specific requirements of this section if the applicant demonstrates that:
    - i. The existing roof structure cannot safely support the required screening, or

- ii. The integrity of the existing roof will be so compromised by the required screening as to adversely affect any existing warranty on the performance of the roof.

**D. Exhaust Control Standards.**

1. Purpose. Where technically feasible, exhaust equipment shall be located so as not to discharge onto a sidewalk, right-of-way, or area designated accessible to the public; including but not limited to a plaza, through-block connection, pedestrian bridge, and minor publicly accessible space.
2. Exhaust Location Order of Preference. Mechanical exhaust equipment shall be located and discharged based on the following order of preference:
  - a. On the building roof;
  - b. On the service drive, alley, or other façade that does not abut a public street, sidewalk or right-of-way;
  - c. Located above a driveway or service drive to the property such as a parking garage or service court; or
  - d. Location that abuts a public street or easement; provided, that the exhaust discharge is not directly above an element that has earned FAR Amenity Incentive System points, such as a public plaza.
3. If mechanical exhaust equipment is located as provided in subsection D.2.c or d of this paragraph, then it shall be deflected from such public space and located at least 16 feet above finished grade, street, easement or other area designated accessible to the public.
4. Exhaust outlets shall not be allowed to discharge to an area that has earned FAR Amenity Incentive System points, such as a public plaza.

**E. Modifications.**

The location and screening of mechanical equipment and exhaust systems is subject to review and approval at the time of land use review. The Director may approve an administrative departure pursuant to LUC 20.25A.030.D.1. if the applicant demonstrates that the alternate location or screening measures provide an equal or better result than the requirements of this section.

**F. Noise Requirements.**

1. Mechanical equipment shall meet the requirements of Chapter 9.18 BCC, Noise Control.
2. The applicant shall be required to demonstrate the mechanical system compliance with the requirements of Chapter 9.18 BCC prior to issuance of certificate of occupancy.

## **20.25A.135 Downtown Neighborhood Specific Standards**

### **A. Eastside Center, Convention Civic Neighborhood**

1. Definition of Neighborhood. The Convention Civic Neighborhood encompasses the area bounded by the centerlines of 110th Avenue NE on the west, NE 8th Street on the north, I-405 on the east, and NE 4th Street on the south.
2. Purpose. The purpose of the Convention Civic Center Neighborhood is to implement the Downtown Subarea policies concerning the Special Opportunity Area, by providing specific standards. These standards will permit the development of cultural, conference and exhibition facilities and other uses as envisioned by the policies.
3. Development Standards. All provisions of this Part 20.25A LUC shall apply to this neighborhood, with the following exceptions:
  - a. Within the Convention Civic Neighborhood, maximum lot coverage may be up to 100 percent for buildings in which more than 50 percent of the gross floor area, excluding parking, is comprised of one or more of the following uses: city government facilities, cultural facilities, conference facilities and exhibition facilities.
  - b. Within the Convention Civic Neighborhood, the building floor area per floor above 40 feet high may be unlimited for buildings and floors in which more than 50 percent of the gross floor area, excluding parking, is comprised of one or more of the following uses: city government facilities, cultural facilities, conference facilities and exhibition facilities.
  - c. Building types listed in paragraphs 3.a and 3.b of this section should incorporate special design features as described below:
    - i. Building facades shall be divided into increments through the use of offsets, facets, recesses or other architectural features that serve to break down the scale. Roof forms shall incorporate terraces, planting areas, decorative features, or other elements to soften the rectilinear profile.
    - ii. Special attention shall be given to the provision of elements at or near the ground level such as awnings, recessed entries, water features, address signs, seasonal flower beds, seating, pedestrian-oriented uses and display kiosks.
  - d. Nothing in these provisions shall affect the maximum floor area ratios permitted in the underlying Land Use Districts.

**B. Downtown – Old Bellevue Neighborhood**

1. Development Requirements. Development within the Old Bellevue Neighborhood shall comply with the following if the property abuts the named streets:

a. Street Improvements. The applicant shall provide half-street and sidewalk improvements including paving, street trees, lighting and other street furniture comparable to the existing Main Street streetscape between 102nd Avenue and Bellevue Way on:

- i. Both sides of Main Street between 100th Avenue and Bellevue Way; and
- ii. 102nd and 103rd Avenues between SE 1st Street and NE 1st Street; and
- iii. The west side of Bellevue Way between SE 1st Street and NE 2nd Street; and
- iv. The east side of 100th Avenue between SE Bellevue Place and NE 1st Street; and
- v. Both sides of NE 1st and NE 2nd between 100th Avenue and Bellevue Way.

b. Pedestrian-oriented frontage shall include display windows having mullions that are spaced two to six feet apart.

**20.25A.140 Downtown Design Guidelines Introduction.**

The Downtown Design Guidelines have the following predominant goals:

- A. To ensure that Downtown is viable, livable, memorable, and accessible.
- B. To promote design excellence, innovation, and reinforce a sense of place for Downtown.
- C. To improve the walkability, streetscapes, and public spaces for Downtown residents, employees and visitors.
- D. To foster a vibrant pedestrian environment by providing a welcoming streetscape with Active Uses, open spaces, street furniture, landscaping, and pedestrian-scaled amenities.
- E. To improve connectivity through Downtown and from Downtown to adjacent neighborhoods.
- F. To encourage sustainable and green design features, including those that promote water, resource, and energy conservation.
- G. To encourage the design of attractive rooftops that contribute to a memorable Downtown skyline.
- H. To advance the theme of “City in a Park” for Downtown, create more green features and public open space, and promote connections to the rest of the park and open space system.

**20.25A.150 Context.**

**A. Relationship to Height and Form of Other Development.**

1. Intent. Each new development provides an opportunity to enhance the aesthetic quality of Downtown and its architectural context. The relationship that a development has to its environment is a part of creating a well-designed, accessible, vibrant community.
2. Guidelines.
  - a. Architectural elements should enhance, not detract from, the area's overall character;
  - b. Locate the bulk of height and density in multi-building projects away from lower intensity Land Use Districts;
  - c. Minimize offsite impacts from new development, such as lights and noise, by directing them away from adjacent properties and less intense uses;
  - d. Incorporate architectural elements at a scale and location that ensures detailing is proportionate to the size of the building; and
  - e. Use forms, proportions, articulation, materials, colors and architectural motifs that are suggested by and complement adjacent buildings.

**B. Relationship to Publicly Accessible Open Spaces**

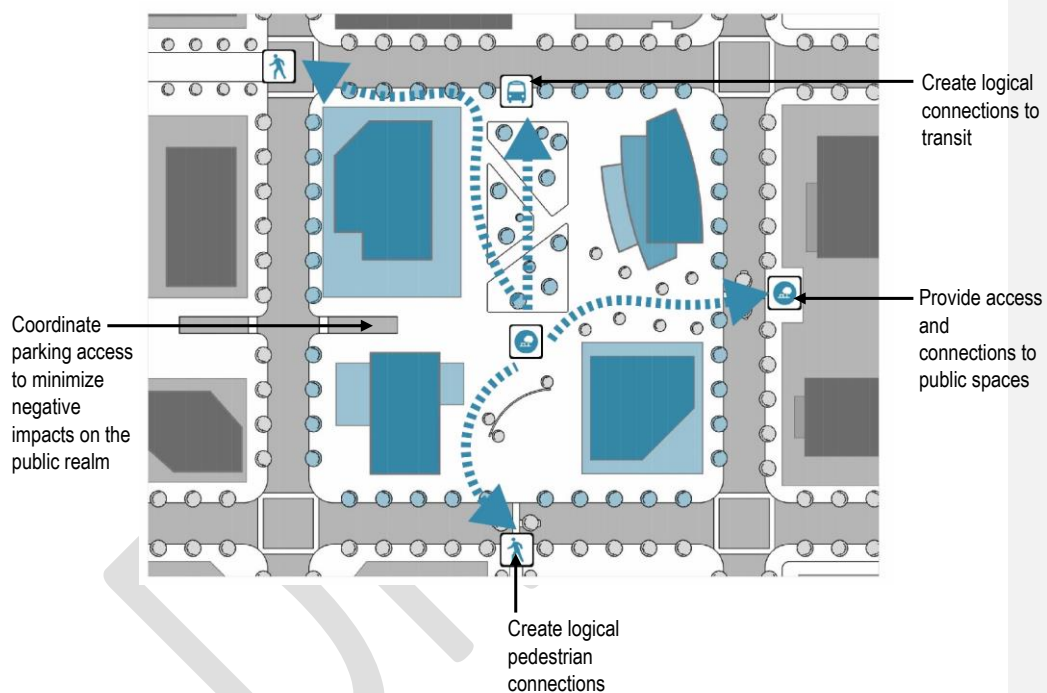

1. Intent. Publicly accessible open spaces including Outdoor Plazas, Major Pedestrian Open Spaces and Minor Publicly Accessible Spaces are provided for public enjoyment and are areas of respite for those who live and work in the area. Publicly accessible open spaces provide numerous benefits for people including: active and passive recreation, a place to sit and gather, a place for events, and relief from the built environment. Any negative impacts from new projects to adjacent publicly accessible spaces should be minimized.
2. Guidelines.
  - a. Organize buildings and site features to preserve and maximize solar access into existing and new public open spaces wherever possible;
  - b. When designing a project base or podium, strive to enhance the user's experience of adjacent public open spaces. For example, views of an adjacent existing public open space can be framed by new development; and
  - c. Promote use and accessibility of publicly accessible open spaces through site and building design.

**C. Relationship to Transportation Elements**

1. Intent. Downtown residents, employees, and visitors depend on safe, inviting, efficient transportation options. New development is a key link in creating a reliable transportation system with connections to different modes of transportation that place an emphasis on safety for the pedestrian.

2. Guidelines.

- a. Create logical connections to transit options, walking and biking trails, pedestrian routes, and streets; and
- b. Coordinate service and parking access to maximize efficiency and minimize negative impacts on adjacent land uses and the public realm.

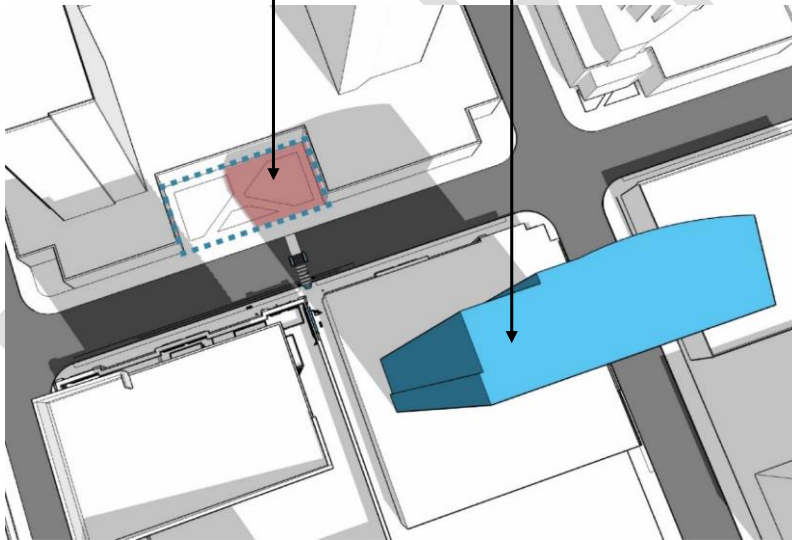

**D. Emphasize Gateways**

1. Intent. Entrances and transitions into and within Downtown should be celebrated.
2. Guideline. Use architectural and landscape elements to emphasize gateways. Pedestrians, cyclists, transit passengers, and motorists should experience a sense of “entering” or moving into Downtown, as well as entry into unique neighborhoods in Downtown. Refer to the Gateways and Wayfinding section of the Downtown Subarea Plan in the City of Bellevue Comprehensive Plan for a map of gateways.

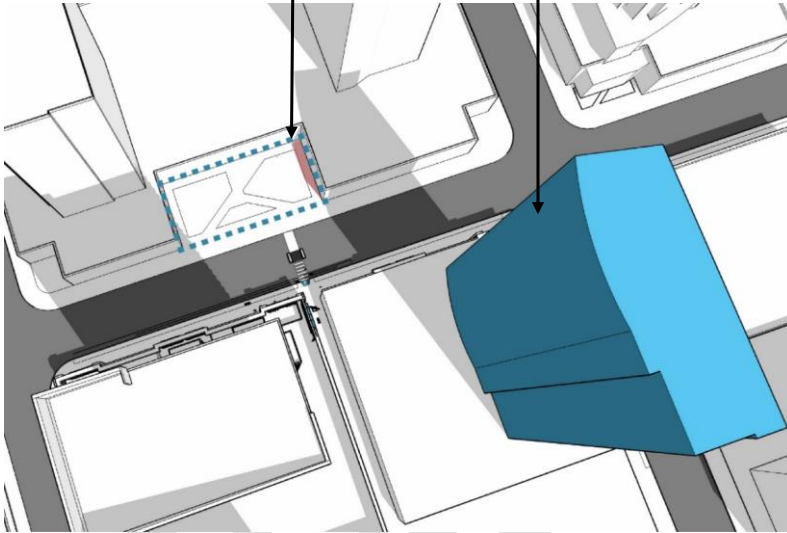

**E. Maximize Sunlight on Surrounding Area**

1. Intent. Outdoor spaces are more enjoyable and functional if they are filled with sunlight. Loss of sunlight and sky view reduces the comfort, quality, and use of publicly accessible open space. Trees and vegetation need sunlight to thrive.
2. Guidelines.
  - a. Evaluate alternative placement and massing concepts for individual building sites at the scale of the block to ensure the greatest amount of sunlight and sky view in the surrounding area;
  - b. Maximize sunlight and sky view for people in adjacent developments and streetscape; and
  - c. Minimize the size of shadows and length of time that they are cast on pedestrians in the streetscape.

Avoid tower orientation that casts prolonged or permanent shadow on public spaces

Orient towers to preserve solar  
access to existing public spaces

**20.25A.160 Site Organization.****A. Introduction**

Downtown Bellevue is unique in its 600-foot superblock configuration. These large blocks, which constitute the majority of the blocks in Downtown, create greater flexibility in site design. However, they also create a greater need to provide for street activation and coordinated internal circulation.

**B. On-Site Circulation**

1. Intent. The vitality and livability of Downtown is dependent on a safe, walkable environment that prioritizes the pedestrian and reduces conflicts between pedestrians and other modes of transportation. The design should encourage the free flow of pedestrians, cyclists and cars onto, off, and through the site. Walkability includes the creation of through-block pedestrian connections and other paths that offer attractive and convenient connections away from heavy arterial traffic. These connections also break down superblocks into a pedestrian-friendly grid.
2. Guidelines.
  - a. Site Circulation for Servicing and Parking.
    - i. Minimize conflicts between pedestrians, bicycles and vehicles;
    - ii. Provide access to site servicing and parking at the rear of the building from a lane or shared driveway, if possible;
    - iii. Provide access to site servicing, such as loading, servicing, utilities, vehicle parking, either underground or within the building mass and away from the public realm and public view;
    - iv. Minimize the area of the site used for servicing through the use of shared infrastructure and shared driveways;
    - v. Provide service access through the use of through-lanes rather than vehicle turnarounds, if possible; and
    - iv. Locate above-ground mechanical and site servicing equipment away from the public sidewalk, through-block connections, and open spaces.
  - b. On-site Passenger and Guest Loading Zones, Porte Cocheres, and Taxi Stands
    - i. Plan for increased activity found in passenger and guest loading areas during site plan development. Loading functions shall take place on private property, except as provided below;
    - ii. Locate passenger and guest loading zones and taxi stands so that the public right-of-way will remain clear at all times;
    - iii. Locate passenger and guest loading zones and taxi stands to minimize conflicts with pedestrians and other modes of transportation. Limit the number and width of curb cuts and

vehicular entries to promote street wall continuity and reduce conflicts with pedestrians, bicyclists, and other modes of transportation;

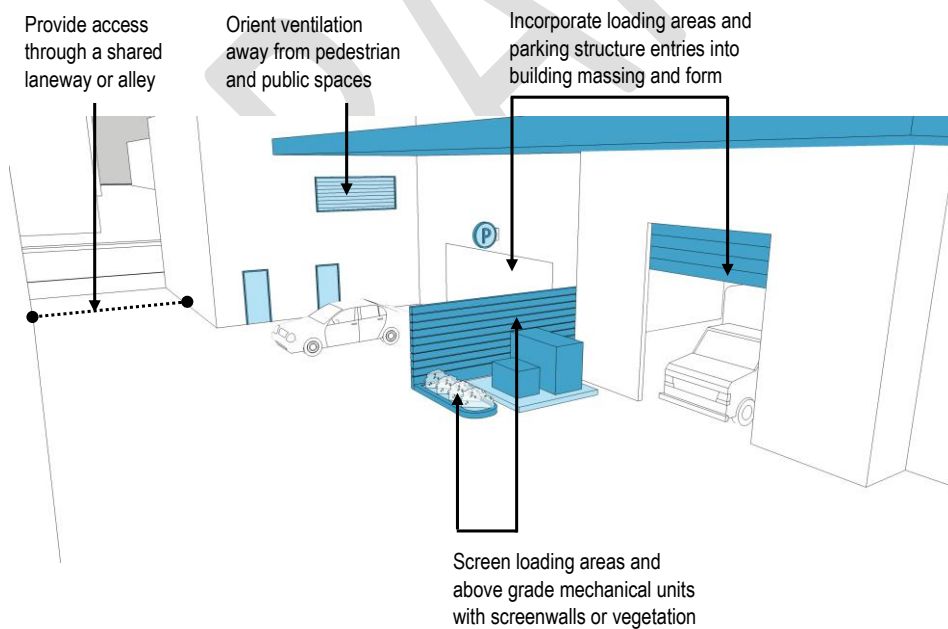

iv. Walkways should be placed to provide pedestrian access from the public sidewalk to the building entry without requiring pedestrians to walk in the driveway or come into conflict with vehicles;

v. Pull-through drives should have one lane that is one-way where they enter from and exit to the street;

vi. Long-term parking is not allowed in passenger and guest loading areas;

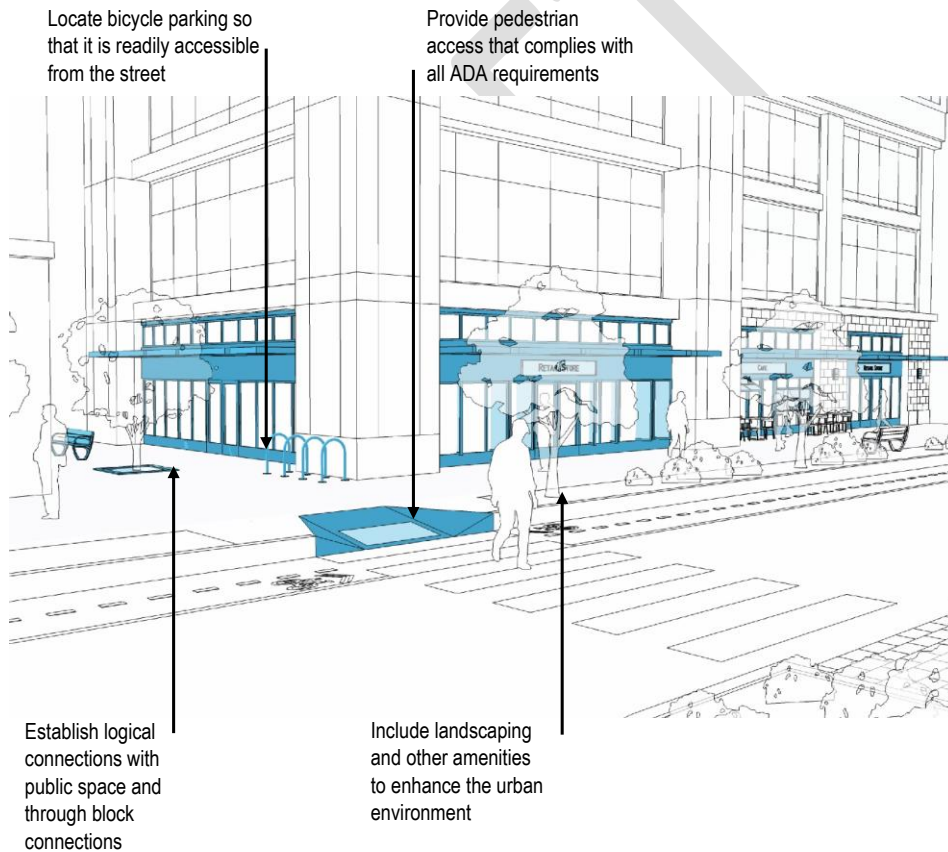

vii. If private bus activity is anticipated, provide an off-street passenger loading area for this size of a vehicle. Passenger loading functions may not take place in the public right-of-way; and

viii. Passenger loading functions for hotels, other than guest arrival and departure, may be allowed on streets with moderate intensity, such as a C Right-of-Way, via a curb setback loading area. Right-of-Way Classifications can be found in LUC 20.25A.170.B. Provided: the loading area must have a direct relationship to the building entry, and the required streetscape (curb, sidewalk, and planting strip) widths shall be maintained between the loading area and building entries, and the Director of Transportation has approved the configuration.

c. Pedestrian and Cycling Connections

- i. Include direct, logical, safe, and continuous routes for pedestrians and cyclists;
- ii. Provide pedestrian access through the site that is available to all and consistent with the Americans with Disabilities Act;
- iii. Include landscaping, pedestrian-scale lighting, and other amenities that enhance use of such connections during every season; and
- iv. Locate bicycle parking so that it has direct and visible access to the public street, building entrances, transit, and other bicycle infrastructure.

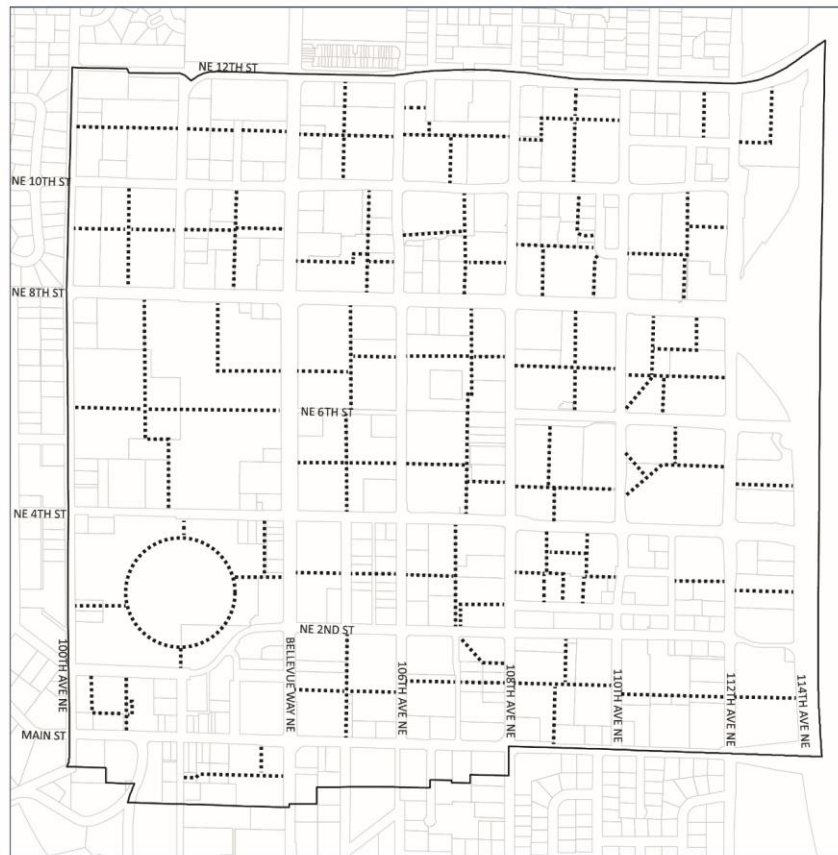

**C. Building Entrances**

1. Intent. Direct access from the public sidewalk to each building animates the street and encourages pedestrian activity to occur in the public realm rather than inside the building.
2. Guidelines. Ensure that the primary building entrances front onto major public streets, are well-defined, clearly visible, and accessible from the adjacent public sidewalk.

**D. Through-Block Pedestrian Connections.**

1. Through-Block Pedestrian Connection Map.

Figure 20.25A.160.D.1

**DOWNTOWN THROUGH-BLOCK  
CONNECTIONS**

**LEGEND**

- ... Through-Block Connections
- Parcels
- Downtown Boundary

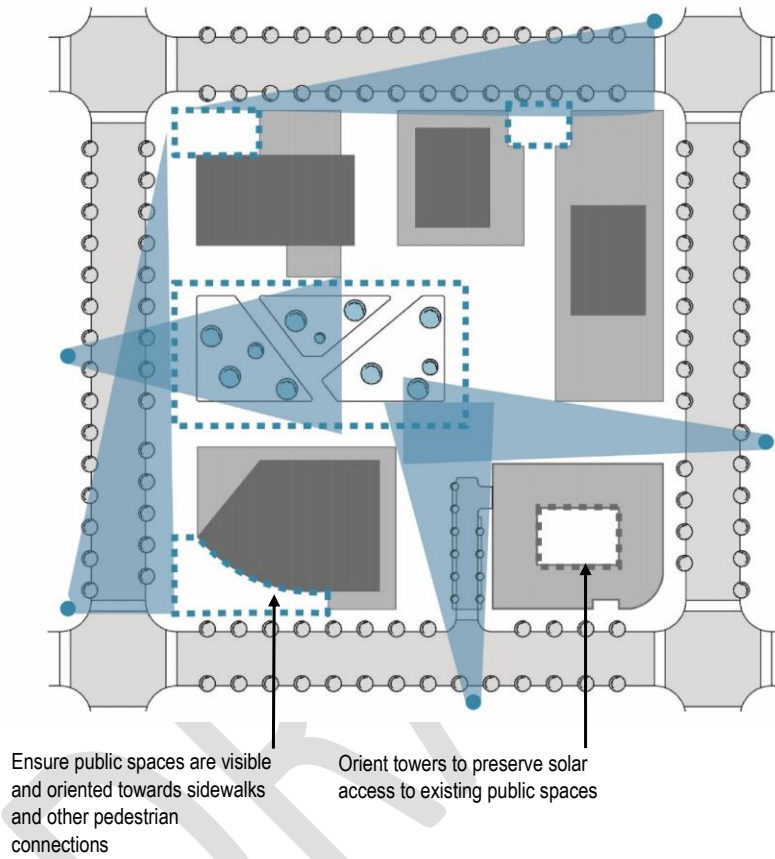

2. Intent. A through-block pedestrian connection provides an opportunity for increased pedestrian movement through superblocks in Downtown and helps to reduce the scale of the superblocks.
3. Standards.
  - a. Location. Through-block pedestrian connections are required in each superblock as provided in the map above. A through-block pedestrian connection shall be outdoors, except where it can only be accommodated indoors. The Director may approve a location shift on a through-block pedestrian connection provided that it provides similar pedestrian access as would have been required in the map above.
  - b. Proportionate Share. If a new development is built adjacent to a required through-block pedestrian connection as provided in the map in LUC 20.25A.160.D.1, the applicant shall construct a proportionate share of the through-block pedestrian connection.
  - c. Hours. A through-block pedestrian connection shall be open to the public 24 hours a day. Provided, if the through-block pedestrian connection is within a building, its hours shall coincide with the hours during which the building is open to the public.
  - d. Legal Agreement. Owners of property that is required to provide a through-block connection as part of the Design Review process, shall execute a legal agreement providing that such property is subject to a nonexclusive right of pedestrian use and access by the public during hours of operation.
  - e. Signage. Directional signage shall identify circulation routes for all users and state the hours that the space is accessible to the public. The signage shall be visible from all points of access. The Director shall require signage as provided in the City of Bellevue Transportation Department Design Manual. If the signage requirements are not feasible, the applicant may propose an alternative that is consistent with this section and achieves the design objectives for the building and the site.
4. Guidelines. A through-block pedestrian connection shall:
  - a. Form logical routes from its origin to its destination;
  - b. Offer diversity in terms of activities and pedestrian amenities;
  - c. Incorporate design elements of the adjacent right-of-way, such as paving, lighting, landscaping, and signage to identify the through-block pedestrian connection as a public space;
  - d. Accentuate and enhance access to the through-block pedestrian connection from the right-of-way by use of multiple points of entry that identify it as a public space;
  - e. Identify the connection as a public space through clear and visible signage;
  - f. Provide lighting that is pedestrian-scaled, compatible with the landscape design, and that improves safety;
  - g. Provide high quality design and durable materials;

- h. Provide landscaping to define and animate the space wherever possible;
- i. Incorporate trees and landscaping to provide enclosure and soften the experience of the built environment;
- j. The use of artistic elements and water features is encouraged to provide moments of interest for the user;
- k. Provide access that complies with the Americans with Disabilities Act, additional access may be provided through the building, if necessary to meet this requirement;
- l. Provide weather protection for pedestrians at key intersections, building entrances, or points of interest;
- m. Be developed as a walkway or a combination walkway and vehicular lane. If the combination walkway and vehicular lane does not have a separate raised walkway, the walkway surface shall be paved with unit paver blocks or other unique paving surface to indicate that it is a pedestrian area;
- n. Incorporate decorative lighting and seating areas; and
- o. Be visible from surrounding spaces and uses. Provide windows, doorways and other devices on the through-block connection to ensure that the connection is used, feels safe, and is not isolated from view.

#### **E. Open Space**

1. Intent: Open space is an integral part of a livable urban environment because it provides people a place for recreation, gathering, and reflection in a built environment. A vibrant Downtown includes open spaces that encourage active and passive recreation, spontaneous and planned events, and the preservation of the natural environment.
2. Guidelines.
  - a. Site and building design should capitalize on significant elements of the natural environment, planned parks, outdoor plazas, and open space. Designs should incorporate open space amenities for residents, employees, and visitors. Depending on the location, this may be accomplished through integration of the natural environment with new development or providing a smooth transition between the natural and built environments;
  - b. Orient gathering places and walkways toward parks and open spaces. Provide clear and convenient public access to open space amenities;
  - c. Include elements that engage the natural environment where the sight, sound, and feel of nature can be directly experienced;
  - d. Locate buildings to take maximum advantage of adjacent open spaces.
  - e. Create attractive views and focal points;

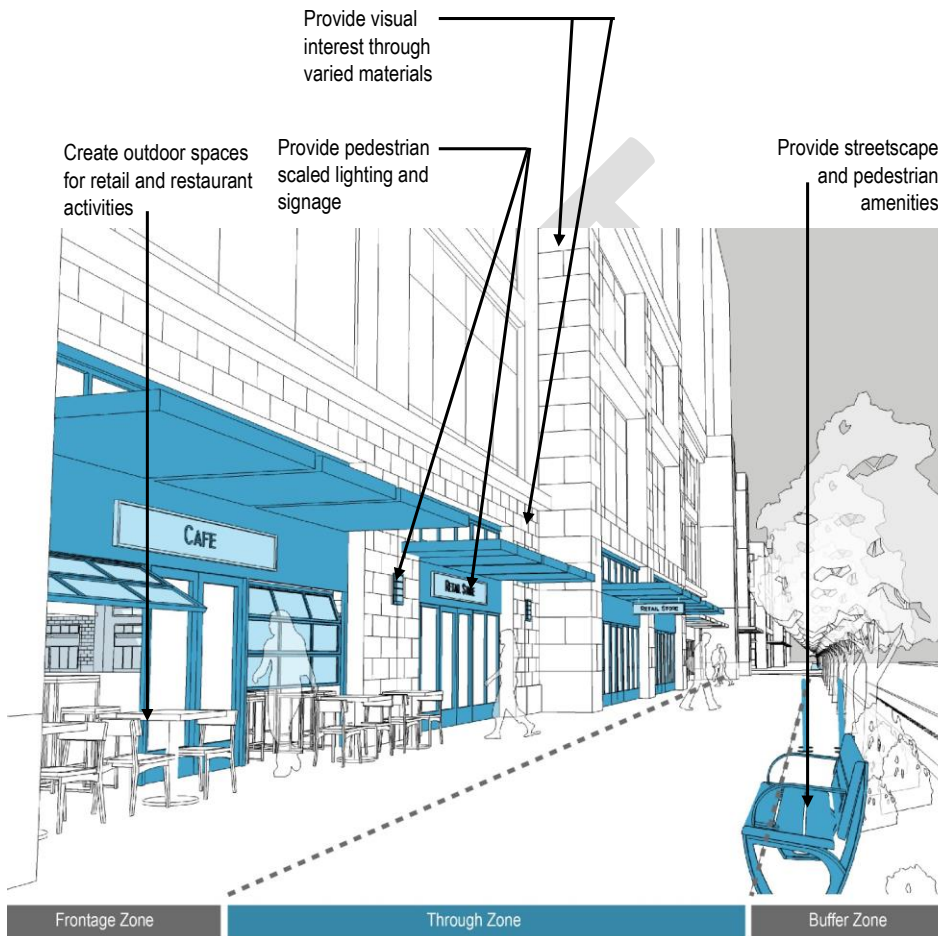

- f. Use publicly accessible open space to provide through-block pedestrian connections where possible;
- g. Include features and programming opportunities to encourage year-round use;
- h. Define and animate the edges of publicly accessible open space with well-proportioned building bases, permeable facades, and Active Uses at-grade;
- i. Provide access that complies with the Americans with Disabilities Act, additional access may be provided through the building if necessary to meet this requirement;
- j. Provide weather protection for pedestrians at key intersections, building entrances, and points of interest;
- k. Use artistic elements and water features where possible.
- l. Use design elements, such as surface materials, furnishings, landscaping and pedestrian-scale lighting that are high-quality, functional, and environmentally sustainable; and
- m. Maximize safety and comfort by including access to sunlight, clear views to and from adjacent streets and buildings, compliance with the Americans with Disabilities Act, and protection from wind and inclement weather; and
- n. Design for events where feasible by providing electrical hookups and areas for staging.
- o. Open space design should not incorporate loading, refuse handling, parking, and other building and site service uses at the ground level facade, though such activities may be conducted in an open space when reasonable alternatives are not feasible. When the above-referenced activities must be incorporated into an Open Space Design, operational procedures shall require the above-referenced activities to occur after normal business hours.
- p. Employ decorative lighting.

## **20.25A.170 Streetscape and Public Realm**

### **A. Streetscapes**

- 1 Define the Pedestrian Environment.
  - a. Intent. A building should provide a continuous, visually rich pedestrian experience along its ground-floor or second floor street front where active uses are present
  - b. Guidelines.
    - i. The most important part of a building to a pedestrian is its ground floor, which a person experiences walking past or entering the building. This “pedestrian experience zone” shall provide a sense of enclosure, and a continuous and comfortable street edge for the pedestrian. Ground floor building transparency should foster interaction between the public and private realms;
    - ii. Provide windows that are transparent at the street level;
    - iii. Create visual interest on walls by using a variety of forms, colors, and compatible cladding materials;
    - iv. Facades should provide a varied pedestrian experience by using bays, columns, pilasters, or other articulation at the street level;
    - v. Weather protection should help to define the upper edge of the pedestrian experience zone. A change in materials and scale will further define this zone; and
    - vi. Signs and lighting at the ground level should complement the pedestrian scale; and
    - vii. Provide building edges that maintain strong visual and physical connections to the sidewalk.

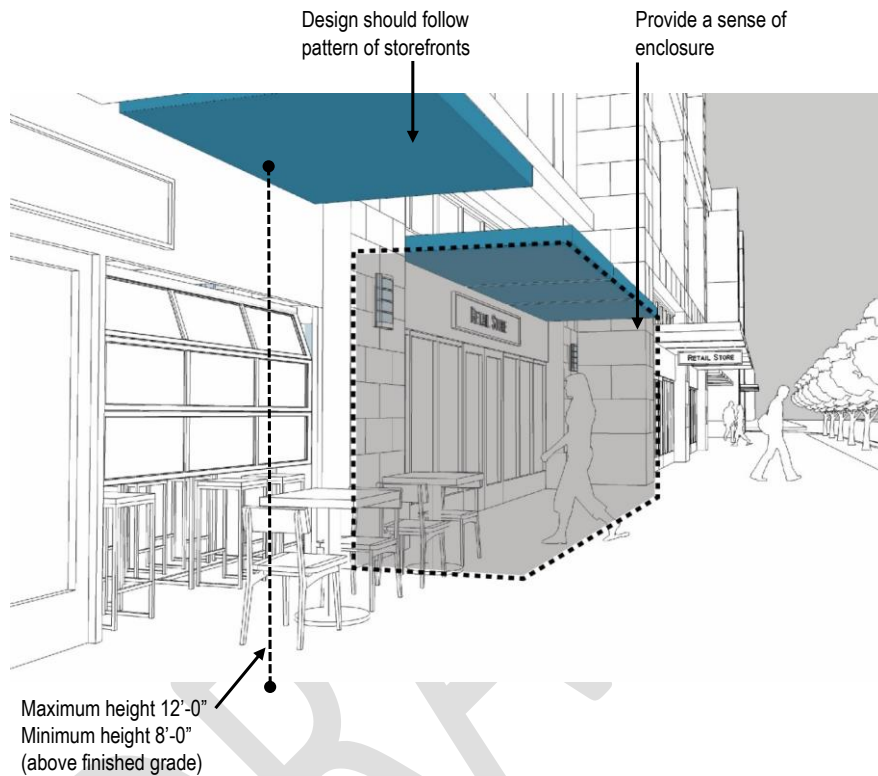

2. Protect Pedestrians from the Elements.

- a. Intent. Provide pedestrians with protection from wind, sun, and rain while allowing light to filter through to the occupants below.
- b. Guidelines.

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

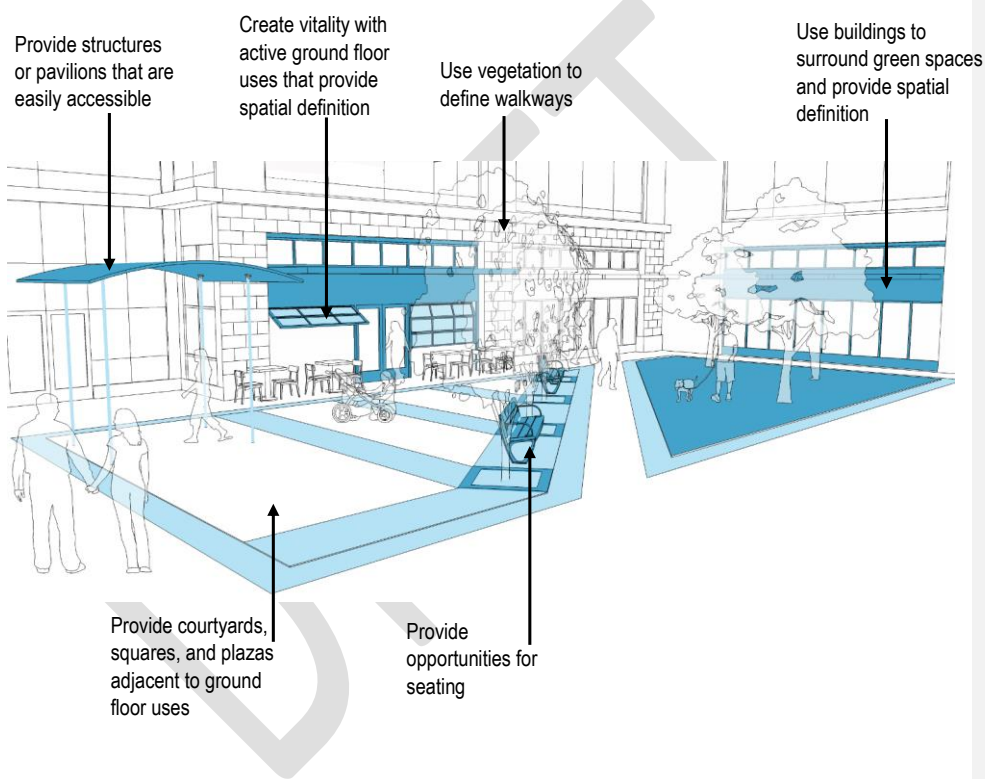

- i. Weather protection along the ground floor of buildings shall protect pedestrians from rain and provide shade in summer, but allow some daylight penetration;
- ii. The design of weather protection shall be an integral component of the building façade;
- iii. Weather protection shall be in proportion to the building and sidewalk, and not so large as to impact street trees, light fixtures, or other street furniture;
- iv. Weather protection shall assist in providing a sense of enclosure for the pedestrian;
- v. Use durable materials for weather protection;
- vi. Awning and marquee designs shall be coordinated with building design.
- vii. The minimum height for awnings or marquees is 8 feet above finished grade, except as otherwise required in the International Building Code, as adopted and amended by the City of Bellevue.
- viii. The maximum height for awnings or marquees is 12 feet above finished grade;
- ix. Pavement below weather protection shall be constructed to provide for drainage;
- x. Weather protection shall have a horizontal rather than a sloping orientation along the building elevation; and
- ix. Weather protection shall follow the pattern of storefronts.

3. Create a Variety of Outdoor Spaces.

- a. Intent. Provide comfortable and inviting outdoor spaces for a variety of activities during all hours and seasons.
- b. Guidelines.
  - i. Outdoor gathering spaces should be inviting and maximize opportunities for use. They should be spatially well-defined, inviting, secure, easy to maintain. They may be intimate and quiet or active and boisterous;
  - ii. All outdoor areas should work well for pedestrians and provide space for special events, as well as passive activities;
  - iii. Provide courtyards, squares, and plazas to enhance adjacent ground floor uses.
  - iv. Use buildings to surround green spaces and give the space visual definition. Vitality can be generated by active ground floor uses and programming within the space;

- v. Use trees, shrubs, and plants to help define walkways, create transitions from open spaces to the street, and provide visual interest;
- vi. Provide for outdoor spaces that can support active uses such as farmers' markets, festivals, and community events.
- vii. Provide structures, pavilions, and seating areas that are easily accessible and feel safe and secure during day and evening hours; and
- viii. Provide pedestrian walkways and courtyards in residential or office development areas.

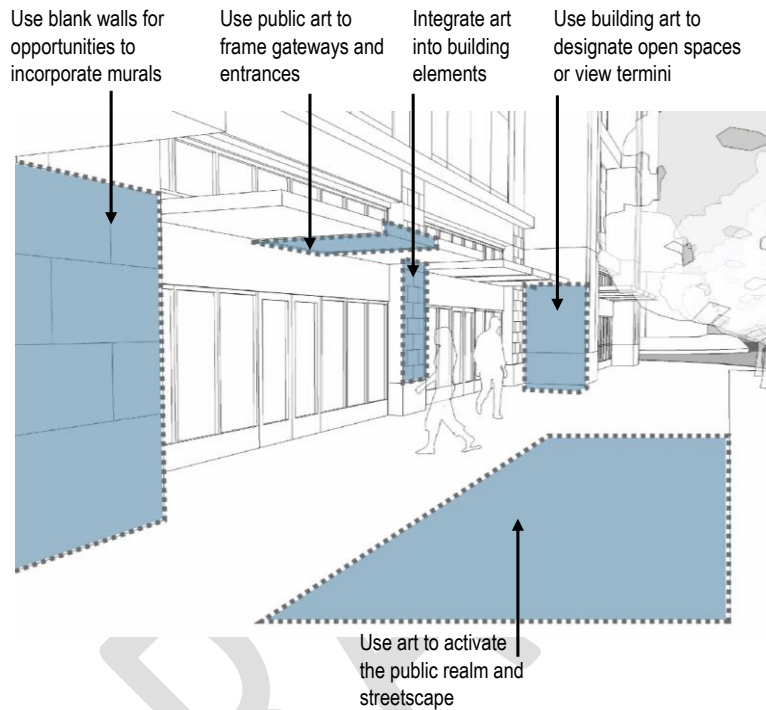

4. Provide Places for Stopping and Viewing.

- a. Intent. People-watching, socializing, and eating are restful and pleasurable activities for the pedestrian; providing special places where they can do these activities increases the pedestrian's sense of enjoyment. Seating and resting places can add vitality to the urban environment. People will use available seating in open, well-designed areas, not in secluded or highly exposed areas.
- b. Guidelines.

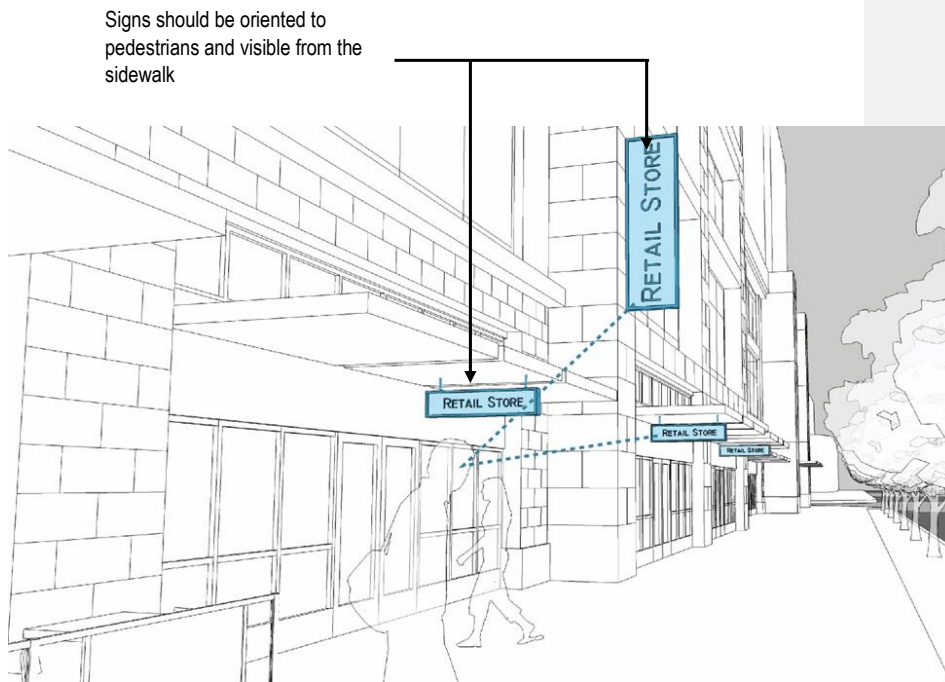

Downtown Livability LUCA Draft with Council Direction as of September 18, 2017

- i. Use formal benches, moveable seating, and informal seating areas such as wide steps, edges of landscaped planters and low walls;
  - ii. Provide more seating areas near active retail establishments especially outside eating and drinking establishments and near food vendors;
  - iii. Provide seating adjacent to sidewalks and pedestrian walkways;
  - iv. Create places for stopping and viewing adjacent to and within parks, squares, plazas, and courtyards; and
  - v. Create a sense of separation from vehicular traffic.
  - vi. Provide comfortable and inviting places where people can stop to sit, rest and visit.
5. Integrate Artistic Elements.
- a. Intent. Artistic elements should complement the character of a site, building or Land Use District as a whole. Art enriches the development by making buildings and open spaces more engaging and memorable. Art is integral to creating a memorable experience for those who live, work, and visit Downtown, especially when the art is integrated into the design of the building or outdoor space. To maximize the opportunities for art on a site, applicants are encouraged to include artists on design teams.
  - b. Guidelines.
    - i. Use art to provide a conceptual framework to organize open spaces including plazas, open spaces, setbacks, and streetscapes;
    - ii. Use art to mark entryways, corners, gateways and view termini;
    - iii. Integrate art into building elements, including but not limited to: facades, canopies, lighting, etc.;
    - iv. Designate a location for the artwork that activates the public realm and is in scale with its location; and
    - v. Use materials and methods that will withstand public use and weathering if sited outdoors.

6. Orient Lighting toward Sidewalks and Public Spaces.
- Intent. Pedestrian-scaled lighting should be used to highlight sidewalks, bike racks and lockers, street trees, and other features, and harmonize with other visual elements in the subarea.
  - Guidelines.
    - Pedestrian-scaled lighting should be provided along pedestrian walkways and public open spaces;
    - Lighting should be compatible among projects within neighborhoods to accentuate their unique character.
    - Fixtures should be visually compatible so as not to overpower or dominate the streetscape.
    - Lighting may also be used to highlight trees and similar features within public and private plazas, courtyards, walkways and other similar outdoor areas and to create an inviting and safe ambiance;

- v. Use lighting to highlight landscape areas.
  - vi. Integrate and conceal fixtures into the design of buildings or landscape walls, handrails, and stairways;
  - vii. Install foot lighting that illuminates walkways and stairs;
  - viii. Use energy-efficient lighting, such as LED;
  - ix. Direct bollard lighting downward toward walking surfaces;
  - x. Provide festive lighting along signature streets on buildings and trees; and
  - xi. Decorative lighting may be used in open spaces to make the area more welcoming.
7. Orient Hanging and Blade Signs to Pedestrians.
- a. Intent. Signs may provide an address, identify a place of business, locate residential buildings or generally offer directions and information. Their function shall be architecturally compatible with and contribute to the character of the surrounding area. Hanging signs should be oriented to the pedestrian and highly visible from the sidewalk. Hanging signs can contribute significantly to a positive retail and pedestrian environment and reinforce a sense of place. Signs shall comply with the provisions of the Chapter 22.10B, BCC (Sign Code).
  - b. Guideline.
    - i. Signs should not overwhelm the streetscape. They should be compatible with and complement the building's architecture, including its awnings, canopies, lighting, and street furniture;
    - ii. Sign lighting should be integrated into the facade of the building;
    - iii. Signs should be constructed of high-quality materials and finishes;
    - iv. Signs should be attached to the building in a durable fashion; and
    - v. Signs should be constructed of individual, three-dimensional letters, as opposed to one single box with cutout flat letters.

8. Build Compatible Parking Structures.

a. Intent. Use design elements to enhance the compatibility of parking garages and integrated structured parking with the urban streetscape.

b. Standards and Guidelines.

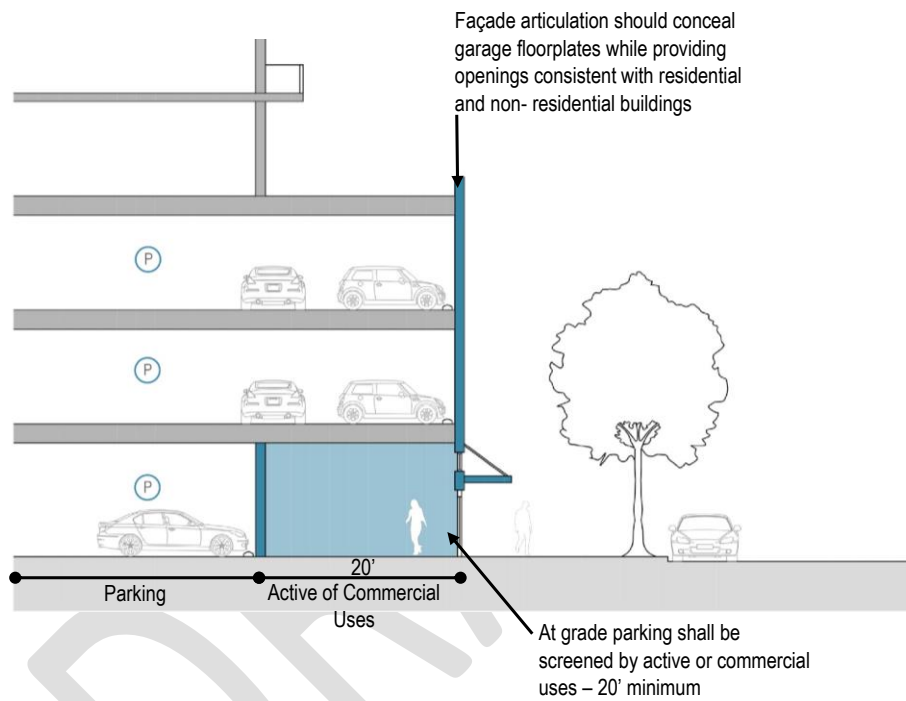

i. Where adjacent to a right-of-way, a minimum of twenty feet of the first and second floors measured from the façade inward shall be habitable for commercial activity. The following rights-of-way are excluded from this requirement:

- (1) 114<sup>th</sup> Ave NE,
- (2) Through-block pedestrian connections,
- (3) Main Street between 112<sup>th</sup> Ave NE and 114<sup>th</sup> Ave NE,
- (3) NE 2<sup>nd</sup> Street between 112<sup>th</sup> Ave NE and 114<sup>th</sup> Ave NE,
- (4) NE 4<sup>th</sup> Street between 112<sup>th</sup> Ave NE and 114<sup>th</sup> Ave NE, and

**Commented [BT(17)]:** Errata. This block was omitted inadvertently

(5) NE 6nd Street between 112th Ave NE and 114th Ave NE.

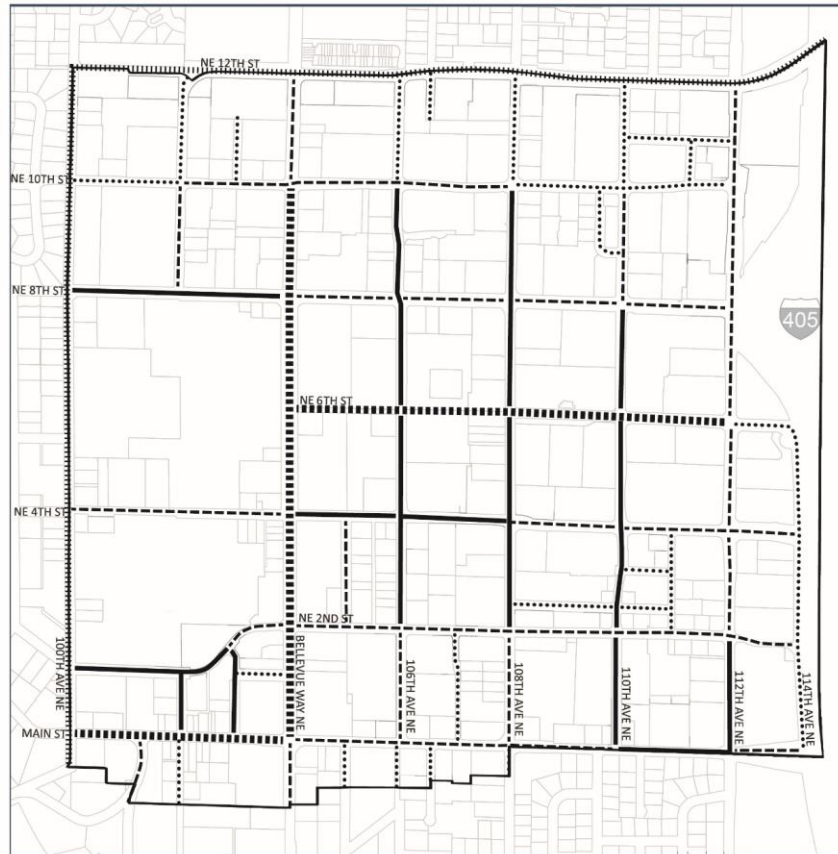

- ii. Parking garages and integrated structured parking shall be designed so that their streetscape interface has a consistent aesthetic through massing and use of materials complementing the vision for the area;
- iii. On a streetscape, openings shall be glazed when adjacent to right-of-way or adjacent to through-block pedestrian connections above the second floor except when the openings are adjacent to the freeway, in which case the openings shall be glazed on floor levels above the adjacent freeway.
- iv. Openings shall be provided adjacent to interior property lines to avoid blank walls and shall be glazed to function as windows;
- v. Parking garage floors shall be horizontal to accommodate adaptive reuse;
- vi. Stairways, elevators, and parking entries and exits shall occur at mid-block;
- vii. Design a single auto exit/entry control point to minimize number and width of driveway openings (entry and exit points may be separated) and potential conflicts;
- viii. Design shall include vertical expression of building structure that provides continuity with the surrounding development;
- ix. Profiles of parking structure floors shall be concealed and not visible to the public through façade treatments and materiality while providing openings consistent with residential and non-residential buildings;
- x. Parking garages and structured parking shall should be designed to be compatible with the urban streetscape;
- xi. Sill heights and parapets shall be sufficient to screen view of automobiles; and
- xii. Rhythm and spacing of openings shall should reflect a typical commercial or residential development; and
- xiii. Where glazing is required, the applicant may elect to provide a maximum of 25 percent of the openings of the total perimeter wall area of each level as unglazed or the minimum required openings percentage for natural ventilation established by the applicable International Building Code Section 406.5.2, as amended by the Bellevue Building Code, whichever is greater, to ensure the natural ventilation of the garage.

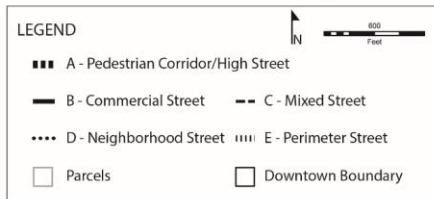

## B. Right-of-Way Designations

Introduction: The Right-of-Way Designations provide design guidelines for the streetscape organized by Downtown streets. These designations are a representation of the Downtown vision for the future, rather than what currently exists. The designations create a hierarchy of rights-of-way reflecting the intensity of pedestrian activity. The “A” Rights-of-Way are those streets that have the highest amount of pedestrian activity, while the “D” Rights-of-Way would have a smaller amount of pedestrian activity. These guidelines are intended to provide activity, enclosure, and protection on the sidewalk for the pedestrian.

Figure 20.25A.170.B

DOWNTOWN BUILDING/SIDEWALK  
RELATIONSHIP DESIGNATIONS

1. Pedestrian Corridor / High Streets - A Rights-of-Way

a. Intent. Rights-of-way designated 'A' shall have the highest orientation to pedestrians. This shall be achieved by emphasizing the design relationship between the first level of the structure and the horizontal space between the structure and the curb line. This relationship shall emphasize, to the greatest extent possible, both the physical and visual access into and from the structure, as well as the amenities and features of the outside pedestrian space. In order to achieve the intended level of vitality, design diversity, and people activity on an 'A' right-of-way, Active Uses shall be provided for in the design.

b. Standards and Guidelines

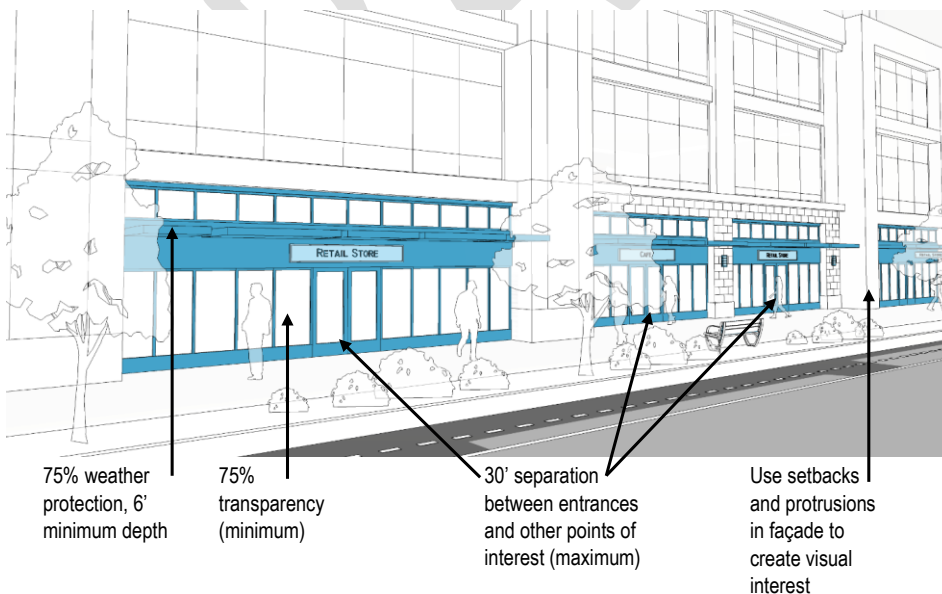

i. Transparency: 75% minimum.

ii. Weather Protection: 75% minimum, 6 feet deep. When a building is adjacent to two or more rights-of-way, weather protection shall be provided for the two rights-of-way with the highest pedestrian orientation. Refer to LUC 20.25A.170.A.2 for more guidelines on weather protection;

iii. Points of Interest: Every 30 linear feet of the façade, maximum;

iv. Vehicular Parking: No surface parking or vehicle access shall be allowed directly between sidewalk and main pedestrian entrance; and

v. 100 % of the street wall abutting the build-to line shall incorporate Active Uses.

2. Commercial Streets - B Rights-of Way

a. Rights-of-way designated 'B' shall have moderate to heavy orientation to pedestrians. This shall be achieved by developing the design so that there is a close relationship between exterior and internal activities with respect to both physical and visual access. Design attention shall be given to sidewalk related activities and amenities. 'B' rights-of-way are to provide a diverse and active connection between the Active Use dominated "A" rights-of-way, and the other Downtown rights-of-way.

b. Standards and Guidelines.

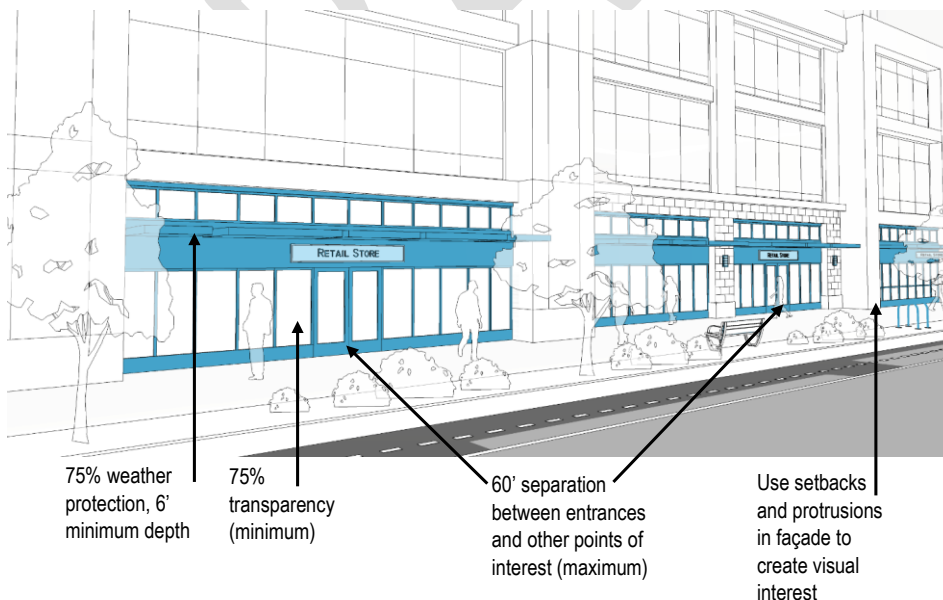

i. Transparency: 75% minimum;

ii. Weather Protection: 75% minimum, 6 feet deep minimum. When a building is adjacent to two or more rights-of-way, weather protection shall be provided for the two rights-of-way with the highest pedestrian orientation. Refer to LUC 20.25A.170.A.2 for more guidelines on weather protection;

iii. Points of Interest: Every 60 linear feet of the façade, maximum;

iv. Vehicular Parking: No surface parking or vehicle access directly between perimeter sidewalk and main pedestrian entrance; and

v. 100% of the street wall shall incorporate Active Uses and service uses, at least 50% percent of which shall be Active Uses.

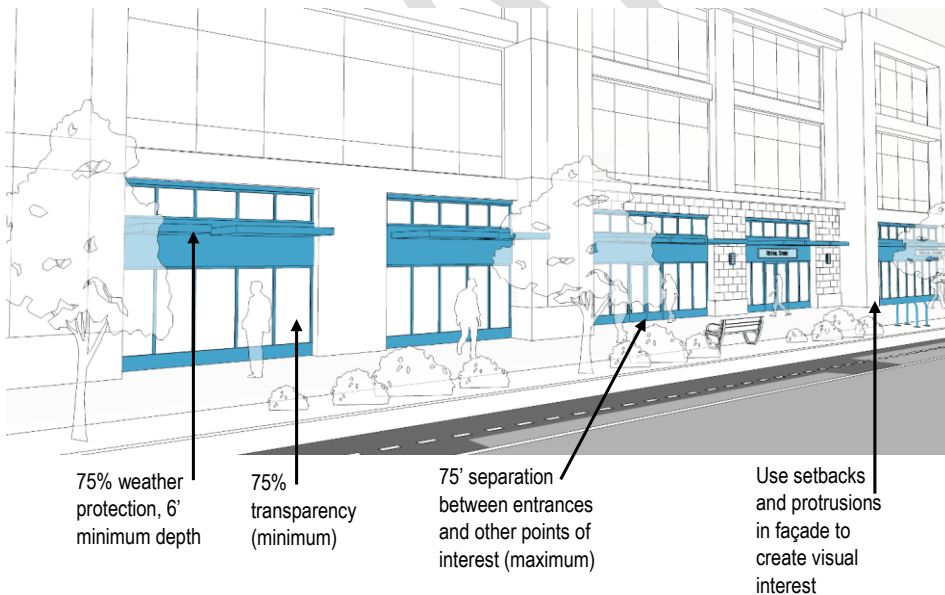

### 3. Mixed Streets - C Rights-of-Way

a. Intent. Rights-of-way designated 'C' shall have moderate orientation to pedestrians. This shall be achieved by designing some relationship between exterior and interior activities with respect to visual access. Design attention shall be given to sidewalk related activities and amenities. 'C' rights-of-way are to provide a major pedestrian connection between the core area and residential areas surrounding Downtown.

#### b. Standards and Guidelines.

- i. Transparency: 75%;
- ii. Weather Protection: 75%. When a building is adjacent to two or more rights-of-way, weather protection shall be provided for the two rights-of-way with the highest pedestrian orientation. Refer to LUC 20.25A.170.A.2 for more guidelines on weather protection;
- iii. Points of Interest: Every 75 linear feet of façade, maximum; and
- iv. Vehicular Parking: No surface parking or vehicle access directly between perimeter sidewalk and main pedestrian entrance.
- v. 50% of street wall shall incorporate Active Uses or service uses.

4. Neighborhood Streets - D Rights-of-Way.

a. Intent. Rights-of-way designated 'D' shall have low to moderate orientation to pedestrians and shall complement residential uses. This shall be achieved by designing some relationship between exterior and interior activities with respect to visual access and by incorporating landscape features that soften the urban edge. Design attention shall be given to sidewalk related activities and amenities that complement these areas' residential character and moderate the urban environment, while providing attractive visual access for pedestrians and other passersby.

b. Standards and Guidelines.

- i. Transparency: Blank walls and inactive uses may occupy no more than 25% of the façade;
- ii. Weather Protection: 50%. When a building is adjacent to two or more rights-of-way, weather protection shall be provided for the two rights-of-way with the highest pedestrian orientation. Refer to LUC 20.25A.170.A.2 for more guidelines on weather protection;
- iii. Points of Interest: Every 90 linear feet of façade, maximum; and
- iv. Vehicular Parking: No surface parking or vehicle access directly between perimeter sidewalk and main pedestrian entrance.

5. Perimeter Streets – E Rights-of-Way.

a. Intent. Rights-of-way designated 'E' may have a lower volume of pedestrians. Such rights-of-way are intended to provide a visual buffer between Downtown and surrounding residential neighborhoods. Emphasis shall be placed on how the street is viewed from outside the Downtown. These streets shall provide a graceful transition to adjacent residential Land Use Districts outside of Downtown.

b. Standards and Guidelines.

- i. Transparency: Blank walls and inactive uses may occupy 25% of the façade;
- ii. Weather Protection: At entries;
- iii. Points of Interest: Every 90 linear feet of façade, maximum; and
- iv. Vehicular Parking: No surface parking or vehicle access directly between perimeter sidewalk and main pedestrian entrance.

**C. Alleys with Addresses**

1. Intent. Alleys with Addresses act as active through-block connections and are faced with a mix of Active Uses and residential uses. Alleys with Addresses shall have a high orientation to pedestrians with any vehicular activity being secondary to the pedestrian. This is achieved by emphasizing the

relationship between the vertical street wall and the ground plane devoted to through-block access and the public right-of-way. This relationship should emphasize to the greatest extent possible, both physical and visual access into and from the structure at frequent intervals, as well as the amenities and features of the outside pedestrian space. In order to achieve the intended level of vitality, design diversity, and pedestrian activity on an Alley with an Address, retail restaurant, and other commercial entries shall be provided for in the design. Ground floor live/work units and residential units with stoops can also help to bring life to the paths with multiple entrances and meaningful transparency along the building frontage.

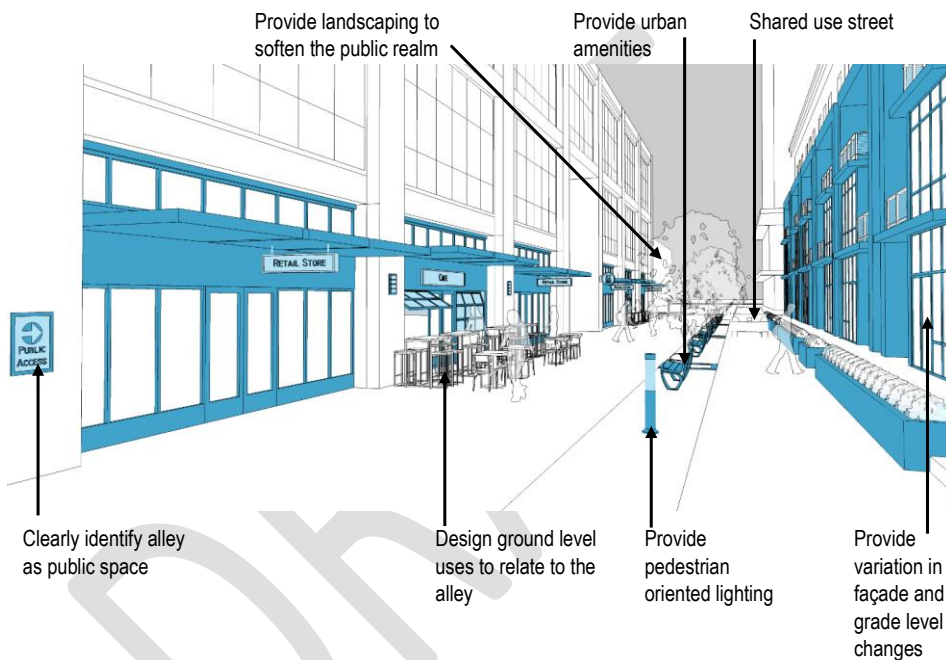

## 2. Standards

- a. At least one entire side of the Alley with an Address shall comply with guidelines i. through v. for Pedestrian Corridor / High Streets - 'A' rights-of-way found in paragraph B of this section.
- b. Minimum dimension for an alley with an address shall be 20 feet wide exclusive of drive lane widths.
- c. Alleys with Addresses shall be open to the public 24 hours a day and 7 days a week. Signs shall be posted in clear view stating the Alley with an Address is open to the public during these hours.
- d. Each tenant space shall have an exterior entrance facing onto the alley and be addressed off the alley.

## 3. Guidelines

- a. Materials and design elements such as paving, lighting, landscaping, and signage should incorporate design elements of the adjacent right-of-way to identify it as part of the public realm.
- b. The Alley with an Address may be covered in some areas but should not be predominantly enclosed.
- c. Access from the public right-of-way should be encouraged and enhanced by multiple clear points of entry that identify the Alley as a public space. Access through the site should form a clear circulation logic with the street grid.
- d. Wayfinding, signage, symbols and lighting should identify the alley as a public space.
- e. Design of the ground level and upper level retail should relate to the alley and be distinct from the rest of the building. This can be achieved through the use of common architectural style, building materials, articulation, and color.
- f. Variation should be incorporated into the design by including dimensional and level changes at both the ground plain and building walls.
- g. Pedestrian-oriented lighting should be provided that is compatible with the landscape design, improves safety and minimizes glare. Design should be high quality, and materials should be durable and convey a sense of permanence.
- h. Landscaping should be used to animate and soften the space. The use of art and water is also encouraged.

- i. Alley design should not incorporate loading, refuse handling, parking, and other building and site service uses at the ground level facade, though such activities may be conducted in an Alley when reasonable alternatives are not available. Operational procedures should encourage the above-referenced activities after normal business hours.
- j. Provide complete project design for all phases within a project limit to ensure coordinated design and construction across multiple phases.

#### D. Upper Level Active Uses

1. Intent. Upper level active uses are intended to activate the ground level pedestrian environment. This is accomplished through extensive visual access to the upper level from the exterior, convenient and frequent access from the street or Alley with an Address, clear line of sight from grade and visibility of ongoing activity within the upper level active use. An upper level active use should be designed and managed so as to draw the attention and interest of the pedestrian to the upper level and to increase opportunities for interaction and movement between the ground and upper levels. To achieve the intended level of vitality, design diversity, and human activity at the upper level active use, the following characteristics shall be provided in the design.
2. Standards.
  - a. Points of physical vertical access between the ground level and upper levels shall be located no more than 150 feet apart to facilitate frequent pedestrian access to upper level active uses.

- b. Each tenant space shall have an exterior entrance.
  - c. Floor area and building facades directly below upper level active uses shall comply with guidelines i. through v. for Pedestrian Corridor / High Streets - 'A' rights-of-way found in paragraph B of this section.
  - d. Visual access shall not be impaired by small, enclosed display windows, window coverings and tinted or reflective glazing.
3. Guidelines.
- a. Architectural treatment of the upper level active use space should read as part of the ground level and be distinct from the architectural treatment of the building above.
  - b. Extensive visual access into the upper level retail space should be available from the sidewalk or the alley with an address with frequent clear lines of sight from grade.
  - c. Lighting and signage should be used to enliven and draw attention to upper level arcade or balcony, or directly through ground level retail for a multilevel single tenant.

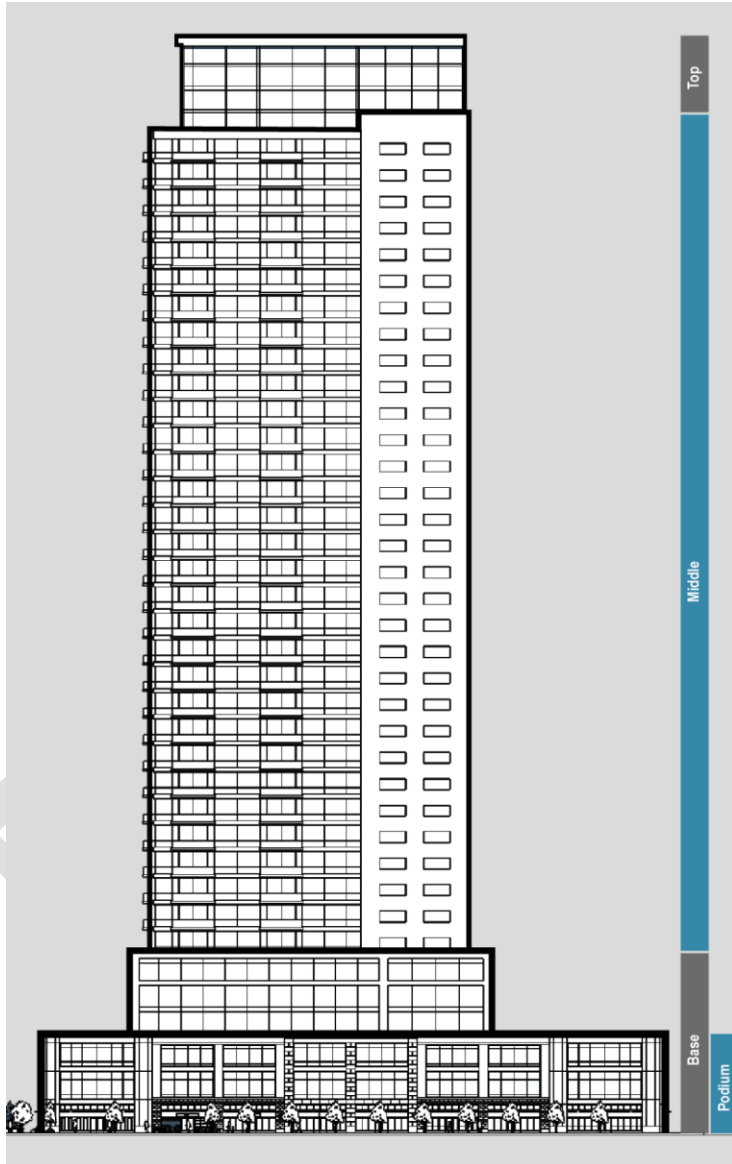

#### **20.25A.180 Building Design (Base, Middle, and Top)**

##### **A. Introduction**

A building should consist of three carefully integrated parts: a building base, middle, and top.

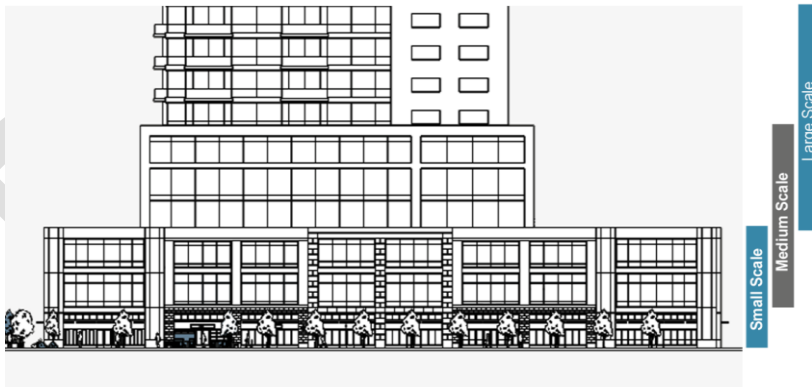

##### **B. Overall Building Design**

1. Encourage High Quality Materials.
  - a. Intent. Create a sense of permanence in Downtown through the use of high quality building materials. Quality facade materials can provide a sense of permanence and bring life and warmth to a neighborhood. Facade and building materials shall enhance the street environment while complementing the aesthetic quality of adjacent buildings.
  - b. Guidelines.
    - i. Articulation of façade materials should be bold, with materials that demonstrate depth, quality and durability;
    - ii. It should be apparent that the materials have substance and mass, and are not artificial, thin “stage sets” applied only to the building’s surface;
    - iii. Use natural high quality materials such as brick, finished concrete, stone, terra cotta, cement stucco, and wood in natural or subdued building colors; and
    - iv. Use varied, yet compatible cladding materials. Window and storefront trim should be well-defined and contribute to the overall aesthetic quality.

2. Provide Interesting Building Massing.

- a. Intent. Use scale-defining articulation and other techniques to break up the longitudinal dimensions of buildings, creating a comfortable sense of enclosure and human scale by establishing a dynamic, continuous street edge.
- b. Guidelines.
  - i. The length and breadth of a building should be pedestrian-scaled. Portions of a large building mass should be broken into smaller, appropriately scaled modules, with changes in plane indicated by bold projections and recesses. This results in larger elevations being reduced to human scale;
  - ii. Vertical and horizontal elements should be used to create a human scale and form a coherent aesthetic providing visual interest to the pedestrian;
  - iii. Reduce the scale of elevations both horizontally and vertically;
  - iv. Buildings should exhibit a vertically articulated tripartite facade division – base, middle, and top through material and scale; and
  - v. Design should feature vertical articulation of windows, columns, and bays.

### C. Connected Floor Plates

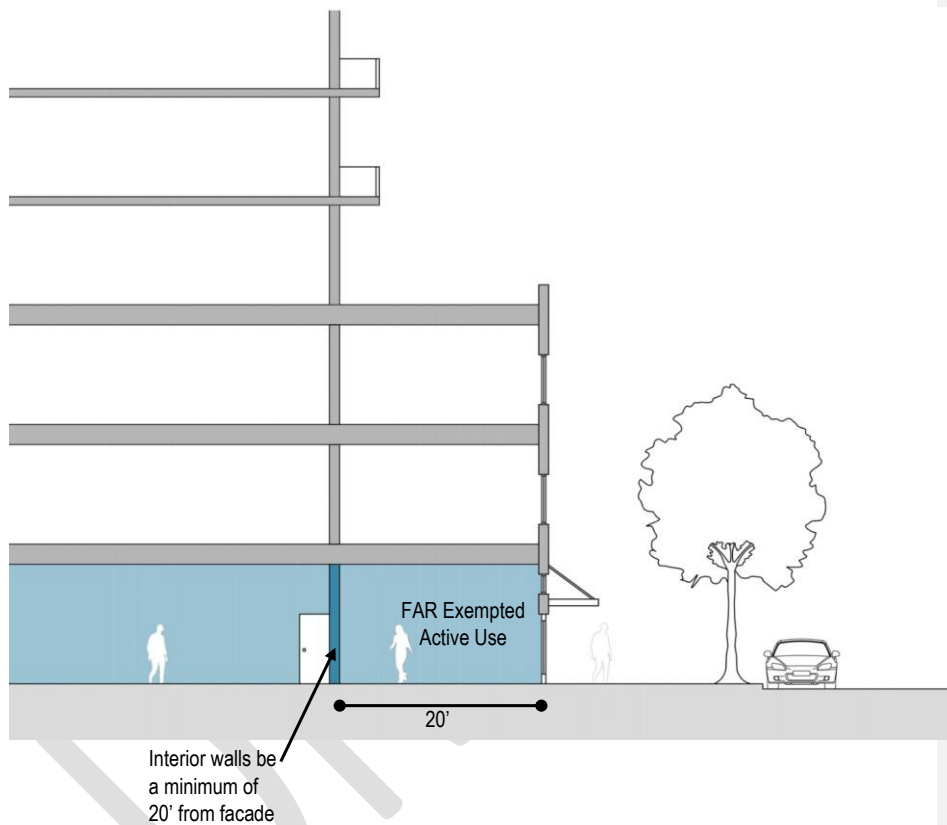

1. Intent. The intent of connecting floor plates is to allow a development to gain the benefits of a connected building while having the appearance of two or more separate buildings. The connection or corridor should recede from view as compared to the floor plates.

2. Guidelines.

- a. From the right-of-way, the development should appear as separate and distinct buildings to the pedestrian; and
- b. The connection should appear to be distinct from the adjacent masses.

**D. Building Base (Podium)**

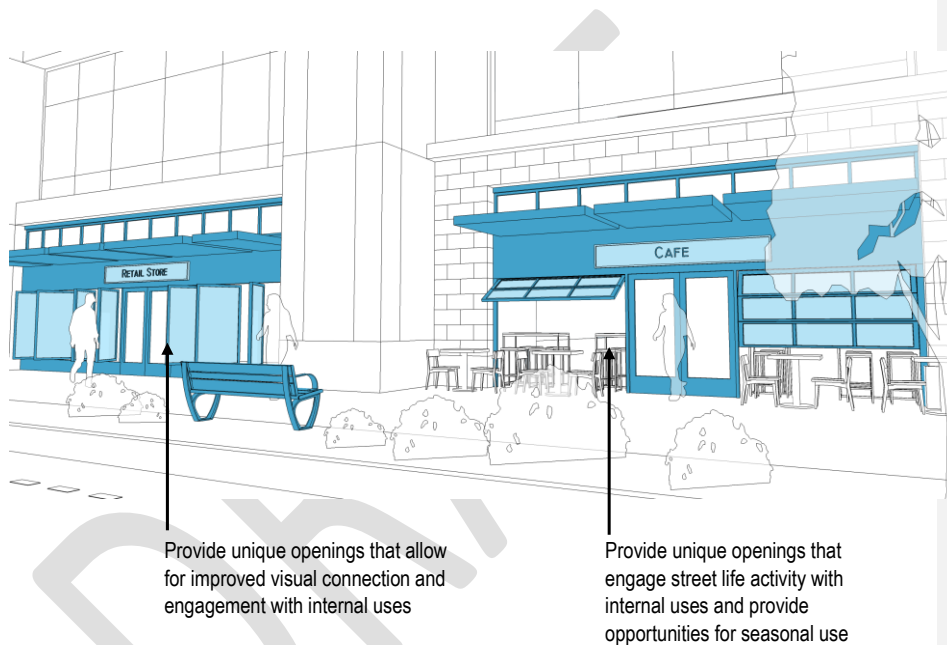

- 1. Introduction. The role of the building base is to relate buildings to the human scale and fit harmoniously within the existing or planned street wall context; define the edges of adjacent streets, parks, and open space in good proportion; and maintain access to sunlight for pedestrians, open and public spaces, and adjacent properties.
- 2. Articulate the building base with high-quality materials and design elements that fit with the aesthetic quality of neighboring buildings and contribute to the pedestrian scale and experience.
  - a. Intent. The building façade shall provide architectural expression that relates to its surroundings and include materials and elements that can be viewed and appreciated at the speed, scale, and proximity of the pedestrians.
  - b. Guidelines.
    - i. Provide architectural expression and design elements such as cornice lines, window bays, entrances, canopies, building materials, and fenestration, in a pattern, scale, and proportion that relate to neighboring buildings and engages pedestrians;
    - ii. Use high-quality, durable materials, an appropriate variety in texture, and carefully crafted details to achieve visual interest and longevity for the façade. Environmentally sustainable materials and construction methods are encouraged; and
    - iii. A building's profile should be compatible with the intended character of the area and enhance the streetscape. In some cases, it may be appropriate to mark an entryway with a distinct form to emphasize the significance of the building entry.
- 3. Provide clear, unobstructed views into and out from ground floor uses facing the public realm.
  - a. Intent. At street level a series of unobstructed views into and out of buildings enriches the urban experience for pedestrians and building occupants. Transparency enhances visual interest, vitality, and increases safety for all.
  - b. Guidelines.
    - i. Transparent windows should be provided on facades facing streets, parks, and open spaces;
    - ii. Views into and out from ground floor Active Uses may not be obstructed by window coverings, internal furnishings, or walls.
    - iii. Interior walls may be placed a minimum of 20 feet from the window on the façade where Active Uses are a part of an exemption in the FAR Amenity System.

4. Design Inviting Retail and Commercial Entries.

- a. Intent. Design retail and commercial entries to create an open atmosphere that draws customers inside, while creating opportunities to engage the public.
- b. Guidelines.
  - i. Primary entries to retail and commercial establishments should be transparent, allowing passersby to see the activity within the building and bring life and vitality to the street;
  - ii. Architectural detail should be used to help emphasize the building entry including canopies, materials, and depth;

- iii. Building lighting should emphasize entrances;
- iv. Provide transom, side lights, or other combinations of transparency to create visual interest;
- v. Provide double or multiple door entries; and
- vi. Provide a diverse and engaging range of doors, openings and entrances to the street such as pivoting, sliding or roll up overhead entrances.

### 3. Encourage Retail Corner Entries.

- a. Intent. Use corner entries to reinforce intersections as important places for pedestrian interaction and activity.
- b. Guidelines.
  - i. Locate entry doors on the corners of retail buildings wherever possible. Entries at 45-degree angles and free of visual obstructions are encouraged;
  - ii. Locate primary building entrance at the corner;
  - iii. Use weather protection, special paving, and lighting, to emphasize corner entry;

- iv. Use architectural detailing with materials, colors, and finishes that emphasize the corner entry; and
  - v. Use doors with areas of transparency and adjacent windows.
4. Encourage Inviting Ground Floor Retail and Commercial Windows.
- a. Intent. Use transparency to enhance visual interest and to draw people into retail and commercial uses.
  - b. Guideline.
    - i. Retail and commercial uses should use unobstructed windows that add activity and variety at the street level, inviting pedestrians into retail and commercial uses and providing views both in and out;
    - ii. Use clear window glazing;
    - iii. Provide operable windows that open by pivoting, sliding or shuttering for restaurants, cafes, retail and commercial activity;
    - iv. Install transom windows or other glazing combinations that promote visual interest.
5. Provide Multiple Entrances.
- a. Intent. Multiple entrances break up monotonous facades, enhance visual interest, and enrich the pedestrian experience.
  - b. Guideline. Provide pedestrian entrances at frequent intervals to contribute to variety and intensity.
6. Integrate Building Lighting.
- a. Intent. Architectural lighting that enhances and helps articulate building design, including illumination of architectural features and entries, points of interest, uplighting and other effects.
  - b. Guidelines.
    - i. Exterior lighting of buildings should be an integral component of the facade composition. Lighting should be used to create effects of shadow, relief and outline that add visual interest and highlight aspects of the building;
    - ii. Lighting should not cast glare into residential units or onto adjacent development or streets;
    - iii. Use accent lighting for architectural features;
    - iv. Provide pedestrian-oriented lighting features;
    - v. Integrate lighting within the landscape; and

- vi. Provide dimmable exterior lighting.

## **E. Middle (Tower)**

### **1. Tower Placement**

- a. Intent. Tower placement can directly affect those on the ground plane by affecting wind conditions and the scale of the building as compared to the pedestrian. Thoughtful tower placement can minimize these effects.
- b. Guidelines.
  - i. Place towers away from parks, open space, and neighboring properties to reduce visual and physical impacts of the tower and allow the base building to be the primary defining element for the site and adjacent public realm.
  - ii. Coordinate tower placement with other towers on the same block and adjacent blocks to maximize access to sunlight and sky view for surrounding streets, parks, open space, and properties.

### **2. Maximize energy efficiency in tower orientation and articulation.**

- a. Intent. Tower orientation, articulation and other features should be designed to respond to maximize solar orientation and to reduce mechanical heating and cooling.
- b. Guidelines.
  - i. Orient towers to improve building energy performance, natural ventilation, and daylighting, provided that access to sky view is maintained and adverse wind and shadow impacts are minimized;
  - ii. Vary the design and articulation of each tower façade to respond to changes in solar orientation. Where appropriate, adjust internal layouts, glazing ratios, balcony placement, fenestration, and other aspects of the tower design to manage passive solar gain and improve building energy performance;
  - iii. Where possible, include operable windows to provide natural ventilation and help reduce mechanical heating and cooling requirements; and
  - iv. When multiple towers are proposed, stagger the tower heights to create visual interest within the skyline, mitigate wind, and improve access to sunlight and sky view. In general, variation of five stories or more provides a difference in height that can be perceived at street level.

### **3. Design tower to provide visual interest and articulation.**

- a. Intent. Tower design should incorporate articulation, design excellence, and sustainable materials.

- b. Guidelines.
  - i. Incorporate variation and articulation in the design of each tower façade to provide visual interest and to respond to design opportunities and different conditions within the adjacent context; and
  - ii. Articulate towers with high-quality, sustainable materials and finishes to promote design excellence, innovation, and building longevity.
- 4. Promote Visually Interesting Upper Floor Residential Windows.
  - a. Intent. Upper floor residential windows should create an open and inviting atmosphere that adds visual interest and enhances the experience of the building both inside and out.
  - b. Guidelines.
    - i. The windows of a residential building should be pleasing and coherent. Their size and detailing should be of a human scale with regular spacing and a rhythm of similarly shaped windows;
    - ii. Windows should be residential in character;
    - iii. Windows should be operable; and
    - iv. Windows should have trim round framed openings and be recessed from the building façade, not flush.

## **F. Top**

- 1. Create Attractive Building Silhouettes and Rooflines.
  - a. Intent. Building rooflines should enliven the pedestrian experience and provide visual interest with details that create dynamic and distinct forms.
  - b. Guidelines.
    - i. Building rooflines should be dynamic, fluid, and well-articulated to exhibit design excellence while creating a dynamic and attractive skyline;
    - ii. Include towers or similar vertical architectural expressions of important building functions such as entries;
    - iii. Vary roof line heights; and
    - iv. Incorporate well-detailed cornices that have significant proportions (height and depth) and create visual interest and shadow lines.
- 2. Foster Attractive Rooftops.
  - a. Intent. Integrate rooftop elements into the building design.

b. Guidelines.

- i. Roof shape, surface materials, colors, and penthouse functions should all be integrated into the overall building design. LUC 20.25A.130 provides guidance for rooftop mechanical equipment;
- ii. Provide rooftop terraces, gardens, and open spaces;
- iii. Incorporate green roofs that reduce stormwater runoff; and
- iv. Consolidate and screen mechanical units.
- v. Occupied rooftop amenity areas are encouraged provided that potential noise and light impacts on neighboring developments are minimized.
