### Description and Scope

This program will inventory and prioritize needs for maintenance, rehabilitation, reconstruction, or replacement of significant transportation systems components and other transportation-related right-of-way appurtenances. The program will address high priority maintenance needs including, but not limited to, the repair, rehabilitation, or replacement of roadways, walkways, trails, retaining walls, rockeries, guardrails, pedestrian safety railing, City-owned fences, and maintenance to existing signals and lighting systems.

### Rationale

This program provides funds for major maintenance improvements that will preserve and extend the life of previous transportation investments throughout the City. The program provides necessary capital resources to address a wide range of maintenance related needs that exceed the financial capacity of the Streets Maintenance or Traffic Operations operating budgets but are too small for standalone CIP projects.

### Environmental Impacts

This program funds projects that are primarily maintenance and safety-oriented which are implemented on previously improved rights of way, so environmental issues are minimal and are addressed as appropriate on a location-by-location basis.

### Operating Budget Impacts

Operating costs for this program will determined on a project specific basis as required.
