Description and Scope

This project will construct the first phase of the Mountains to Sound Greenway Trail from I-405 to 132nd Avenue SE. The trail design includes a 12-foot wide paved trail, a grade separated crossing over Factoria Blvd. SE, a tunnel under the I-405/I-90 ramps, walls, storm system improvements, natural storm drainage practices where feasible, landscaping, street lighting, street furniture and wayfinding. The project will also add storage capacity to the Eastbound I-90 Offramp at Factoria Blvd. SE by relocating the existing trail and adding one additional storage lane. The project also will partner with WSDOT I-405 Renton to Bellevue Widening project to construct a single wall for the benefit for both projects. This project is funded by \$14 million in State Connecting Washington Funds and approximately \$2 million from WSDOT's I-405 Renton to Bellevue for the joint wall work.

Rationale

This project will construct the first 2,900 feet of the missing gap in the Mountians to Sound Greenway Trail. Bellevue's Comprehensive Plan identifies the need to address the "Eastgate Gap" and "integrate into the designs of frontage roads along the I-90 freeway corridor the Mountains-to-Sound Greenway concept." (Policy UD-53) The desire to improve multi-modal facilities in order to provide safe transportation alternatives for commuters and recreational users is recognized in the vision outlined in the 2009 Pedestrian & Bicycle Transportation Plan and the City's Comprehensive Plan policies. The relocation of the trail from the eastbound I-90 off-ramp will address traffic safety concerns associated with the off-ramp backing up onto I-90 during peak hours. Constructing a joint wall with WSDOT's I-405 Renton to Bellevue project is a more efficient construction method for both projects and helps minimize construction impacts by doing the work all at once.

Environmental Impacts

Consistent with federal and state environmental requirements, this project obtained NEPA and SEPA environmental approval and will obtain the required City, state and federal permits prior to construction.

Operating Budget Impacts

Operating costs will increase due to the maintenance of the trail, street lighting, landscaping, and other similar costs. An estimated \$40,000 of annual maintenance (adjusted for inflation) will be required to fund operating costs associated with this project.
